About College Board

College Board is a mission-driven not-for-profit organization that connects students to college success and opportunity. Founded in 1900, College Board was created to expand access to higher education. Today, the membership association is made up of over 6,000 of the world’s leading educational institutions and is dedicated to promoting excellence and equity in education. Each year, College Board helps more than seven million students prepare for a successful transition to college through programs and services in college readiness and college success—including the SAT® and the Advanced Placement Program®. The organization also serves the education community through research and advocacy on behalf of students, educators, and schools. For further information, visit collegeboard.org.

SAT Customer Service

You can reach us from 8 a.m. to 9 p.m. Eastern Time (Monday to Friday 9 a.m. to 7 p.m. after the June test through August 18).

      Miami, FL 33102
Using This Guide

Taking the SAT is a great way to find out how ready you are for college and career. Just as important, taking the SAT connects you to College Board programs and services that can propel you toward the opportunities you've earned through your own hard work. We've created this guide to help you:

- Become familiar with the test so that you’re not surprised or confused on test day.
- Learn the test directions. The directions for answering the questions in this guide are the same as those on the actual test.
- Review the sample questions. The more familiar you are with the question formats, the more comfortable you’ll feel when you see similar questions on the actual test. In particular, be sure to practice writing answers to the student-produced response questions on the Math Test later in this guide.
- Understand how the tests are scored.

- Be aware of what you need to know about taking this test. Terms and conditions and other test security and fairness policies can be found after the sample questions.

What the SAT Measures

The SAT is focused on the skills and knowledge at the heart of education. It measures:

- What you learn in high school.
- What you need to succeed in college and career training.

The same habits and choices that lead to success in school will help you get ready for the SAT. The best way to prepare for the test is to:

- Take challenging courses.
- Do your homework.
- Prepare for tests and quizzes.
- Ask and answer lots of questions.
How the SAT Is Organized

The SAT has four tests, including the optional SAT Essay. The three tests that everyone will take are the Reading Test, the Writing and Language Test, and the Math Test. The tests break down like this:

<table>
<thead>
<tr>
<th>Component</th>
<th>Time Allotted</th>
<th>Number of Questions/Tasks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading</td>
<td>65 (min.)</td>
<td>52</td>
</tr>
<tr>
<td>Writing and Language</td>
<td>35</td>
<td>44</td>
</tr>
<tr>
<td>Math</td>
<td>80</td>
<td>58</td>
</tr>
<tr>
<td>Essay (if taken)</td>
<td>50</td>
<td>1</td>
</tr>
<tr>
<td>Total</td>
<td>180</td>
<td>154</td>
</tr>
<tr>
<td></td>
<td>(230 with Essay)</td>
<td>(155 with Essay)</td>
</tr>
</tbody>
</table>

As part of scoring, every test goes through an equating process. Equating is a statistical process we use to ensure that scores mean the same thing no matter which version of the test you take or when you take it. In order to assist with future testing, College Board may conduct research studies in connection with the testing of a subset of students.

Also, the test occasionally includes test questions for research purposes. These questions may appear in any of the test sections, and testing time will be extended by 20 minutes so students have time to answer them. These questions will not be included in computing your scores. Students must complete all sections of the test. If you leave before dismissal, your scores will be canceled.

How the SAT Is Scored

All multiple-choice questions are scored the same way: one point for each correct answer and zero points for incorrect answers. No points are subtracted for incorrect answers or answers left blank. Hard questions count the same as easier questions. You won’t lose any points for guessing, so try to answer every question. The table below shows you all the scores you’ll receive on the SAT.

<table>
<thead>
<tr>
<th>SAT Score Reported</th>
<th>Details</th>
<th>Score Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Score</td>
<td>Sum of the two section scores</td>
<td>400–1600</td>
</tr>
<tr>
<td>Section Scores (2)</td>
<td>• Evidence-Based Reading and Writing</td>
<td>200–800</td>
</tr>
<tr>
<td></td>
<td>• Math</td>
<td></td>
</tr>
<tr>
<td>Test Scores (3)</td>
<td>• Reading</td>
<td>10–40</td>
</tr>
<tr>
<td></td>
<td>• Writing and Language</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Math</td>
<td></td>
</tr>
<tr>
<td>Essay Scores (3)</td>
<td>• Reading</td>
<td>2–8</td>
</tr>
<tr>
<td>(if the SAT Essay is taken)</td>
<td>• Analysis</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Writing</td>
<td></td>
</tr>
<tr>
<td>Cross-Test Scores (2)</td>
<td>• Analysis in History/Social Studies</td>
<td>10–40</td>
</tr>
<tr>
<td></td>
<td>• Analysis in Science</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Based on select questions in the Reading Test, Writing and Language Test, and Math Test. These scores show how well you use your skills to analyze texts and solve problems in these subject areas.</td>
<td></td>
</tr>
<tr>
<td>Subscores (7)</td>
<td>• Reading and Writing and Language: Command of Evidence and Words in Context</td>
<td>1–15</td>
</tr>
<tr>
<td></td>
<td>• Writing and Language: Expression of Ideas and Standard English Conventions</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Math: Heart of Algebra, Problem Solving and Data Analysis, and Passport to Advanced Math</td>
<td></td>
</tr>
</tbody>
</table>
Before Test Day

If You Need Testing Accommodations

If you have a disability that requires testing accommodations, you must apply for College Board approval in advance of the test date you need the accommodations for. All accommodations must be approved by the Services for Students with Disabilities (SSD) office. See collegeboard.org/ssd for information on how to apply for and use accommodations.

Applying for Accommodations

- Work with your school’s SSD coordinator or counselor to apply for accommodations. Your SSD coordinator can help determine what accommodations are best for you and submit a request online.
- If you want to request accommodations on your own, download a paper Student Eligibility Form from collegeboard.org/ssd.
- Once approved for accommodations, with some exceptions, you remain approved and do not have to apply again when taking another College Board test.
- Bring your SSD eligibility letter with you on test day to provide documentation if needed.

Registering with Accommodations

Register for your chosen test date and include your SSD number (listed on your eligibility letter).

- If your accommodations haven’t been approved yet, register for standard testing. As long as your accommodations are approved in time, your registration should be updated automatically. Be sure to print an updated admission ticket showing your accommodations.
- If your accommodations aren’t approved in time for your test date, you can:
  - Transfer to a later date.
  - Bring a copy of your SSD eligibility letter, along with your photo ID and admission ticket, to the test center. If there are enough materials and space, you may be able to test with your approved accommodations.

The SAT Questionnaire

When you register for the SAT, you’ll have the opportunity to answer questions about yourself, your educational experience, and your possible plans for after you graduate high school. While you don’t have to answer these questions, we strongly recommend that you do.

Your responses give your school counselors and college admission officers information they can use to help you plan your future. The more information you provide, the more they can help you.

Your answers to some questions (the questionnaire identifies which ones) won’t appear on your score report but will be used by College Board for research and planning.

Your responses, when combined with those of all other students taking the SAT, contribute to an understanding of the academic preparation, extra- and cocurricular involvement, and post-high-school plans of your graduating class, which can help colleges and universities deliver programs and opportunities to serve you and your classmates.

Sending Scores

You’ll also have the opportunity when you register for the SAT to choose up to four colleges, universities, or scholarship programs to receive your scores for free. (Sending scores to additional colleges, universities, or scholarship programs can be requested for a fee online.) Only your scores from the test date on the registration will be sent, unless you specifically ask to send all your existing SAT and SAT Subject Test scores.

The report you receive and the reports received by colleges and your high school contain total and section scores that have been converted to College Board’s 400–1600-point scale for all SAT Program tests. (See How the SAT Is Scored on page 4 for more information.)

Score Reporting

The online score report gives you the meaning behind your numbers by providing a summary of how you did on each section. You can access your online score report through your College Board account. (If you can’t access your online score report, your school can print a copy for you.) The SAT online score report contains:

- Percentiles that let you see how your results compare with those of other students like you.
Before Test Day  Connect to Opportunities in Higher Education

- A search tool for career and college majors, with suggestions based on information you provide in your profile.
- The prompt for the SAT Essay (if you took it) and a scanned copy of your response.

Score Choice
If you take the SAT more than once, or if you take more than one SAT Subject Test, you can have the option of Score Choice®. With Score Choice, you can put your best foot forward by choosing which scores you send to colleges. Choose by test date for the SAT and by individual test for SAT Subject Tests™—but keep in mind that some colleges and scholarship programs require you to send all your scores.

This service is optional. If you don’t use Score Choice, we’ll send all your SAT and SAT Subject Tests scores from your most recent six administrations. However, if you want only your highest scores to be seen, you should select Score Choice. Each school or program has its own deadlines and policies for how scores are used. Information is listed on the score-sending site for each participating institution, but check with the individual school or scholarship program to make sure you’re following its guidelines.

Connect to Opportunities in Higher Education
Each year millions of students take the SAT, and thousands of high school counselors and postsecondary admission officers worldwide use their scores to guide decisions in the college application process. The test that you’ll take on test day is a challenging yet appropriate and fair assessment of what you know and can do. The questions you’ll tackle focus on the knowledge and skills that the best available evidence indicates are essential for college and career readiness and success.

We’re committed to providing opportunities to help you reach your goals for college and career. Students who are the first in their families to consider attending college, who come from low-income families, or whose ethnicities are underrepresented in colleges may feel that college isn’t for them. College Board’s Access to Opportunity™ (A2O™) efforts are designed to identify and break down barriers that prevent students from applying to and enrolling in colleges that are their best academic, social, and financial fit. Our mission is to help all students recognize and make the most of the opportunities they’ve earned. See Useful Resources on page 12 for more information about ways to achieve your dreams.

Student Search Service
Nearly 1,900 eligible colleges, universities, scholarships, and other educational programs use our Student Search Service® to look for students who match a range of factors—such as the area where you live or go to school, the interests you pursue, and what you plan to study in college. Here are some key facts about the service:

- You can join for free and directly hear from a diverse group of eligible colleges, universities, scholarships, and other educational programs.
- When you take a College Board test, you can opt in so eligible colleges, universities, scholarships, and other educational programs can send you information. You’ll be asked to provide information about yourself when either registering or taking the test. (See The SAT Questionnaire for more information.) You may also provide additional information on College Board’s college planning website, BigFuture™, at bigfuture.org.
- Only eligible colleges, universities, scholarships, and other educational programs can participate. They most often search on expected graduation date, cumulative grade point average (GPA), and intended college major.
- We never sell or share your test scores, grades, disability status, or telephone numbers.
- We don’t allow any commercial advertising.

How Student Search Service Works
Once you opt in, you can expect to receive emails and postal mail from eligible colleges, universities, scholarships, and other educational programs in your city, state, or country, or from around the world. All of the colleges and universities that you’ll hear from welcome students just like you on their campuses. They may send you:

- Information on financial aid, scholarships, or other ways to make college or university more affordable.
- Details on campus life and student services.
- Overviews of majors, courses, and degree options.

Being contacted by a college or university doesn’t mean you’ve been admitted. You must submit an application to be considered for admission. The eligible colleges, universities, scholarships, and other educational programs that participate want to find students who will succeed and thrive on their campus and in classes, programs, scholarships, and special activities. Student Search Service is simply a way for eligible colleges and universities to reach prospective students to let them know about the opportunities they offer. For more information about Student Search Service, visit our site at studentsearchservice.org.
If at any time you change your mind and want to stop participating, please visit studentsearch.collegeboard.org/opt-out or contact us at SearchCustomerService@collegeboard.org or 866-825-8051. Please note that any participating eligible colleges, universities, scholarships, or other educational programs that have already received your name and other data may continue to send you information, but your information will not be included going forward from the time you elect to opt out.

Fee Waiver Benefits for Income-Eligible Students

Students who face financial barriers to taking the SAT can be given College Board fee waivers through schools and authorized community-based organizations to cover the cost of testing. College Board offers fee waivers to qualified, income-eligible students who want to take the SAT and SAT Subject Tests. They cover 100% of the registration fees for a single test date and unlimited score sends to colleges, universities, and scholarship programs. Each qualifying student can use up to two waivers for SAT administrations, with or without the essay, and up to two waivers for SAT Subject Test registrations for a maximum of six individual Subject Tests. SAT fee waivers also give first-time, domestic applicants CSS/Financial Aid PROFILE® fee waivers. Learn more about this at profileonline.collegeboard.org.

Also, seniors who use a fee waiver to take the SAT will automatically receive waived application fees at participating colleges and universities. You can learn about eligibility and the other benefits offered to help you in the college application process at sat.org/feewaivers.

Practice for the SAT

College Board has partnered with Khan Academy® to give you free, personalized practice you can access anytime, anywhere.

Don’t miss out on these practice tools:

- Personalized recommendations for practice on the skills you need to attend to most.
- Thousands of questions, reviewed and approved by the people who develop the SAT.
- Video lessons that explain problems step-by-step.
- Full-length practice tests.
- Practice tests in assistive technology-compatible (ATC) and MP3 audio formats for students who need them.

Make practice part of your routine—anyplace, anytime. Answer a question a day on the Daily Practice for the New SAT app and get immediate feedback. The free app makes it easy to:

- Answer an exclusive, official Reading, Writing and Language, or Math question.
- Reveal a hint if you’re stuck.
- Read answer explanations and learn from your mistakes.
- Keep at it—daily practice can only sharpen your skills.

We offer other free and affordable resources to help you do your best. See sat.org/practice.

Instant Practice Test Scoring with Scan and Score

Take an official SAT practice test on paper to simulate test day. Then take a picture of your answer sheet and get an instant score.

Here’s how Scan and Score works:

1. Download and print one of the SAT practice tests found at sat.org/practice. (Your counseling office may also have Official SAT Practice Tests available in booklet form.) Be sure to follow the instructions, and use the official answer sheet to bubble in your answers.

2. After you’ve finished the practice test, get instant feedback and question-by-question results from your phone. Just open the free app Daily Practice for the New SAT.

3. Keeping the app open, snap a picture of your answer sheet with your phone’s camera.

And there it is in seconds: your score. Scores are saved so you can track your progress.
On Test Day

Items to Bring for Testing

What to Bring

- Printed admission ticket, which is required for entry to the test center
- Acceptable photo ID (see sat.org/id for more information)
- Two No. 2 pencils with soft erasers
- An acceptable calculator for use on the Math Test – Calculator portion of the test (see Calculator Use on page 28)
- Earphones, only if you’re approved for assistive technology–compatible or MP3 audio accommodations and the school doesn’t provide earphones

Nice to Have

- A watch (without an audible alarm or communication/recording capabilities; smartwatches will be collected before testing)
- A bag or backpack (which must be stored away during testing)
- Snacks and drinks (which must be under your desk during testing)
- Extra batteries and backup calculator

What Not to Bring

Unless you have been approved to use a device or aid as an accommodation, you should not bring any prohibited devices or aids into the testing room. Prohibited devices and aids include, but aren’t limited to:

- Cell phones, smartphones, or wearable technology (phones and wearable technology will be collected before the test and returned before dismissal)
- Audio players/recorders
- Tablets, laptops, notebooks, Bluetooth, or any other personal computing devices
- Separate timers of any type
- Cameras or any other photographic equipment
- Smartwatches and any other devices that can be used to record, transmit, receive, or play back audio, photographic, text, or video content
- Highlighters, colored pens/pencils, or mechanical pencils
- Dictionaries or other books
- Compasses, rulers, protractors, or cutting devices
- Pamphlets or papers of any kind, including notes and scratch paper
- Earplugs

IMPORTANT: Epinephrine auto-injectors (e.g., EpiPens) are permitted in the testing room without the need for accommodations. They must be placed in a clear bag and stored under your desk during testing. (For other medical devices, you may need to request an accommodation.)

Test Security and Fairness Policies

College Board’s Test Security and Fairness policies are designed to give every student a fair and equitable opportunity to demonstrate their skills and knowledge. They’re also designed to prevent anyone from gaining an unfair advantage on College Board tests. When you take the SAT, you acknowledge that you have read, understand, and will comply with our Test Security and Fairness policies as detailed here.

- You must present acceptable photo ID for admission to the test center.
- Allowing someone to impersonate you to take a College Board test, or engaging in impersonation to take a test for someone else, is strictly prohibited.
- Creating a disturbance or failing to follow instructions given by testing staff is prohibited.
- Sharing test questions or answers is prohibited at any time unless test content is released as part of a College Board service (such as the Question-and-Answer Service).
- Using phones and certain other electronic devices is prohibited in SAT test centers. Staff at your test center may collect devices such as cell phones and smartwatches before testing begins. If you are observed with such a device after collection occurs, you will be dismissed from testing and your scores will be canceled.
- You are prohibited from accessing secured test materials at any time before or after the test.
- If you exit the building before testing ends, your scores will be canceled.
- While you’re taking the test, do not allow anyone to see the test questions or your answers.
- The timing of each test section is strictly scheduled. You cannot skip ahead or go back to a previous test or test section in the test book or answer sheet while taking the SAT or SAT Subject Tests.
- If your essay is not your original and individual work, your entire test score may be canceled.
Phones and Electronic Devices Policy

Devices that can be used to document or communicate test content or answers are not allowed in the test center. You may not bring electronics of any kind with you on test day (an exception may apply for medically required devices). If, however, you forget to leave a device at home, you’ll be instructed to turn off all electronic devices and give cell phones and wearable technology to the staff in your testing room before the test begins. Be sure to turn off your phone and/or watch alarm, if you have one or both.

If your device makes noise while in your possession or you are seen with it at any time, including during breaks, you will be dismissed immediately, your scores will be canceled, and the device may be kept and its contents inspected. College Board and your test center are not responsible for loss of or damage to personal items, including electronic devices, while you’re in the test center.

College Board regularly bolsters its security efforts in order to protect the integrity of the test and ensure a fair SAT administration. From time to time, College Board, Educational Testing Service (ETS), and its testing staff may employ enhanced security measures, such as the use of metal detecting wands to detect mobile phones and other electronic devices. Test takers should be prepared to undergo these security measures to ensure a fair testing environment.

The test administration staff are authorized to collect and hold phones and other prohibited electronic devices during the test administration, including break periods, or to deny admission to anyone in possession of a prohibited electronic device.

Taking the Test

Testing Guidelines

- Plan ahead and bring equipment that’s in good working order. Testing staff will not have extra batteries or calculators.
- When marking answers:
  - Use a No. 2 pencil with a soft eraser on all parts of the answer sheet. Do not use a pen or mechanical pencil.
  - Make sure you fill in the entire bubble darkly and completely.
  - Erase any changes you make as completely as possible.

Who Can Take the SAT

You may take the SAT on any of 4–7 weekend administrations if you’re taking the test for its intended purposes, including:

- Applying to a college or university undergraduate program.
- Applying for scholarships, financial aid, or other programs that require a college admission test as part of their application process.

If we have reason to believe you’re not taking the SAT for its intended purposes, you may be transferred to an administration where the SAT form is disclosed after the test. In addition, College Board reserves the right to investigate and cancel the SAT registration and/or scores of anyone suspected of attempting to steal and/or share test content.
On the SAT, there's no penalty for guessing; you simply earn points for the questions you answer correctly. Try to give your best answer to every question—there's no advantage to leaving them blank.

Use a watch to time yourself—no separate timers or alarms are allowed, as they distract other test takers. Choose a watch that doesn’t have advanced communication or recording features (these are not allowed).

Don’t skip sections, and don’t leave your answer sheet blank. Doing this could result in score cancellation and/or delays.

If you are taking the SAT with Essay, and you decide not to write the essay, your official score report will include an SAT Essay score of zero. Also, if you leave the room before testing ends, your scores will be canceled.

Store any snacks or drinks you bring out of sight in your backpack or a paper bag under your desk. You may only eat snacks during breaks. The testing staff will tell you where you can go to have your snack.

Keep your ID and admission ticket with you at all times, especially if you leave the testing room. You may be asked to show your ID or admission ticket at any time while in the test center. Don’t write on the admission ticket.

**Calculator Rules**

You can only use certain kinds of calculators, as explained in the Math Test portion of this guide. Here are the other rules to bear in mind:

- You can’t share your calculator.
- If you use your calculator to share or exchange information during the test, or to remove test questions or answers from the test room, you’ll be dismissed and your scores canceled.
- If you’re using a calculator with a large (characters one inch high or more) or raised display that might be visible to other test takers, the proctor may move you to another seat.

**Adding or Dropping the SAT Essay**

When you register for the SAT, you should consider carefully whether to choose the optional SAT Essay or not. It’s a good idea to check the policies of the institutions you’re interested in at [sat.org/register](http://sat.org/register) (select College SAT Essay Policies) to see if they require it for admission.
We only share student information for educational purposes (or under court order) as follows:

- We share scores with you, your school, and, if applicable, your district and/or state to help measure educational progress and support a student’s path to college. (Homeschooled students’ scores won’t be shared with the school that administers the test.)
- If students request it, we use information to send customized college planning information.
- We use student information to provide SAT college application fee waivers for income-eligible students.
- We share a limited amount of personal data with our partners for test administration support, customer support, and to support scoring and reporting activities.
- On our website, we use student information to customize and personalize the content users see, such as important reminders about SAT test dates and college-planning milestones.
- We share de-identified student information with researchers so they can study it for College Board programs and services that help solve education issues.
- If there’s an investigation involving validity of a student's test scores, a photo of the student may be sent to institutions that received the scores. Any college granted access to the photo must certify that it has admitted the student.
- Students’ use of Khan Academy practice resources will be governed by the Terms and Conditions on the Khan Academy website.

You’re required to provide certain information, such as your name, your high school name and school code, and other personal information during the registration process. College Board maintains records of the personal information and photo that you provided at the time of registration for each test date, which are used for the photo admission ticket required for test center entry. You may also choose to disclose other personal information for scholarship purposes, Student Search Service, score reporting to institutions other than your high school, and when receiving communications from College Board.

See more Privacy Policies later in this guide.

Telemarketing Scams

We sometimes get reports of phone scams when callers posing as employees of College Board try to sell test preparation products or request sensitive, personally identifying information, such as credit card and Social Security numbers. College Board does not make unsolicited phone calls or send emails to students or families requesting this type of information. This type of activity, known as telemarketing fraud, is a crime.
After Test Day

Test Fairness Review
All new SAT test questions and complete new editions of the tests are reviewed by external, independent educators from throughout the United States. These reviews help ensure that the questions are unambiguous and relevant and that the language used is not offensive to or inappropriate for any particular group of students based on race/ethnicity or gender. Assessment staff ensure that the test as a whole includes references to men and women as well as to individuals from varied racial, ethnic, and cultural backgrounds. Statistical procedures are used to identify questions that are harder for a group of students to answer correctly than would be expected from their performance on other questions in the test; these questions are excluded from appearing on tests.

Test Question Inquiries
If you find what you consider to be an error or an ambiguity in a test question, tell the test coordinator immediately after the test. You may also write to:

Assessment Design and Development
College Board
250 Vesey Street
New York, NY 10281

Or send an email to satquestion@collegeboard.org.

In your inquiry, provide your name and mailing address, the date you took the SAT, the name and address of the school where you took the test, the test section, the test question (as well as you can remember), and an explanation of your concern about the question.

The SAT Program will send you a written response after your inquiry has been reviewed thoroughly by subject-matter specialists.

IMPORTANT: We will not respond via email, so be sure to include your full name and mailing address.

Useful Resources
We offer resources to help you find the best college and career for you, including:

BigFuture—Our website helps you plan for college and find the college that’s best for you. Visit bigfuture.collegeboard.org.

Roadmap to Careers—Want to see how your interests can connect to careers in your future? Try this great online experience powered by our partnership with Roadtrip Nation. Visit collegeboard.roadtripnation.com.

IMPORTANT: Don’t forget the Free Application for Federal Student Aid (FAFSA)—the form you’ll need to qualify for most financial aid opportunities—can be filed beginning October 1. You should complete your FAFSA as early as possible.
Evidence-Based Reading and Writing

The Evidence-Based Reading and Writing section is composed of two tests that assess different but related skills and knowledge. The Reading Test gives you a chance to show how well you understand what you read. The Writing and Language Test asks you to revise and edit text.

Reading Test Overview

- Total questions: 52 passage-based reading questions with multiple-choice responses.
- Time allotted: 65 minutes.
- Calculators may not be used or be on your desk.
- The questions often include references to direct you to relevant part(s) of the passage(s).

What the Reading Test Is Like

When you take the Reading Test, you’ll read passages and interpret informational graphics. Then you’ll use what you’ve read to answer questions. Some questions ask you to locate a piece of information or an idea stated directly. But you’ll also need to understand what the author’s words or a graphic’s data imply.

What You’ll Read

To succeed in college and career, you’ll need to apply reading skills in all sorts of subjects. You’ll also need those skills to do well on the Reading Test.

Reading Test passages range in length from about 500 to 750 words and vary in complexity. The Reading Test includes:

- One passage from a classic or contemporary work of U.S. or world literature.
- One passage or a pair of passages from either a U.S. founding document (such as an essay by James Madison) or a text in the Great Global Conversation (such as a speech by Nelson Mandela).
- One passage on a social science topic from a field such as economics, psychology, or sociology.
- Two science passages (or one passage and one passage pair) that examine foundational concepts or recent developments in Earth science, biology, chemistry, or physics.
- Two passages accompanied by one or more informational graphics.

What the Reading Test Measures

The Reading Test measures skills and knowledge you’ll need to apply when reading in college and workforce training programs. The test will ask you to find and interpret information and ideas, analyze how texts are put together and why they’re written the way they are, work with data from informational graphics, and make connections between paired passages.

You’ll be asked questions that require you to draw on the reading skills and knowledge needed most to succeed in the subjects the passages are drawn from. For instance, you might read about an experiment and then see questions that ask you to examine hypotheses, interpret data, or consider implications.

Answers are based only on the content stated in or implied by the passages and in any supplementary material, such as tables and graphs.

Command of Evidence

Some questions ask you to:

- Find evidence in a passage (or pair of passages) that best supports the answer to a previous question or serves as the basis for a reasonable conclusion.
- Identify how authors use (or fail to use) evidence to support their claims.
- Locate or interpret data in an informational graphic, or understand a relationship between a graphic and the passage it’s paired with.

Words in Context

Some questions focus on important, widely used words and phrases that you’ll find in texts in many different subjects. The words and phrases are ones that you’ll use in college and the workplace long after test day.

The Reading Test focuses on your ability to:

- Figure out the meaning of words or phrases in context.
- Decide how an author’s word choice shapes meaning, style, and tone.

Analysis in History/Social Studies and in Science

You’ll be asked to read and analyze passages about topics in history/social studies and science.
**Tips for the Reading Test**

To answer each question, consider what the passage or passages say directly, and use careful reasoning to draw supportable inferences and conclusions from the passage(s). The best answer to each question is derived from what is stated or implied in the passage(s) rather than from prior knowledge of the topics covered. All of the questions are passage based.

- Reading carefully is the key to finding the best answer to each question. The information you need to answer each Reading Test question is always in the passage(s). Don’t be misled by an answer that looks correct but isn’t supported by the actual text of the passage(s).

- The questions don’t increase in difficulty from easy to hard. Instead, they are presented as logically as possible, with general questions about central ideas and themes, point of view, overall text structure, and the like coming early in the sequence. After that come more specific questions about such matters as facts, details, and words in context.

- Stay with a passage until you have answered as many questions as you can before you proceed to the next passage. Don’t jump from passage to passage.

- The questions often include references to help direct you to relevant part(s) of the passage(s). You may have to look elsewhere in the passage, however, in order to find the best answer to the question.

- In your test booklet, mark each question you skip so that you can easily go back to it later if you have time.

- Remember that all questions are worth one point regardless of the type or difficulty. You don’t lose points for guessing wrong, so you should try to answer each question as best you can.

**Sample Reading Test Materials**

Following are samples of the kinds of passages and questions that may appear on the Reading Test. For each set of sample materials:

- Read the passage(s) and any supplementary material carefully.

- Decide on the best answer to each question.

- Read the explanation for the best answer to each question and for the answer you chose (if the two are different).

On the actual test, each passage will be followed by 10 or 11 questions. The directions that follow match the directions on the actual test.
Reading Test Questions

Directions

Each passage or pair of passages below is followed by a number of questions. After reading each passage or pair, choose the best answer to each question based on what is stated or implied in the passage or passages and in any accompanying graphics (such as a table or graph).

Questions 1-3 are based on the following passages.

Passage 1

In 1894, British psychologist C. Lloyd Morgan published what's called Morgan's canon, the principle that suggestions of humanlike mental processes behind an animal's behavior should be rejected if a simpler explanation will do.

Still, people seem to maintain certain expectations, especially when it comes to birds and mammals. "We somehow want to prove they are as 'smart' as people," zoologist Sara Shettleworth says. We want a bird that masters a vexing problem to be employing human-style insight.

New Caledonian crows face the high end of these expectations, as possibly the second-best toolmakers on the planet. Their tools are hooked sticks or strips made from spike-eyed leaves, and they use them in the wild to winkle grubs out of crevices. Researcher Russell Gray first saw the process on a cold morning in a mountain forest in New Caledonia, an island chain east of Australia. Over the course of days, he and crow researcher Gavin Hunt had gotten wild crows used to finding meat tidbits in holes in a log. Once the birds were checking the log reliably, the researchers placed a spiky tropical pandanus plant beside the log and hid behind a blind.

A crow arrived. It hopped onto the pandanus plant, grabbed the spiked edge of one of the long straplike leaves and began a series of ripping motions. Instead of just tearing away one long strip, the bird ripped and nipped in a sequence to create a slanting stair-step edge on a leaf segment with a narrow point and a wide base. The process took only seconds. Then the bird dipped the narrow end of its leaf strip into a hole in the log, fished up the meat with the leaf-edge spikes, swallowed its prize and flew off.

"That was my 'oh wow' moment," Gray says. After the crow had vanished, he picked up the tool the bird had left behind. "I had a go, and I couldn't do it," he recalls. Fishing the meat out was tricky. It turned out that Gray was moving the leaf shard too forcefully instead of gently stroking the spines against the treat.

The crow's deft physical manipulation was what inspired Gray and Auckland colleague Alex Taylor to test other wild crows to see if they employed the seemingly insightful string-pulling solutions that some ravens, kea parrots and other brainiac birds are known to employ. Three of four crows passed that test on the first try.

Passage 2

For one month after they left the nest, I led my four young ravens at least once and sometimes several times a day on thirty-minute walks. During these walks, I wrote down everything in their environment they pecked at. In the first sessions, I tried to be teacher. I touched specific objects—sticks, moss, rocks—and nothing that I touched remained untouched by them.

They came to investigate what I had investigated, leading me to assume that young birds are aided in learning to identify food from the parents' example. They also, however, contacted almost everything else that lay directly in their own paths. They soon became more independent by taking their own routes near mine. Even while walking along on their own, they pulled at leaves, grass stems, flowers, bark, pine needles, seeds, cones, clods of earth, and other objects they encountered. I wrote all this down, converting it to numbers. After they were thoroughly familiar with the background objects in these woods and started to ignore them, I seeded the path we would later walk together with objects they had never before encountered. Some of these were conspicuous food items: raspberries, dead meal worm beetles, and cooked corn kernels. Others were conspicuous and inedible: pebbles, glass chips, red winterberries. Still others were such highly cryptic foods as encased caddisfly larvae and moth cocoons. The results were dramatic.

The four young birds on our daily walks contacted all new objects preferentially. They picked them out at a rate of up to tens of thousands of times greater than background or previously contacted objects. The main initial criterion for pecking or picking anything up was its novelty. In subsequent trials, when the previously novel items were edible, they became preferred and the inedible objects became "background" items, just like the leaves, grass, and pebbles, even if they were highly conspicuous. These experiments showed that ravens' curiosity ensures exposure to all or almost all items in the environment.
Within Passage 1, the main purpose of the first two paragraphs (lines 1-11) is to
A) offer historical background in order to question the uniqueness of two researchers’ findings.
B) offer interpretive context in order to frame the discussion of an experiment and its results.
C) introduce a scientific principle in order to show how an experiment’s outcomes validated that principle.
D) present seemingly contradictory stances in order to show how they can be reconciled empirically.

**Estimated Difficulty:** Hard  |  **Key:** B

**Choice B** is the best answer. Passage 1 opens with an explanation of Morgan’s canon and continues with a discussion of people’s expectations regarding animal intelligence. Taken together, the first two paragraphs indicate that despite cautions to the contrary, people still tend to look for humanlike levels of intelligence in many animals, including birds. These two paragraphs provide a framework in which to assess the work of Gray and Hunt, presented in the rest of the passage. The passage’s characterization of the experiment Gray and Hunt conduct, in which they observe a crow’s tool-making ability and to which Gray responds by trying and failing to mimic the bird’s behavior (“I had a go, and I couldn’t do it,” line 37), suggests that Shettleworth, quoted in the second paragraph, is at least partially correct in her assessment that “we somehow want to prove [birds] are as ‘smart’ as people” (lines 8-9).

**Choice A** is incorrect because while the reference to Morgan’s canon in the first paragraph offers a sort of historical background (given that the canon was published in 1894), the second paragraph describes people’s continuing expectations regarding animal intelligence. Furthermore, the fact that Gray and Hunt may share with other people the tendency to look for humanlike intelligence in many animals does not by itself establish that the main purpose of the first two paragraphs is to question the uniqueness of Gray and Hunt’s findings.

**Choice C** is incorrect because while the reference to Morgan’s canon in the first paragraph offers a sort of historical background (given that the canon was published in 1894), the second paragraph describes people’s continuing expectations regarding animal intelligence. Furthermore, the fact that Gray and Hunt may share with other people the tendency to look for humanlike intelligence in many animals does not by itself establish that the main purpose of the first two paragraphs is to question the uniqueness of Gray and Hunt’s findings.

**Choice D** is incorrect because although the first two paragraphs do present different perspectives, they are not seemingly or genuinely contradictory. The second paragraph, particularly the quotation from Shettleworth, serves mainly to qualify (not contradict) the position staked out in the first paragraph by suggesting that while Morgan’s canon is probably a sound principle, people still tend to project humanlike levels of intelligence onto many animals. Moreover, the experiment depicted in the rest of the passage primarily bears out Shettleworth’s claim that “we somehow want to prove [birds] are as ‘smart’ as people” (lines 8-9) and thus does not reconcile the perspectives found in the opening paragraphs.

According to the experiment described in Passage 2, whether the author’s ravens continued to show interest in a formerly new object was dictated primarily by whether that object was
A) edible.
B) plentiful.
C) conspicuous.
D) natural.

**Estimated Difficulty:** Easy  |  **Key:** A

**Choice A** is the best answer. The last paragraph of Passage 2 presents the results of an experiment in which the author scattered unfamiliar objects in the path of some ravens. According to the passage, the birds initially “contacted all new objects preferentially” but in “subsequent trials” only preferred those “previously novel items” that “were edible” (lines 75-81).

**Choice B** is incorrect because the ravens studied by the author only preferred those “previously novel items” that “were edible,” whereas “the inedible objects became ‘background’ items, just like the leaves, grass, and pebbles” (lines 80-83). In other words, plentiful items did not continue to interest the ravens unless the items were edible.

**Choice C** is incorrect because the ravens studied by the author only preferred those “previously novel items” that “were edible,” whereas “the inedible objects became ‘background’ items, just like the leaves, grass, and pebbles, even if they were highly conspicuous” (lines 80-84). In other words, conspicuous items did not continue to interest the ravens unless the items were edible.

**Choice D** is incorrect because the ravens studied by the author only preferred those “previously novel items”
The crows in Passage 1 and the ravens in Passage 2 shared which trait?

A) They modified their behavior in response to changes in their environment.
B) They formed a strong bond with the humans who were observing them.
C) They manufactured useful tools for finding and accessing food.
D) They mimicked the actions they saw performed around them.

**Estimated Difficulty: Medium**

**Key: A**

**Choice A** is the best answer. Both bird species studied modified their behavior in response to changes in their environment. The researchers described in Passage 1 “had gotten wild crows used to finding meat tidbits in holes in a log” (lines 20-21). In other words, the researchers had repeatedly placed meat in the log—that is, changed the crows’ environment—and the birds had responded by modifying their behavior, a point reinforced in line 22, which noted that the birds began “checking the log reliably.” The ravens in Passage 2 act in analogous fashion, responding to the introduction of new objects in their environment by “pick[ing] them out at a rate of up to tens of thousands of times greater than background or previously contacted objects” (lines 76-78).

**Choice B** is incorrect because while there is some evidence that the ravens described in Passage 2 formed a bond with the author, going on walks with the author and possibly viewing him as their “teacher,” there is no evidence that the crows in Passage 1 did any mimicking. Passage 1, in fact, suggests that the ability of the crow to produce the meat-fishing tool was innate rather than a skill it had acquired from either humans or other birds.

**Questions 4-6 are based on the following passage and supplementary material.**

This passage is adapted from Richard Florida, *The Great Reset.* ©2010 by Richard Florida.

In today’s idea-driven economy, the cost of time is what really matters. With the constant pressure to innovate, it makes little sense to waste countless collective hours commuting. So, the most efficient and productive regions are those in which people are thinking and working—not sitting in traffic.

The auto-dependent transportation system has reached its limit in most major cities and megaregions. Commuting by car is among the least efficient of all our activities—not to mention among the least enjoyable, according to detailed research by the Nobel Prize–winning economist Daniel Kahneman and his colleagues. Though one might think that the economic crisis beginning in 2007 would have reduced traffic (high unemployment means fewer workers traveling to and from work), the opposite has been true. Average commutes have lengthened, and congestion has gotten worse, if anything. The average commute rose in 2008 to 25.5 minutes, “erasing years of decreases to stand at the level of 2000, as people had to leave home earlier in the morning to pick up friends for their ride to work or to catch a bus or subway train,” according to the U.S. Census Bureau, which collects the figures. And those are average figures. Commutes are far longer in the big West Coast cities of Los Angeles and San Francisco and the East Coast cities of New York, Philadelphia, Baltimore, and Washington, D.C. In many of these cities, gridlock has become the norm, not just at rush hour but all day, every day.

The costs are astounding. In Los Angeles, congestion eats up more than 485 million working hours a year; that’s seventy hours, or nearly two weeks, of full-time work per commuter. In D.C., the time cost of congestion is sixty-two hours per worker per year. In New York it’s forty-four hours. Average it out, and the time cost across America’s thirteen biggest city-regions is fifty-one hours per worker per year. Across the country, commuting wastes 4.2 billion hours of work time annually—nearly a full workweek for every commuter. The overall cost to the U.S. economy is nearly $90 billion when lost...
productivity and wasted fuel are taken into account. At the Martin Prosperity Institute, we calculate that every minute shaved off America’s commuting time is worth $19.5 billion in value added to the economy. The numbers add up fast: five minutes is worth $97.7 billion; ten minutes, $195 billion; fifteen minutes, $292 billion.

It’s ironic that so many people still believe the main remedy for traffic congestion is to build more roads and highways, which of course only makes the problem worse. New roads generate higher levels of “induced traffic,” that is, new roads just invite drivers to drive more and lure people who take mass transit back to their cars. Eventually, we end up with more clogged roads rather than a long-term improvement in traffic flow.

The coming decades will likely see more intense clustering of jobs, innovation, and productivity in a smaller number of bigger cities and city-regions. Some regions could end up bloated beyond the capacity of their infrastructure, while others struggle, their promise stymied by inadequate human or other resources.

The passage most strongly suggests that researchers at the Martin Prosperity Institute share which assumption?

A) Employees who work from home are more valuable to their employers than employees who commute.
B) Employees whose commutes are shortened will use the time saved to do additional productive work for their employers.
C) Employees can conduct business activities, such as composing memos or joining conference calls, while commuting.
D) Employees who have lengthy commutes tend to make more money than employees who have shorter commutes.

As used in line 55, “intense” most nearly means
A) emotional.
B) concentrated.
C) brilliant.
D) determined.

Choice B is the best answer because details in the third paragraph (lines 30-46) strongly suggest that researchers (“we”) at the Martin Prosperity Institute assume that shorter commutes will lead to more productive time for workers. The author notes that “across the country, commuting wastes 4.2 billion hours of work time annually” and that “the overall cost to the U.S. economy is nearly $90 billion when lost productivity and wasted fuel are taken into account” (lines 37-41). Given also that those at the institute “calculate that every minute shaved off America’s commuting time is worth $19.5 billion in value added to the economy” (lines 42-44), it can reasonably be concluded that some of that added value is from heightened worker productivity.

Choice A is incorrect because there is no evidence in the passage that researchers at the Martin Prosperity Institute assume that employees who work from home are more valuable to their employers than employees who commute. Although the passage does criticize long commutes, it does not propose working from home as a solution.

Choice C is incorrect because there is no evidence in the passage that researchers at the Martin Prosperity Institute assume that employees can conduct business activities, such as composing memos or joining conference calls, while commuting. The passage does discuss commuting in some detail, but it does not mention activities that commuters can or should be undertaking while commuting, and it generally portrays commuting time as lost or wasted time.

Choice D is incorrect because there is no evidence in the passage that researchers at the Martin Prosperity Institute assume that employees who have lengthy commutes tend to make more money than employees who have shorter commutes. The passage does not draw any clear links between the amount of money employees make and the commutes they have.

Estimated Difficulty: Medium

Choice B

Choice B is the best answer because the context makes clear that the clustering of jobs, innovation,
and productivity will be more concentrated in, or more densely packed into, “a smaller number of bigger cities and city-regions” (lines 56-57).

Choice A is incorrect because although “intense” sometimes means “emotional,” it would make no sense in context to say that the clustering of jobs, innovation, and productivity will be more emotional in “a smaller number of bigger cities and city-regions” (lines 56-57).

Choice C is incorrect because although “intense” sometimes means “brilliant,” it would make no sense in context to say that the clustering of jobs, innovation, and productivity will be more brilliant in “a smaller number of bigger cities and city-regions” (lines 56-57).

Choice D is incorrect because although “intense” sometimes means “determined,” it would make no sense in context to say that the clustering of jobs, innovation, and productivity will be more determined in “a smaller number of bigger cities and city-regions” (lines 56-57).

Which claim about traffic congestion is supported by the graph?

A) New York City commuters spend less time annually delayed by traffic congestion than the average for very large cities.
B) Los Angeles commuters are delayed more hours annually by traffic congestion than are commuters in Washington, D.C.
C) Commuters in Washington, D.C., face greater delays annually due to traffic congestion than do commuters in New York City.
D) Commuters in Detroit spend more time delayed annually by traffic congestion than do commuters in Houston, Atlanta, and Chicago.

Estimated Difficulty: Easy  Key: C

Choice C is the best answer. Higher bars on the graph represent longer annual commute delays than do lower bars; moreover, the number of hours of annual commute delay generally decreases as one moves from left to right on the graph. The bar for Washington, D.C., is higher than and to the left of that for New York City, meaning that D.C. automobile commuters experience greater amounts of delay each year.

Choice A is incorrect because the graph’s bar for New York City is higher than and to the left of that for the average for very large cities, meaning that New York City automobile commuters experience greater, not lesser, amounts of delay each year.

Choice B is incorrect because the graph’s bar for Los Angeles is lower than and to the right of that for Washington, D.C., meaning that Los Angeles automobile commuters experience lesser, not greater, amounts of delay each year.

Choice D is incorrect because the graph’s bar for Detroit is lower than and to the right of those for Houston, Atlanta, and Chicago, meaning that Detroit automobile commuters experience lesser, not greater, amounts of delay each year.

Questions 7-9 are based on the following passage.

This passage is adapted from a speech delivered by Congresswoman Barbara Jordan of Texas on July 25, 1974, as a member of the Judiciary Committee of the United States House of Representatives. In the passage, Jordan discusses how and when a United States president may be impeached, or charged with serious offenses, while in office. Jordan’s speech was delivered in the context of impeachment hearings against then president Richard M. Nixon.

Today, I am an inquisitor. An hyperbole would not be fictional and would not overstate the solemnness that I feel right now. My faith in the Constitution is whole; it is complete; it is total. And I am not going to sit here and be an idle spectator to the diminution, the subversion, the destruction, of the Constitution.

“Who can so properly be the inquisitors for the nation as the representatives of the nation themselves?” “The subjects of its jurisdiction are those offenses which proceed from the misconduct of public men.”* And that’s what we’re talking about. In other words, [the jurisdiction comes] from the abuse or violation of some public trust.

It is wrong, I suggest, it is a misreading of the Constitution for any member here to assert that for a member to vote for an article of impeachment means that that member must be convinced that the President should be removed from office. The Constitution doesn’t say that. The powers relating to impeachment are an essential check in the hands of the body of the legislature against and upon the encroachments of the executive. The division between the two branches of the legislature, the House and the Senate, assigning to the one the right to accuse and to the other the right to judge—the framers of this Constitution were very astute. They did not make the accusers and the judges . . . the same person.

We know the nature of impeachment. We’ve been talking about it a while now. It is chiefly designed for the President and his high ministers to somehow be called into account. It is designed to “bridle” the executive if he engages in excesses. “It is designed as a method of national inquest into the conduct of public men.”* The framers confided in the Congress the power, if need be, to remove the President in order to strike a delicate
balance between a President swollen with power and
grown tyrannical, and preservation of the independence
of the executive.

The nature of impeachment: a narrowly channeled
exception to the separation of powers maxim. The Federal
Convention of 1787 said that. It limited impeachment to
high crimes and misdemeanors, and discounted and
opposed the term “maladministration.” “It is to be used
only for great misdemeanors,” so it was said in the North
Carolina ratification convention. And in the Virginia
ratification convention: “We do not trust our liberty to
a particular branch. We need one branch to check the
other.”

... The North Carolina ratification convention: “No
one need be afraid that officers who commit oppression
will pass with immunity.” “Prosecutions of impeachments
will seldom fail to agitate the passions of the whole
community,” said Hamilton in the Federalist Papers,
number 65. “We divide into parties more or less friendly
or inimical to the accused.”* I do not mean political
parties in that sense.

55 The drawing of political lines goes to the motivation
behind impeachment; but impeachment must proceed
within the confines of the constitutional term “high
crime[s] and misdemeanors.” Of the impeachment
process, it was Woodrow Wilson who said that “Nothing
short of the grossest offenses against the plain law of the
land will suffice to give them speed and effectiveness.
Indignation so great as to overgrow party interest may
secure a conviction; but nothing else can.”

Common sense would be revolted if we engaged
upon this process for petty reasons. Congress has a lot
to do: appropriations, tax reform, health insurance,
campaign finance reform, housing, environmental
protection, energy sufficiency, mass transportation.
Pettiness cannot be allowed to stand in the face of such
overwhelming problems. So today we’re not being petty.
We’re trying to be big, because the task we have before us
is a big one.

* Jordan quotes from Federalist No. 65, an essay by Alexander
Hamilton, published in 1788, on the powers of the United States
Senate, including the power to decide cases of impeachment
against a president of the United States.

7

The stance Jordan takes in the passage is best
described as that of

A) an idealist setting forth principles.
B) an advocate seeking a compromise position.
C) an observer striving for neutrality.
D) a scholar researching a historical controversy.

Choice A is the best answer. Jordan helps establish
her idealism by declaring that she is an “inquisitor”
(line 1) and that her “faith in the Constitution is
whole; it is complete; it is total” (lines 3-4). At
numerous points in the passage, Jordan sets forth
principles (e.g., “The powers relating to impeachment
are an essential check in the hands of the body of the
legislature against and upon the encroachments of
the executive,” in lines 18-20) and makes reference to
important documents that do the same, including the
U.S. Constitution and Federalist No. 65.

Choice B is incorrect because although Jordan is
advocating a position, there is no evidence in the
passage that she is seeking a compromise position.
Indeed, she notes that she is “not going to sit here and
be an idle spectator to the diminution, the subversion,
the destruction, of the Constitution” (lines 4-6),
indicating that she is not seeking compromise.

Choice C is incorrect because Jordan is a participant
(“an inquisitor,” line 1) in the proceedings, not a mere
observer. Indeed, she notes that she is “not going to
sit here and be an idle spectator to the diminution,
the subversion, the destruction of the Constitution”
(lines 4-6).

Choice D is incorrect because Jordan is identified as
a congresswoman and an “inquisitor” (line 1), not
a scholar, and because she is primarily discussing
events happening at the moment, not researching
an unidentified historical controversy. Although she
refers to historical documents and individuals, her
main emphasis is on the (then) present impeachment
hearings.

8

In lines 49-54 (“Prosecutions ... sense”), what is
the most likely reason Jordan draws a distinction
between two types of “parties”?

A) To counter the suggestion that impeachment is or
should be about partisan politics
B) To disagree with Hamilton’s claim that
impeachment proceedings excite passions
C) To contend that Hamilton was too timid in his
support for the concept of impeachment
D) To argue that impeachment cases are decided
more on the basis of politics than on justice

Estimated Difficulty: Medium  Key: A

Choice A is the best answer. Jordan is making
a distinction between two types of “parties”: the
informal associations to which Alexander Hamilton
refers and formal, organized political parties such as
the modern-day Republican and Democratic parties. Jordan anticipates that listeners to her speech might misinterpret her use of Hamilton’s quotation as suggesting that she thinks impeachment is essentially a tool of organized political parties to achieve partisan ends, with one party attacking and another defending the president. Throughout the passage, and notably in the seventh paragraph (lines 55-63), Jordan makes clear that she thinks impeachment should be reserved only for the most serious of offenses—ones that should rankle people of any political affiliation.

Choice B is incorrect because Jordan offers no objection to Hamilton’s notion that impeachment proceedings excite passions. Indeed, she quotes Hamilton extensively in a way that indicates that she fundamentally agrees with his view on impeachment. Moreover, she acknowledges that her own speech is impassioned—that she feels a “solemnness” (line 2) and a willingness to indulge in “hyperbole” (line 1).

Choice C is incorrect because Jordan offers no objection to Hamilton’s level of support for the concept of impeachment. Indeed, she quotes Hamilton extensively in a way that indicates that she fundamentally agrees with his view on impeachment.

Choice D is incorrect because Jordan suggests that she and her fellow members of Congress are “trying to be big” (line 71), or high-minded, rather than decide the present case on the basis of politics. Indeed, throughout the last four paragraphs of the passage (lines 37-72), she elaborates on the principled, just basis on which impeachment should proceed. Moreover, throughout the passage, Jordan is focused on the present impeachment hearings, not on the justice or injustice of impeachments generally.

Which choice provides the best evidence for the answer to the previous question?

A) Lines 13-17 (“It . . . office”)
B) Lines 20-24 (“The division . . . astute”)
C) Lines 55-58 (“The drawing . . . misdemeanors”)
D) Lines 65-68 (“Congress . . . transportation”)

Estimated Difficulty: Hard

Choice C is the best answer because in lines 55-58, Jordan draws a contrast between political motivations and “high crime[s] and misdemeanors” as the basis for impeachment and argues that impeachment “must proceed within the confines” of the latter concept. These lines thus serve as the best evidence for the answer to the previous question.

Choice A is incorrect because lines 13-17 only address a misconception that Jordan contends some people have about what a vote for impeachment means. Therefore, these lines do not serve as the best evidence for the answer to the previous question.

Choice B is incorrect because lines 20-24 only speak to a division of responsibility between the two houses of the U.S. Congress. Therefore, these lines do not serve as the best evidence for the answer to the previous question.

Choice D is incorrect because lines 65-68 serve mainly to indicate that the U.S. Congress has an extensive and important agenda. Therefore, these lines do not serve as the best evidence for the answer to the previous question.

Writing and Language Test Overview

The Writing and Language Test asks you to be an editor and improve passages that were written especially for the test—and that include deliberate errors.

- Total questions: 44 passage-based questions with multiple-choice responses.
- Time allotted: 35 minutes.
- Calculators may not be used or be on your desk.

What the Writing and Language Test Is Like

When you take the Writing and Language Test, you’ll do things that people do all the time when they edit: read, find mistakes and weaknesses, and fix them.

The good news: You do these things every time you revise your own schoolwork or workshop your writing with a friend.

To answer some questions, you’ll need to look closely at a single sentence. Others require thinking about the entire passage or interpreting a graphic. For instance, you might be asked to choose where a sentence should be placed or to correct a misinterpretation of a scientific table or graph.

What You’ll Read

Writing and Language passages range in length from about 400 to 450 words and vary in complexity. The passages you’ll read will be informative/explanatory texts, nonfiction narratives, or arguments and will cover topics in the areas of careers, history/social studies, the humanities, and science. One or more passages will be accompanied by one or more informational graphics.

You’ll want to read passages carefully so you can make decisions that improve them.
What the Writing and Language Test Measures
The Writing and Language Test measures the skills and knowledge you use to spot and fix problems in writing—the skills and knowledge you’ve been acquiring in high school and that you’ll need for success in college and career. All questions are multiple choice and based on passages and any supplementary material, such as tables and graphs.

Command of Evidence
Questions that test command of evidence ask you to improve the way passages develop information and ideas. For instance, you might choose an answer that sharpens an argumentative claim or adds a relevant supporting detail.

Words in Context
Some questions ask you to improve word choice. You’ll need to choose the best words to use based on the text surrounding them. Your goal will be to make a passage more precise or concise or to improve syntax, style, or tone.

Analysis in History/Social Studies and in Science
You’ll be asked to read and analyze passages about topics in history/social studies and in science and to make decisions that improve the passages (such as revising a paragraph to be more consistent with the data presented in an informational graphic).

Expression of Ideas
Some questions ask about a passage’s topic development, organization, and language use. For instance, you may be asked which words or structural changes improve how a point is made or which phrase or sentence provides the most effective transition between ideas.

Standard English Conventions
Some questions relate to aspects of the mechanics of writing: sentence structure, usage, and punctuation. You’ll be asked to edit text so that it conforms to the conventions of standard written English.

Tips for the Writing and Language Test
The test comprises a series of passages and associated multiple-choice questions that put you in the role of someone revising or editing the work of an unspecified writer. You are revising the passages for development, organization, and effective language use as well as editing the passages to ensure that they follow the conventions of standard written English grammar, usage, and punctuation.

- Rote recall of language rules isn’t tested, nor are any questions based on short snippets of text taken out of context. The best answer to each question represents how a writer should develop, organize, and use language in a multiparagraph passage. You are demonstrating that you can make context-based improvements to the text.
- The most common format for the questions offers three alternatives to an underlined portion of the passage along with the option of not changing the passage’s original wording. Remember to answer these questions in the context of the whole passage.
- Stay with a passage until you have answered as many questions as you can before you proceed to the next passage. Don’t jump from passage to passage.
- In your test booklet, mark each question you skip so that you can easily go back to it later if you have time.
- Remember that all questions are worth one point regardless of the type or difficulty. You don’t lose points for guessing wrong, so you should try to answer each question as best you can.

Sample Writing and Language Test Materials
Following are samples of the kinds of passages and questions that may appear on the Writing and Language Test. For each set of sample materials:

- Read the passage carefully.
- Decide on the best answer to each question.
- Read the explanation for the best answer to each question and for the answer you chose (if the two are different).

On the actual test, the passages and questions will be in side-by-side columns, with each passage (spread over multiple pages) in the left column and associated multiple-choice questions in the right column. The directions that follow match the directions on the actual test.
Writing and Language Test Questions

Directions

Each passage below is accompanied by a number of questions. For some questions, you will consider how the passage might be revised to improve the expression of ideas. For other questions, you will consider how the passage might be edited to correct errors in sentence structure, usage, or punctuation. A passage or a question may be accompanied by one or more graphics (such as a table or graph) that you will consider as you make revising and editing decisions.

Some questions will direct you to an underlined portion of a passage. Other questions will direct you to a location in a passage or ask you to think about the passage as a whole.

After reading each passage, choose the answer to each question that most effectively improves the quality of writing in the passage or that makes the passage conform to the conventions of standard written English. Many questions include a “NO CHANGE” option. Choose that option if you think the best choice is to leave the relevant portion of the passage as it is.

Questions 1-5 are based on the following passage.

Dong Kingman: Painter of Cities

A 1954 documentary about renowned watercolor painter Dong Kingman shows the artist sitting on a stool on Mott Street in New York City’s Chinatown. A crowd of admiring spectators watched as Kingman squeezes dollops of paint from several tubes into a tin watercolor box, from just a few primary colors, Kingman creates dozens of beautiful hues as he layers the translucent paint onto the paper on his easel. Each stroke of the brush and dab of the sponge transforms thinly sketched outlines into buildings, shop signs, and streetlamps. The street scene Kingman begins composing in this short film is very much in keeping with the urban landscapes for which he is best known.

Kingman was keenly interested in landscape painting from an early age. His interest was so keen, in fact, that he was named after it. In Hong Kong, where Kingman completed his schooling, teachers at that time customarily assigned students a formal “school name.” The young boy who had been Dong Moy Shu became Dong Kingman. The name Kingman was selected for its two parts, “king” and “man”; Cantonese for “scenery” and “composition.” As Kingman developed as a painter, his works were often compared to paintings by Chinese landscape artists dating back to CE 960, a time when a strong tradition of landscape painting emerged in Chinese art. Kingman, however, departed from that tradition in a number of ways, most notably in that he chose to focus not on natural landscapes, such as mountains and rivers, but on cities.

His fine brushwork conveys detailed street-level activity: a peanut vendor pushing his cart on the sidewalk, a pigeon pecking for crumbs around a fire hydrant, an old man tending to a baby outside a doorway. His broader brush strokes and sponge-painted shapes create majestic city skylines, with skyscrapers towering in the background, bridges connecting neighborhoods on either side of a river, and delicately painted creatures, such as a tiny, barely visible cat prowling in the bushes of a park. To art critics and fans alike, these city scenes represent the innovative spirit of twentieth-century urban Modernism.

During his career, Kingman exhibited his work internationally, garnering much acclaim. In 1936, a critic described one of Kingman’s solo exhibits as “twenty of the freshest, most satisfying watercolors that have been seen hereabouts in many a day.”
1  A) NO CHANGE  
B) had watched  
C) would watch  
D) watches  

**Estimated Difficulty:** Easy  
**Key:** D

**Choice D** is the best answer because the simple present tense verb “watches” is consistent with the tense of the verbs in the rest of the sentence and paragraph.

**Choice A** is incorrect because “watched” creates an inappropriate shift to the past tense.

**Choice B** is incorrect because “had watched” creates an inappropriate shift to the past perfect tense.

**Choice C** is incorrect because “would watch” creates an inappropriate shift that suggests a habitual or hypothetical aspect when other verbs in the sentence and paragraph indicate that a specific, actual instance is being narrated.

2  A) NO CHANGE  
B) box. From just a few primary colors,  
C) box from just a few primary colors,  
D) box, from just a few primary colors  

**Estimated Difficulty:** Medium  
**Key:** B

**Choice B** is the best answer because it provides punctuation that creates two grammatically complete and standard sentences.

**Choice A** is incorrect because it results in a comma splice as well as some confusion about what the prepositional phrase “from just a few primary colors” modifies.

**Choice C** is incorrect because it results in a run-on sentence as well as some confusion about what the prepositional phrase “from just a few primary colors” modifies.

**Choice D** is incorrect because it results in a comma splice.

3  A) NO CHANGE  
B) parts: “king” and “man,”  
C) parts “king” and “man”;  
D) parts; “king” and “man”  

**Estimated Difficulty:** Hard  
**Key:** B

**Choice B** is the best answer because the colon after “parts” effectively signals that what follows in the sentence further defines what the “two parts” of Kingman’s name are and because the comma after “man” properly indicates that “‘king’ and ‘man’” and “Cantonese for ‘scenery’ and ‘composition’” are nonrestrictive appositives.

**Choice A** is incorrect because the semicolon after “man” incorrectly joins an independent clause and a phrase. Moreover, the comma after “parts” is arguably a weak form of punctuation to be signaling the strong break in the sentence indicated here.

**Choice C** is incorrect because the semicolon after “man” incorrectly joins an independent clause and a phrase and because the absence of appropriate punctuation after “parts” fails to indicate that “two parts” and “‘king’ and ‘man’” are nonrestrictive appositives.

**Choice D** is incorrect because the semicolon after “parts” incorrectly joins an independent clause and two phrases and because the absence of appropriate punctuation after “man” fails to indicate that “‘king’ and ‘man’” and “Cantonese for ‘scenery’ and ‘composition’” are nonrestrictive appositives.

4  The writer wants to complete the sentence with a third example of a detail Kingman uses to create his majestic city skylines. Which choice best accomplishes this goal?

A) NO CHANGE  
B) exquisitely lettered street and storefront signs.  
C) other details that help define Kingman’s urban landscapes.  
D) enormous ships docking at busy urban ports.

**Estimated Difficulty:** Hard  
**Key:** D

**Choice D** is the best answer because the phrase “enormous ships docking at busy urban ports” effectively continues the sentence’s series of details (“skyscrapers towering in the background” and
“bridges connecting neighborhoods”) conveying the majesty of city skylines as depicted by Kingman.

Choice A is incorrect because the phrase “delicately painted creatures, such as a tiny, barely visible cat prowling in the bushes of a park” does not convey a sense of the majesty of city skylines as depicted by Kingman and thus does not effectively continue the sentence’s series of details (“skyscrapers towering in the background” and “bridges connecting neighborhoods”).

Choice B is incorrect because the phrase “exquisitely lettered street and storefront signs” does not convey a sense of the majesty of city skylines as depicted by Kingman and thus does not effectively continue the sentence’s series of details (“skyscrapers towering in the background” and “bridges connecting neighborhoods”).

Choice C is incorrect because the phrase “other details that help define Kingman’s urban landscapes” is too vague and general to constitute a third example that conveys a sense of the majesty of city skylines as depicted by Kingman and thus does not effectively continue the sentence’s series of details (“skyscrapers towering in the background” and “bridges connecting neighborhoods”).

Choice D is incorrect because it concludes the passage with a sentence that is too vague and general to emphasize effectively an enduring legacy of Kingman’s work. It is not clear what the idea of refreshing a long-lasting tradition is intended to mean or how (or even whether) this represents an enduring legacy. Moreover, referring to Kingman’s work as “but one example” downplays the significance of any potential legacy that might be suggested.

Questions 6-10 are based on the following passage and supplementary material.

A Life in Traffic

A subway system is expanded to provide service to a growing suburb. A bike-sharing program is adopted to encourage nonmotorized transportation. Stoplight timing is coordinated to alleviate rush hour traffic jams in a congested downtown area. When any one of these changes occur, it is likely the result of careful analysis conducted by transportation planners.

The work of transportation planners generally includes evaluating current transportation needs, assessing the effectiveness of existing facilities, and improving those facilities or designing new ones. Most transportation planners work in or near cities, but some are employed in rural areas. Say, for example, a large factory is built on the outskirts of a small town. Traffic to and from that location would increase at the beginning and end of work shifts. The transportation planner’s job might involve conducting a traffic count to determine the daily number of vehicles traveling...
on the road to the new factory. If analysis of the traffic count indicates that there is more traffic than the current road as it is designed at this time can efficiently accommodate, the transportation planner might recommend widening the road to add another lane.

Transportation planners work closely with a number of community stakeholders, such as government officials and other interested organizations and individuals. For instance, representatives from the local public health department might provide input in designing a network of trails and sidewalks to encourage people to walk more. According to the American Heart Association, walking provides numerous benefits related to health and well-being. Members of the Chamber of Commerce might share suggestions about designing transportation and parking facilities to support local businesses.

People who pursue careers in transportation planning have a wide variety of educational backgrounds. A two-year degree in transportation technology may be sufficient for some entry-level jobs in the field. Most jobs, however, require at least a bachelor’s degree; majors of transportation planners are varied, including fields such as urban studies, civil engineering, geography, or transportation and logistics management. For many positions in the field, a master’s degree is required.

Transportation planners perform critical work within the broader field of urban and regional planning. As of 2010, there were approximately 40,300 urban and regional planners employed in the United States. The United States Bureau of Labor Statistics forecasts steady job growth in this field, predicting that employment of urban and regional planners will increase 16 percent between 2010 and 2020. Population growth and concerns about environmental sustainability are expected to spur the need for transportation planning professionals.

**Evidence-Based Reading and Writing**  
**Writing and Language Test Questions**

A) NO CHANGE
B) occur, they are
C) occurs, they are
D) occurs, it is

Estimated Difficulty: Hard  
Key: D

Choice D is the best answer because it maintains agreement between the pronoun (“it”) and the antecedent (“any one”) and between the subject (“any one”) and the verb (“occurs”).

Choice A is incorrect because the plural verb “occur” does not agree with the singular subject “any one.”

Choice B is incorrect because the plural verb “occur” does not agree with the singular subject “any one” and because the plural pronoun “they” does not agree with the singular antecedent “any one.”

Choice C is incorrect because the plural pronoun “they” does not agree with the singular antecedent “any one.”

Which choice results in the most effective transition to the information that follows in the paragraph?

A) NO CHANGE
B) where job opportunities are more plentiful.
C) and the majority are employed by government agencies.
D) DELETE the underlined portion and end the sentence with a period.

Estimated Difficulty: Medium  
Key: A

Choice A is the best answer because it effectively signals the shift in the paragraph to the example of the work a transportation planner might perform if he or she were employed in a rural area and asked to consider the effects of a new factory built “on the outskirts of a small town.”
Choice B is incorrect because noting that job opportunities are more plentiful in cities does not effectively signal the shift in the paragraph to the example of the work a transportation planner might perform if he or she were employed in a rural area.

Choice C is incorrect because noting that most transportation planners work for government agencies does not effectively signal the shift in the paragraph to the example of the work a transportation planner might perform if he or she were employed in a rural area.

Choice D is incorrect because the proposed deletion would create a jarring shift from the statement “Most transportation planners work in or near cities” to the example of the work a transportation planner might perform if he or she were employed in a rural area.

Choice A is incorrect because the underlined sentence should not be kept. Although the sentence theoretically provides supporting evidence about the benefits of walking, the passage has not made a claim that needs to be supported in this way, and including such a statement only serves to interrupt the discussion of the community stakeholders with whom transportation planners work.

Choice B is incorrect because the underlined sentence should not be kept. Although the American Heart Association could theoretically be an example of “other interested organizations” that transportation planners work with, the sentence does not suggest this is the case. Instead, the association is merely the source for the general statement about the benefits of walking, a statement that only serves to interrupt the discussion of the actual community stakeholders with whom transportation planners work.

Choice D is incorrect because although the underlined sentence should be deleted, it is not because the sentence lacks specific examples of the numerous benefits of walking. Adding such examples would only serve to blur the focus of the paragraph further with general factual information, as the paragraph’s main purpose is to discuss the community stakeholders with whom transportation planners work.

Choice A is the best answer because it identifies the best reason the underlined sentence should not be kept. At this point in the passage and paragraph, a general statement about the benefits of walking only serves to interrupt the discussion of the community stakeholders with whom transportation planners work.

Choice B is incorrect because the underlined sentence should not be kept. Although the American Heart Association could theoretically be an example of “other interested organizations” that transportation planners work with, the sentence does not suggest this is the case. Instead, the association is merely the source for the general statement about the benefits of walking, a statement that only serves to interrupt the discussion of the actual community stakeholders with whom transportation planners work.

Choice C is incorrect because the underlined sentence should not be kept. Although the American Heart Association could theoretically be an example of “other interested organizations” that transportation planners work with, the sentence does not suggest this is the case. Instead, the association is merely the source for the general statement about the benefits of walking, a statement that only serves to interrupt the discussion of the actual community stakeholders with whom transportation planners work.

Choice D is incorrect because although the underlined sentence should be deleted, it is not because the sentence lacks specific examples of the numerous benefits of walking. Adding such examples would only serve to blur the focus of the paragraph further with general factual information, as the paragraph’s main purpose is to discuss the community stakeholders with whom transportation planners work.

Choice A is the best answer because it effectively uses a comma and “including” to set off the list of varied fields in which transportation planners major.

Choice B is incorrect because “and including” results in an ungrammatical sentence.

Choice C is incorrect because “and which include” results in an ungrammatical sentence.

Choice D is incorrect because it is unclear from this construction to what exactly the relative pronoun “which” refers.
Math

The SAT Math Test covers math practices, emphasizing problem solving, modeling, using tools strategically, and using algebraic structure. The questions test your ability to solve problems and use appropriate approaches and tools strategically.

Math Test Overview

The Math Test includes a portion that allows the use of a calculator and a portion that does not.

- Total questions: 58 (20 questions on the no-calculator portion; 38 questions on the calculator portion).
  - 45 standard multiple-choice questions.
  - 13 student-produced response questions.
- Time allotted for Math Test – No Calculator: 25 minutes; time allotted for Math Test – Calculator: 55 minutes.

What the Math Test Is Like

Instead of testing you on every math topic, the SAT asks you to use the math that you’ll rely on most in all sorts of situations. Questions on the Math Test are designed to mirror the problem solving and modeling you’ll do in:

- College math, science, and social science courses
- Jobs that you hold
- Your personal life

For instance, to answer some questions you’ll need to use several steps because in the real world, a single calculation is rarely enough to get the job done.

- Most math questions will be multiple choice, but some—called student-produced responses—ask you to come up with the answer rather than select the answer.
- Some parts of the test include several questions about a single scenario.

What the Math Test Measures

Fluency

The Math Test is a chance to show that you:

- Carry out procedures flexibly, accurately, efficiently, and strategically.
- Solve problems quickly by identifying and using the most efficient solution approaches.

This might involve solving a problem by inspection, finding a shortcut, or reorganizing the information you’ve been given.

Conceptual Understanding

You’ll demonstrate your grasp of math concepts, operations, and relations. For instance, you might be asked to make connections between properties of linear equations, their graphs, and the contexts they represent.

Applications

Some real-world problems ask you to analyze a situation, determine the essential elements required to solve the problem, represent the problem mathematically, and carry out a solution.

Calculator Use

Calcuators are important tools, and to succeed after high school, you’ll need to know how—and when—to use them. In the Math Test – Calculator portion of the test, you’ll be able to focus on complex modeling and reasoning because your calculator can save you time.

However, using a calculator, like any tool, isn’t always the best way to solve a problem. The Math Test includes some questions that it’s better not to use a calculator for, even though you’re allowed to. With these questions, you’ll probably find that the structure of the problem or your reasoning skills will lead you to the answers more efficiently.

Calculator Smarts

- Bring your own calculator. You can’t share one.
- Don’t bring a calculator you’ve never used before. Bring one you know. Practice for the test using the same calculator you’ll use on test day.
- It may help to do scratch work in the test book. Get your thoughts down before using your calculator.
- Make sure your calculator is in good working order with fresh batteries. The testing staff will not have batteries or extra calculators. If your calculator fails during testing and you have no backup, you can complete the test without it. All questions can be answered without a calculator.

Acceptable Calculators

Only battery-operated, handheld equipment can be used for testing. No power cords are allowed. A list of acceptable graphing calculators can be found online at sat.org/calculators.

Calculators permitted during testing include:

- Most graphing calculators that don’t have the unacceptable features listed in the next section
- All scientific calculators
- All four-function calculators (not recommended)
Unacceptable Calculators

You’re not allowed to use any of the following items as a calculator (unless approved as an accommodation):

- Tablets, laptops, notebooks, or any other personal computing devices, including wearable technology
- Models that can access the internet, have wireless, Bluetooth, cellular, audio/video recording and playing, camera, or any other smartphone-type feature
- Models that have a computer-style keyboard, pen-input, or stylus
- Models that use electrical outlets, make noise, or have a paper tape (unless approved as an accommodation). In addition, the use of hardware peripherals such as a stylus with an approved calculator is not permitted. Some models with touch-screen capability are not permitted (e.g., Casio ClassPad).

Tips for the Math Test

- Familiarize yourself with the directions ahead of time.
- You don’t have to memorize formulas. Commonly used formulas are provided with the test directions at the beginning of each Math Test portion. Other formulas that are needed are provided with the test questions themselves. It’s up to you to decide which formula is appropriate to a question.
- Read the problem carefully. Look for key words that tell you what the problem is asking. Before you solve each problem, ask yourself these questions: What is the question asking? What do I know?
- With some problems, it may be useful to draw a sketch or diagram of the given information.
- Use the test booklet for scratch work. You’re not expected to do all the reasoning and figuring in your head. You won’t receive credit for anything written in the booklet, but you’ll be able to check your work easily later.
- In the portion of the test that allows calculator use, be strategic when choosing to use your calculator.
- If you don’t know the correct answer to a multiple-choice question, eliminate some of the choices. It’s sometimes easier to find the wrong answers than the correct one. On some questions, you may even be able to eliminate all the incorrect choices. Remember that you won’t lose points for incorrect answers, so plan to make your best guess if you don’t know the answer.
- Check your answer to make sure it’s a reasonable reply to the question asked. This is especially true for student-produced response questions, where no answer choices are given.

Sample Math Test Materials

The sample math questions that follow show the kinds of questions that may appear on both portions of the Math Test. For these sample materials:

- Review the notes at the beginning of each portion. They match the notes on the actual test.
- Decide on the correct answer to each multiple-choice question, then read the explanation for the correct answer to each question and for the answer you chose (if the two are different).
- Follow the directions for the student-produced response questions shown later in this guide. The directions match the directions on the actual test.
Math Test – No Calculator Questions

Directions
For questions 1-5, solve each problem, choose the best answer from the choices provided, and fill in the corresponding bubble on your answer sheet. For question 6, solve the problem and enter your answer in the grid on the answer sheet. Please refer to the directions before question 6 on how to enter your answers in the grid. You may use any available space in your test booklet for scratch work.

Notes
1. The use of a calculator is not permitted.
2. All variables and expressions used represent real numbers unless otherwise indicated.
3. Figures provided in this test are drawn to scale unless otherwise indicated.
4. All figures lie in a plane unless otherwise indicated.
5. Unless otherwise indicated, the domain of a given function f is the set of all real numbers x for which f(x) is a real number.

Reference

The number of degrees of arc in a circle is 360.
The number of radians of arc in a circle is 2π.
The sum of the measures in degrees of the angles of a triangle is 180.
Line \( \ell \) is graphed in the \( xy \)-plane below.

If line \( \ell \) is translated up 5 units and right 7 units, then what is the slope of the new line?

A) \( \frac{2}{5} \)
B) \( -\frac{3}{2} \)
C) \( -\frac{8}{9} \)
D) \( -\frac{11}{14} \)

Choice A is incorrect. This value may result from a combination of errors. You may have erroneously determined the slope of the new line by adding 5 to the numerator and adding 7 to the denominator in the slope of line \( \ell \) and gotten the result \( \frac{-3+5}{-2+7} \).

Choice B is correct. The slope of a line can be determined by finding the difference in the \( y \)-coordinates divided by the difference in the \( x \)-coordinates for any two points on the line. Using the points indicated, the slope of line \( \ell \) is \( -\frac{3}{2} \).

Translating line \( \ell \) moves all the points on the line the same distance in the same direction, and the image will be a line parallel to \( \ell \). Therefore, the slope of the image is also \( -\frac{3}{2} \).

Choice C is incorrect. This value may result from a combination of errors. You may have erroneously determined the slope of the new line by subtracting 5 from the numerator and subtracting 7 from the denominator in the slope of line \( \ell \).

Choice D is incorrect and may result from a misunderstanding of slope. You may have recognized that slope models the rate of change but thought that a slope of less than 1 indicates a decreasing function.
Choice C is correct. The equation \( y = (2x - 4)(x - 4) \) can be written in vertex form, \( y = a(x - h)^2 + k \), to display the vertex, \((h, k)\), of the parabola. To put the equation in vertex form, first multiply: \((2x - 4)(x - 4) = 2x^2 - 8x - 4x + 16\). Then, add like terms, \(2x^2 - 8x - 4x + 16 = 2x^2 - 12x + 16\). The next step is completing the square.

\[
y = 2x^2 - 12x + 16
\]

Isolate the \(x^2\) term by factoring

\[
y = 2(x^2 - 6x + 9 - 9) + 16
\]

Make a perfect square in the parentheses

\[
y = 2(x^2 - 6x + 9) - 18 + 16
\]

Move the extra term out of the parentheses

\[
y = 2(x - 3)^2 - 18 + 16
\]

Factor inside the parentheses

\[
y = 2(x - 3)^2 - 2
\]

Simplify the remaining terms

Therefore, the coordinates of the vertex, \((3, -2)\), are both revealed only in choice C. Since you are told that all of the equations are equivalent, simply knowing the form that displays the coordinates of the vertex will save all of these steps—this is known as “seeing structure in the expression or equation.”

Choice A is incorrect; it is in standard form, displaying the \(y\)-value of the \(y\)-intercept of the graph \((0, 16)\) as a constant.

Choice B is incorrect; it displays the \(y\)-value of the \(y\)-intercept of the graph \((0, 16)\) as a constant.

Choice D is incorrect; it displays the \(x\)-value of one of the \(x\)-intercepts of the graph \((2, 0)\) as a constant.

Choice C is correct. The equation \( y = (2x - 4)(x - 4) \) can be written in vertex form, \( y = a(x - h)^2 + k \), to display the vertex, \((h, k)\), of the parabola. To put the equation in vertex form, first multiply: \((2x - 4)(x - 4) = 2x^2 - 8x - 4x + 16\). Then, add like terms, \(2x^2 - 8x - 4x + 16 = 2x^2 - 12x + 16\). The next step is completing the square.

\[
y = 2x^2 - 12x + 16
\]

Isolate the \(x^2\) term by factoring

\[
y = 2(x^2 - 6x + 9 - 9) + 16
\]

Make a perfect square in the parentheses

\[
y = 2(x^2 - 6x + 9) - 18 + 16
\]

Move the extra term out of the parentheses

\[
y = 2(x - 3)^2 - 18 + 16
\]

Factor inside the parentheses

\[
y = 2(x - 3)^2 - 2
\]

Simplify the remaining terms

Therefore, the coordinates of the vertex, \((3, -2)\), are both revealed only in choice C. Since you are told that all of the equations are equivalent, simply knowing the form that displays the coordinates of the vertex will save all of these steps—this is known as “seeing structure in the expression or equation.”

Choice A is incorrect; it is in standard form, displaying the \(y\)-value of the \(y\)-intercept of the graph \((0, 16)\) as a constant.

Choice B is incorrect; it displays the \(y\)-value of the \(y\)-intercept of the graph \((0, 16)\) as a constant.

Choice D is incorrect; it displays the \(x\)-value of one of the \(x\)-intercepts of the graph \((2, 0)\) as a constant.

Choice C is correct. The equation \( y = (2x - 4)(x - 4) \) can be written in vertex form, \( y = a(x - h)^2 + k \), to display the vertex, \((h, k)\), of the parabola. To put the equation in vertex form, first multiply: \((2x - 4)(x - 4) = 2x^2 - 8x - 4x + 16\). Then, add like terms, \(2x^2 - 8x - 4x + 16 = 2x^2 - 12x + 16\). The next step is completing the square.

\[
y = 2x^2 - 12x + 16
\]

Isolate the \(x^2\) term by factoring

\[
y = 2(x^2 - 6x + 9 - 9) + 16
\]

Make a perfect square in the parentheses

\[
y = 2(x^2 - 6x + 9) - 18 + 16
\]

Move the extra term out of the parentheses

\[
y = 2(x - 3)^2 - 18 + 16
\]

Factor inside the parentheses

\[
y = 2(x - 3)^2 - 2
\]

Simplify the remaining terms

Therefore, the coordinates of the vertex, \((3, -2)\), are both revealed only in choice C. Since you are told that all of the equations are equivalent, simply knowing the form that displays the coordinates of the vertex will save all of these steps—this is known as “seeing structure in the expression or equation.”

Choice A is incorrect; it is in standard form, displaying the \(y\)-value of the \(y\)-intercept of the graph \((0, 16)\) as a constant.

Choice B is incorrect; it displays the \(y\)-value of the \(y\)-intercept of the graph \((0, 16)\) as a constant.

Choice D is incorrect; it displays the \(x\)-value of one of the \(x\)-intercepts of the graph \((2, 0)\) as a constant.

In the complex number system, which of the following is equal to \(14 - 2i(7 + 12i)\)? (Note: \(i = \sqrt{-1}\)) A) 74 B) 122 C) 74 + 154i D) 122 + 154i

\[\text{Estimated Difficulty: Medium} \quad \text{Key: D}\]

Choice D is correct. Applying the distributive property to multiply the binomials yields the expression \(98 + 168i - 14i - 24i^2\). The note in the question reminds you that \(i = \sqrt{-1}\), therefore, \(i^2 = -1\). Substituting this value into the expression gives you \(98 + 168i - 14i - 24(-1)\), and combining like terms results in \(122 + 154i\).

Choice A is incorrect and may result from a combination of errors. You may not have correctly distributed when multiplying the binomials, multiplying only the first terms together and the second terms together. You may also have used the incorrect equality \(i^2 = 1\).

Choice B is incorrect and may result from a combination of errors. You may not have correctly distributed when multiplying the binomials, multiplying only the first terms together and the second terms together.

Choice C is incorrect and results from misapplying the statement \(i = \sqrt{-1}\).

Which of the following is equal to \(\sin\left(\frac{\pi}{5}\right)\)?

A) \(-\cos\left(\frac{\pi}{5}\right)\)

B) \(-\sin\left(\frac{\pi}{5}\right)\)

C) \(\cos\left(\frac{3\pi}{10}\right)\)

D) \(\sin\left(\frac{7\pi}{10}\right)\)

\[\text{Estimated Difficulty: Hard} \quad \text{Key: C}\]

Choice C is correct. Sine and cosine are cofunctions, or are related by the equation \(\sin(x) = \cos\left(\frac{\pi}{2} - x\right)\).

Therefore, \(\sin\left(\frac{\pi}{5}\right) = \cos\left(\frac{\pi}{2} - \frac{\pi}{5}\right)\), which reduces to \(\cos\left(\frac{3\pi}{10}\right)\).

Choice A is incorrect and may result from a misunderstanding about trigonometric relationships. You may have thought that cosine is the inverse function of sine and therefore reasoned that the negative of the cosine of an angle is equivalent to the sine of that angle.

Choice B is incorrect and may result from a misunderstanding of the unit circle and how it relates to trigonometric expressions. You may have thought that, on a coordinate grid, the negative sign only changes the orientation of the triangle formed, not the value of the trigonometric expression.

Choice D is incorrect. You may have confused the relationship between sine and cosine and erroneously added \(\frac{\pi}{2}\) to the given angle measure instead of subtracting the angle measure from \(\frac{\pi}{2}\).
Student-Produced Response

Math Questions

For some questions in the Math Tests, you will be asked to solve the problem and enter your answer in the grid, as described below, on the answer sheet.

1. Although not required, it is suggested that you write your answer in the boxes at the top of the columns to help you fill in the bubbles accurately. You will receive credit only if the bubbles are filled in correctly.

2. Mark no more than one bubble in any column.

3. No question has a negative answer.

4. Some problems may have more than one correct answer. In such cases, grid only one answer.

5. Mixed numbers such as \(3\frac{1}{2}\) must be gridded as 3.5 or 7/2 (If \(\frac{31}{2}\) is entered into the grid, it will be interpreted as \(\frac{31}{2}\), not \(\frac{7}{2}\).)

6. Decimal answers: If you obtain a decimal answer with more digits than the grid can accommodate, it may be either rounded or truncated, but it must fill the entire grid.

6

\[x^2 + y^2 - 6x + 8y = 144\]

The equation of a circle in the \(xy\)-plane is shown above. What is the diameter of the circle?

Estimated Difficulty: Hard

Key: 26

Completing the square yields the equation \((x - 3)^2 + (y + 4)^2 = 169\), the standard form of an equation of the circle. Understanding this form results in the equation \(r^2 = 169\), which when solved for \(r\) gives the value of the radius as 13. Diameter is twice the value of the radius; therefore, the diameter is 26.
Math Test – Calculator Questions

Directions

For questions 1-8, solve each problem, choose the best answer from the choices provided, and fill in the corresponding bubble on your answer sheet. For questions 9-10, solve the problem and enter your answer in the grid on the answer sheet. Please refer to the directions before question 6 on page 33 on how to enter your answers in the grid. You may use any available space in your test booklet for scratch work.

Notes

1. The use of a calculator is permitted.
2. All variables and expressions used represent real numbers unless otherwise indicated.
3. Figures provided in this test are drawn to scale unless otherwise indicated.
4. All figures lie in a plane unless otherwise indicated.
5. Unless otherwise indicated, the domain of a given function is the set of all real numbers for which is a real number.

Reference

The number of degrees of arc in a circle is 360.
The number of radians of arc in a circle is 2π.
The sum of the measures in degrees of the angles of a triangle is 180.
The recommended daily calcium intake for a 20-year-old person is 1,000 milligrams (mg). One cup of milk contains 299 mg of calcium and one cup of juice contains 261 mg of calcium. Which of the following inequalities represents the possible number of cups of milk, \(m\), and cups of juice, \(j\), a 20-year-old person could drink in a day to meet or exceed the recommended daily calcium intake from these drinks alone?

A) \(299m + 261j \geq 1,000\)
B) \(299m + 261j > 1,000\)
C) \(\frac{299}{m} + \frac{261}{j} \geq 1,000\)
D) \(\frac{299}{m} + \frac{261}{j} > 1,000\)

**Estimated Difficulty:** Easy  
**Key:** A

**Choice A** is correct. Multiplying the number of cups of milk by the amount of calcium each cup contains and multiplying the number of cups of juice by the amount of calcium each cup contains gives the total amount of calcium from each source. You must then find the sum of these two numbers to find the total amount of calcium. Because the question asks for the calcium from these two sources to meet or exceed the recommended daily intake, the sum of these two products must be greater than or equal to 1,000.

**Choice B** is incorrect and may result from a misunderstanding of the meaning of inequality symbols as they relate to real-life situations. This answer does not allow for the daily intake to meet the recommended daily amount.

**Choice C** is incorrect and may result from a misunderstanding of proportional relationships. Here the wrong operation is applied, with the total amount of calcium per cup divided by the number of cups of each type of drink. These values should be multiplied.

**Choice D** is incorrect and may result from a combination of mistakes. The inequality symbol used allows the option to exceed, but not to meet, the recommended daily value, and the wrong operation may have been applied when calculating the total amount of calcium intake from each drink.

A company’s manager estimated that the cost \(C\), in dollars, of producing \(n\) items is \(C = 7n + 350\). The company sells each item for $12. The company makes a profit when the total income from selling a quantity of items is greater than the total cost of producing that quantity of items. Which of the following inequalities gives all possible values of \(n\) for which the manager estimates that the company will make a profit?

A) \(n < 70\)
B) \(n < 84\)
C) \(n > 70\)
D) \(n > 84\)

**Estimated Difficulty:** Medium  
**Key:** C

**Choice C** is correct. One way to find the correct answer is to create an inequality. The income from sales of \(n\) items is \(12n\). For the company to profit, \(12n\) must be greater than the cost of producing \(n\) items; therefore, the inequality \(12n > 7n + 350\) can be used to model the scenario. Solving this inequality yields \(n > 70\).

**Choice A** is incorrect and may result from a misunderstanding of the properties of inequalities. You may have found the number of items of the break-even point as 70 and used the incorrect notation to express the answer, or you may have incorrectly modeled the scenario when setting up an inequality to solve.

**Choice B** is incorrect and may result from a misunderstanding of how the cost equation models the scenario. If you use the cost of $12 as the number of items \(n\) and evaluate the expression \(7n\), you will find the value of 84. Misunderstanding how the inequality relates to the scenario might lead you to think \(n\) should be less than this value.

**Choice D** is incorrect and may result from a misunderstanding of how the cost equation models the scenario. If you use the cost of $12 as the number of items \(n\) and evaluate the expression \(7n\), you will find the value of 84. Misunderstanding how the inequality relates to the scenario might lead you to think \(n\) should be greater than this value.
At a primate reserve, the mean age of all the male primates is 15 years, and the mean age of all female primates is 19 years. Which of the following must be true about the mean age \( m \) of the combined group of male and female primates at the primate reserve?

A) \( m = 17 \)
B) \( m > 17 \)
C) \( m < 17 \)
D) \( 15 < m < 19 \)

**Estimated Difficulty: Medium**  
**Key:** D

**Choice D** is correct. You must reason that because the mean of the males is lower than that of the females, the combined mean cannot be greater than or equal to that of the females, while also reasoning that because the mean of the females is greater than that of the males, the combined mean cannot be less than or equal to the mean of the males. Therefore, the combined mean must be between the two separate means.

**Choice A** is incorrect and results from finding the mean of the two means. This answer makes an unjustified assumption that there are an equal number of male and female primates.

**Choice B** is incorrect and results from finding the mean of the two means and misapplying an inequality to the scenario. This answer makes an unjustified assumption that there are more females than males.

**Choice C** is incorrect and results from finding the mean of the two means and misapplying an inequality to the scenario. This answer makes an unjustified assumption that there are more males than females.

A biology class at Central High School predicted that a local population of animals will double in size every 12 years. The population at the beginning of 2014 was estimated to be 50 animals. If \( P \) represents the population \( n \) years after 2014, then which of the following equations represents the class's model of the population over time?

A) \( P = 12 + 50n \)
B) \( P = 50 + 12n \)
C) \( P = 50(2)^{12n} \)
D) \( P = 50(2)^{\frac{n}{12}} \)

**Estimated Difficulty: Medium**  
**Key:** D

**Choice D** is correct. A population that doubles in size over equal time periods is increasing at an exponential rate. In a doubling scenario, an exponential growth model can be written in the form \( y = a(2)^{bn} \), where \( a \) is the initial population (that is, the population when \( n = 0 \)) and \( b \) is the number of years it takes for the population to double in size. In this case, the initial population is 50, the number of animals at the beginning of 2014. Therefore, \( a = 50 \). The text explains that the population will double in size every 12 years. Therefore, \( b = 12 \).

**Choice A** is incorrect and may result from a misunderstanding of exponential equations or of the context. This linear model indicates that the initial population is 12 animals and the population is increasing by 50 animals each year. However, this is not the case.

**Choice B** is incorrect and may result from a misunderstanding of exponential equations or of the context. This linear model indicates that the initial population is 50 animals and the population is increasing by 12 animals each year. However, this is not the case.

**Choice C** is incorrect. This exponential model indicates that the initial population is 50 animals and is doubling. However, the exponent \( 12n \) indicates that the population is doubling 12 times per year, not every 12 years.
Questions 6-8 refer to the following information.

The first metacarpal bone is located in the hand. The scatterplot below shows the relationship between the length of the first metacarpal bone and height of 9 people. A line of best fit is also shown.

![Graph showing the relationship between height and length of first metacarpal bone.]

In the figure above, \( \triangle ABC \) is similar to \( \triangle EDC \), with \( \angle BAC \) corresponding to \( \angle CED \) and \( \angle ABC \) corresponding to \( \angle CDE \). Which of the following must be true?

A) \( AE \parallel BD \)
B) \( AE \perp BD \)
C) \( AB \parallel DE \)
D) \( AB \perp DE \)

**Estimated Difficulty:** Medium  
**Key:** C

**Choice C** is correct. Given that \( \triangle ABC \) is similar to \( \triangle EDC \) and \( \angle BAC \) corresponds to \( \angle CED \), you can determine that \( \angle BAC \) is congruent to \( \angle CED \). The converse of the alternate interior angle theorem tells us that \( \overline{AB} \parallel \overline{DE} \). (You can also use the fact that \( \angle ABC \) and \( \angle CDE \) are congruent to make a similar argument.)

**Choice A** is incorrect and may result from multiple misconceptions. You may have misidentified the segments as perpendicular and used the wrong notation to express this statement.

**Choice B** is incorrect and may result from using only the diagram and not considering the given information. The line segments appear to be perpendicular, but need not be, given the information provided.

**Choice D** is incorrect and may result from misunderstanding either the notation or the vocabulary of parallel and perpendicular lines. You may have incorrectly identified parallel lines as perpendicular.

6

How many of the 9 people have an actual height that differs by more than 3 centimeters from the height predicted by the line of best fit?

A) 2
B) 4
C) 6
D) 9

**Estimated Difficulty:** Easy  
**Key:** B

**Choice B** is correct. The people who have first metacarpal bones of length 4.0, 4.3, 4.8, and 4.9 centimeters have heights that differ by more than 3 centimeters from the height predicted by the line of best fit.

**Choice A** is incorrect. There are 2 people whose actual heights are more than 3 centimeters above the height predicted by the line of best fit. However, there are also 2 people whose actual heights are farther than 3 centimeters below the line of best fit.
Choice C is incorrect. There are 6 data points in which the absolute value between the actual height and the height predicted by the line of best fit is greater than 1 centimeter.

Choice D is incorrect. The data on the graph represents 9 different people; however, the absolute value of the difference between actual height and predicted height is not greater than 3 for all of the people.

Based on the line of best fit, what is the predicted height for someone with a first metacarpal bone that has a length of 4.45 centimeters?

A) 168 centimeters  
B) 169 centimeters  
C) 170 centimeters  
D) 171 centimeters

Estimated Difficulty: Easy  
Key: C

Choice C is correct. First, notice that the scale of the $x$-axis is 0.1, and therefore the $x$-value of 4.45 is halfway between the unmarked value of 4.4 and the marked value of 4.5. Then find the $y$-value on the line of best fit that corresponds to an $x$-value of 4.45, which is 170.

Choice A is incorrect. If you mistakenly find the point on the line between the $x$-values of 4.3 and 4.4, you’ll likely find a predicted metacarpal bone length of 168 centimeters.

Choice B is incorrect. If you mistakenly find the point on the line that corresponds to an $x$-value of 4.4 centimeters, you’ll likely find a predicted height of approximately 169 centimeters. You might also choose this option if you mistakenly use the data point that has an $x$-value closest to 4.45 centimeters.

Choice D is incorrect. If you mistakenly find the point on the line that corresponds to an $x$-value of 4.5 centimeters, you’ll likely find a predicted height of approximately 171 centimeters. You might also choose this option if you mistakenly use the data point that has an $x$-value closest to 4.45 centimeters.
**Student-Produced Response**

**Math Questions**

For questions 9 and 10, you are asked to solve the problem and enter your answer in the grid, as described on page 33 of this booklet.

### 9

The table shown classifies 103 elements as metal, metalloid, or nonmetal and as solid, liquid, or gas at standard temperature and pressure.

<table>
<thead>
<tr>
<th></th>
<th>Solids</th>
<th>Liquids</th>
<th>Gases</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Metals</td>
<td>77</td>
<td>1</td>
<td>0</td>
<td>78</td>
</tr>
<tr>
<td>Metalloids</td>
<td>7</td>
<td>0</td>
<td>0</td>
<td>7</td>
</tr>
<tr>
<td>Nonmetals</td>
<td>6</td>
<td>1</td>
<td>11</td>
<td>18</td>
</tr>
<tr>
<td>Total</td>
<td>90</td>
<td>2</td>
<td>11</td>
<td>103</td>
</tr>
</tbody>
</table>

What fraction of solids and liquids in the table are metalloids?

**Estimated Difficulty:** Easy

**Key:** $\frac{7}{92}, .076$

There are 7 metalloids that are solid or liquid, and there are 92 total solids and liquids. Therefore, the fraction of solids and liquids that are metalloids is $\frac{7}{92}$ or .076.

### 10

An architect drew the sketch below while designing a house roof. The dimensions shown are for the interior of the triangle.

![Triangle Sketch](image)

Note: Figure not drawn to scale.

What is the value of $\cos x$?

**Estimated Difficulty:** Hard

**Key:** $\frac{2}{3}, \frac{4}{6}, \frac{6}{9}, \frac{8}{12}, .666, .667$

Because the triangle is isosceles, constructing a perpendicular from the top vertex to the opposite side will bisect the base and create two smaller right triangles. In a right triangle, the cosine of an acute angle is equal to the length of the side adjacent to the angle divided by the length of the hypotenuse. This gives $\cos x = \frac{16}{24}$, which can be simplified to $\cos x = \frac{2}{3}$. Note that $\frac{2}{3}$ cannot be entered into the answer grid, so this fraction must be reduced. Acceptable answers to grid are $\frac{2}{3}, \frac{4}{6}, \frac{6}{9}, \frac{8}{12}, .666, and .667.$
The SAT Essay

The SAT Essay is a lot like a typical college writing assignment that asks you to analyze a text. It shows colleges that you’re able to read, analyze, and write at the college level.

IMPORTANT: Do not write your name or any other personal identifying information on the lines on the answer sheet provided for your essay (for example, “by Jane Doe”). Doing so will delay the receipt of your essay results.

SAT Essay Overview

- Total questions: 1 prompt, with points to consider and directions
- 1 passage
- Time allotted: 50 minutes to read and analyze the passage and to develop a written response

What the SAT Essay Is Like

The SAT Essay asks you to use your reading, analysis, and writing skills. You’ll be asked to:

- Read a passage.
- Explain how the author builds an argument to persuade an audience.
- Support your explanation with evidence from the passage.

What the SAT Essay Measures

The SAT Essay shows how well you understand the passage and use it as the basis for a well-written, well-thought-out response. Your essay will be scored on three dimensions, each on a 2–8 scale:

Reading: A successful essay shows that you understood the passage, including the interplay of central ideas and important details. It also shows effective use of textual evidence.

Analysis: A successful essay shows your understanding of how the author builds an argument by:

- Examining the author’s use of evidence, reasoning, and/or stylistic and persuasive techniques (or other elements of your choosing)
- Supporting your claims and points effectively
- Focusing on those features of the passage that are most relevant for completing the task

Writing: A successful essay is cohesive, organized, and precise, uses an appropriate style and tone, has varied sentences, and observes the conventions of standard written English.

See The SAT Essay Scoring Guide later in this guide to learn more about how the essay is scored.

The Essay Prompt

The prompt (question) shown below is nearly identical to the one that will appear on the SAT.

As you read the passage below, consider how [the author] uses:

Evidence, such as facts or examples, to support claims.

Reasoning to develop ideas and to connect claims and evidence.

Stylistic or persuasive elements, such as word choice or appeals to emotion, to add power to the ideas expressed.

Write an essay in which you explain how [the author] builds an argument to persuade [his/her] audience that [author’s claim]. In your essay, analyze how [the author] uses one or more of the features listed above (or features of your own choice) to strengthen the logic and persuasiveness of [his/her] argument. Be sure that your analysis focuses on the most relevant features of the passage. Your essay should not explain whether you agree with [the author’s] claims, but rather explain how [the author] builds an argument to persuade [his/her] audience.

The Essay Passage

All passages have these things in common:

- Written for a broad audience
- Argue a point
- Express subtle views on complex subjects
- Use logical reasoning and evidence to support claims
- Examine ideas, debates, or trends in the arts and sciences or in civic, cultural, or political life
- Always taken from published works

All the information you need to write your essay will be included in the passage or in notes about it.

Sample Essay Materials

The following student essays show you what kinds of attributes will be evaluated in the SAT Essay.

Each student essay is followed by an explanation of why it received the assigned score on each of the three dimensions. The directions on the next page match what you’ll encounter on the actual test.
Sample Essay

Directions

The essay gives you an opportunity to show how effectively you can read and comprehend a passage and write an essay analyzing the passage. In your essay, you should demonstrate that you have read the passage carefully, present a clear and logical analysis, and use language precisely.

Your essay must be written on the lines provided in your answer booklet; except for the Planning Page of the answer booklet, you will receive no other paper on which to write. You will have enough space if you write on every line, avoid wide margins, and keep your handwriting to a reasonable size. Remember that people who are not familiar with your handwriting will read what you write. Try to write or print so that what you are writing is legible to those readers.

You have 50 minutes to read the passage and write an essay in response to the prompt provided inside this booklet.

Reminders:

- Do not write your essay in this booklet. Only what you write on the lined pages of your answer booklet will be evaluated.
- An off-topic essay will not be evaluated.

The following sample illustrates the general format of the essay task in the context of a specific prompt, this one related to a passage adapted from an article by Paul Bogard about the value of natural darkness.

As you read the passage below, consider how Paul Bogard uses

- evidence, such as facts or examples, to support claims.
- reasoning to develop ideas and to connect claims and evidence.
- stylistic or persuasive elements, such as word choice or appeals to emotion, to add power to the ideas expressed.

1 At my family’s cabin on a Minnesota lake, I knew woods so dark that my hands disappeared before my eyes. I knew night skies in which meteors left smoky trails across sugary spreads of stars. But now, when 8 of 10 children born in the United States will never know a sky dark enough for the Milky Way, I worry we are rapidly losing night’s natural darkness before realizing its worth. This winter solstice, as we cheer the days’ gradual movement back toward light, let us also remember the irreplaceable value of darkness.

2 All life evolved to the steady rhythm of bright days and dark nights. Today, though, when we feel the closeness of nightfall, we reach quickly for a light switch. And too little darkness, meaning too much artificial light at night, spells trouble for all.

3 Already the World Health Organization classifies working the night shift as a probable human carcinogen, and the American Medical Association has voiced its unanimous support for “light pollution reduction efforts and glare reduction efforts at both the national and state levels.” Our bodies need darkness to produce the hormone melatonin, which keeps certain cancers from developing, and our bodies need darkness for sleep. Sleep disorders have been linked to diabetes, obesity, cardiovascular disease and depression, and recent research suggests one main cause of “short sleep” is “long light.” Whether we work at night or simply take our tablets, notebooks and smartphones to bed, there isn’t a place for this much artificial light in our lives.
4 The rest of the world depends on darkness as well, including nocturnal and crepuscular species of birds, insects, mammals, fish and reptiles. Some examples are well known—the 400 species of birds that migrate at night in North America, the sea turtles that come ashore to lay their eggs—and some are not, such as the bats that save American farmers billions in pest control and the moths that pollinate 80% of the world’s flora. Ecological light pollution is like the bulldozer of the night, wrecking habitat and disrupting ecosystems several billion years in the making. Simply put, without darkness, Earth’s ecology would collapse.

5 In today’s crowded, louder, more fast-paced world, night’s darkness can provide solitude, quiet and stillness, qualities increasingly in short supply. Every religious tradition has considered darkness invaluable for a soulful life, and the chance to witness the universe has inspired artists, philosophers and everyday stargazers since time began. In a world awash with electric light . . . how would Van Gogh have given the world his “Starry Night”? Who knows what this vision of the night sky might inspire in each of us, in our children or grandchildren?

6 Yet all over the world, our nights are growing brighter. In the United States and Western Europe, the amount of light in the sky increases an average of about 6% every year. Computer images of the United States at night, based on NASA photographs, show that what was a very dark country as recently as the 1950s is now nearly covered with a blanket of light. Much of this light is wasted energy, which means wasted dollars. Those of us over 35 are perhaps among the last generation to have known truly dark nights. Even the northern lake where I was lucky to spend my summers has seen its darkness diminish.

7 It doesn’t have to be this way. Light pollution is readily within our ability to solve, using new lighting technologies and shielding existing lights. Already, many cities and towns across North America and Europe are changing to LED streetlights, which offer dramatic possibilities for controlling wasted light. Other communities are finding success with simply turning off portions of their public lighting after midnight. Even Paris, the famed “city of light,” which already turns off its monument lighting after 1 a.m., will this summer start to require its shops, offices and public buildings to turn off lights after 2 a.m. Though primarily designed to save energy, such reductions in light will also go far in addressing light pollution. But we will never truly address the problem of light pollution until we become aware of the irreplaceable value and beauty of the darkness we are losing.

Write an essay in which you explain how Paul Bogard builds an argument to persuade his audience that natural darkness should be preserved. In your essay, analyze how Bogard uses one or more of the features listed in the box above (or features of your own choice) to strengthen the logic and persuasiveness of his argument. Be sure that your analysis focuses on the most relevant features of the passage. Your essay should not explain whether you agree with Bogard’s claims, but rather explain how Bogard builds an argument to persuade his audience.
Sample Student Essays

The following student essays show you what kinds of attributes will be evaluated in the SAT Essay. Each essay is followed by an explanation of why it received the assigned score on each of the three dimensions.

**SAMPLE 1**

Bogard builds an argument to persuade his audience about what he is concerning about and feels it important to take care about. His essay talks about so much facts about sleeping how so little can effect us health wise examples like getting sleep disorders, diabetes, obesity, cardiovascular disease and depression. This facts helps people persuade the audience he also say that the world health organization classifies working night shift is bad. In his argument is not all about how it bad for the body he also claims and have proof that light cost are expensive and really costing people because they have light all night long. He also claims light is messing with mother nature that animals need darkness to feed eat move around because there noctuaral creatures. He has details facts about human body, animals and about mother nature that he can use to support his idea of not using so much light at night and how we need darkness. With these features he can persuade the audience because people dont know why darkness can be good for us. He was all of facts and examples that he claim is effecting us and there world.

This response scored a 2/1/1.

**Reading—2**: This response demonstrates some comprehension of the source text, although the writer’s understanding of Bogard’s central idea isn’t conveyed until the latter part of the essay, where the writer indicates that Bogard includes details facts about human body, animals and about mother nature that he can use to support his idea of not using so much light at night and how we need darkness. Prior to this, the writer has included details from the text, but without contextualizing these details within Bogard’s broader argument, suggesting that the writer is relaying ideas from the text without much understanding of how they contribute to the whole. For example, the writer mentions the health problems cited in the text, that working the night shift is classified as bad, and that light costs are high, but doesn’t explain how these points relate to Bogard’s main claim that we must preserve natural darkness. On the whole, this essay displays only a partial understanding of the source text.

**Analysis—1**: In this essay, the writer has merely identified aspects of Bogard’s use of evidence without explaining how the evidence contributes to the argument. The writer notes that Bogard’s text talks about so much facts about sleeping how so little can effect us health wise examples like getting sleep disorders, diabetes, obesity, cardiovascular disease and depression. This facts helps people persuade the audience. Other than identifying these as persuasive facts, however, the writer does nothing to indicate an understanding of the analytical task. The writer again mentions persuasion before the conclusion of the essay (With these features he can persuade the audience because people dont know why darkness can be good for us), but once again, there is no explanation of how or why these features are persuasive. Thus, the essay offers inadequate analysis of Bogard’s text.

**Writing—1**: This response demonstrates little cohesion and inadequate skill in the use and control of language. From the outset, problems with language control impede the writer’s ability to establish a clear central claim (Bogard builds an argument to persuade his audience about what he is concerning about and feels it important to take care about). The response also lacks a recognizable introduction and conclusion, and sentences are strung together without a clear progression of ideas (for much of the response, the writer merely lists claims Bogard makes). The response also lacks variety in sentence structures, in part because of repetitive transitions. (For example, he also claims is used two sentences in a row in this brief response). Weak control of the conventions of standard written English, coupled with vague word choice, undermines the quality of writing. Overall, this response demonstrates inadequate writing skill.
Paul Bogard strongly believes that natural darkness should be preserved. In order to prove the need for natural darkness, Bogard divides his argument into three main topics, saying that natural darkness is beneficial to humans, essential to humans, and essential to ecosystems.

According to Bogard, natural darkness can be a positive help to humans. One of the ways it can accomplish this is by giving enjoyment to onlookers. To supplant this, Bogard gives a personal example of how he enjoyed seeing meteors dart across the night sky in Minnesota as a child. Also, he states that natural darkness can be a source of solitude. Supporting this claim, Bogard states that darkness is invaluable to every religion. Additionally, Bogard says that the night sky has inspired countless numbers of philosophers, artists, and stargazers for millennia. He then gives an appealing allusion by asking how Van Gogh could have painted “Starry Night” in the mist of electric light. One of Bogard’s primary arguments for natural darkness shows how it can benefit humans.

Bogard then gives a scientific case that shows why natural darkness is essential to humans. He states a find of the World Health Organization that declares the night shift can be detrimental to one’s health. He points to the necessity of darkness in producing melatonin, a hormone that helps prevent certain cancers from developing in the human body. Bogard then concludes his argument that darkness is essential to human well-being by analyzing sleep. He first makes the obvious claim that darkness is essential for sleep. Then, he talks about the negative health effects of sleep disorders. These include “diabetes, obesity, cardiovascular disease and depression.” To associate this with his argument for natural darkness, Bogard states the findings of recent research, which say that “long light” is one of the primary causes of “short sleep.” Bogard uses scientific evidence to support his belief in the preservation of natural darkness.

Bogard’s third primary defense of natural darkness declares that it is essential to nature. He notes that there are a variety of nocturnal and crepuscular species of birds, fish, mammals, insects, and reptiles worldwide. He gives two specific, well-known examples of these species; these discussed the 400 species of North American birds that migrate at night and the sea turtles that lay their eggs on the shore at night. He also gives a couple of lesser-known examples, involving bats and moths that show the positive actions that some nocturnal animals perform. He then concludes his argument for nocturnal darkness necessary to nature with persuasion, saying that removing natural darkness would essentially destroy an ecology that took billions of years to develop. Here, Bogard uses scientific fact to prove that natural darkness is a key to nature and ecology. Paul Bogard supports the preservation of natural darkness. He uses an argument to support his position that has three primary points—benefit to humans, need for humans, and need for nature.

This response scored a 4/1/3.
Reading—4: This response demonstrates thorough comprehension of Bogard’s text and a clear understanding of the interrelation between the central idea and important details. The writer briefly summarizes Bogard’s central idea (natural darkness should be preserved) and aptly notes that Bogard’s argument encompasses three main points: that natural darkness is beneficial to humans, essential to humans, and essential to ecosystems. The writer provides various details from the text that support these points. In the first body paragraph, for example, the writer demonstrates comprehension of how Bogard’s personal example of how he enjoyed seeing meteors dart across the night sky in Minnesota as a child relates to his claim that natural darkness can give enjoyment to onlookers. The writer also sees the connection between darkness as a source of solitude and it inspiring countless numbers of philosophers, artists, and stargazers for millennia. Providing these details highlights the writer’s understanding of Bogard’s claim that natural
darkness can benefit humans. The writer continues to demonstrate how details in Bogard’s text relate to each other and to Bogard’s central idea in the subsequent discussion of how darkness is essential to humans’ health and to nature. Although little is directly quoted from the text, the writer’s thorough paraphrasing of multiple details taken from across the passage indicates that the writer comprehensively understands Bogard’s argument and is able to convey it in his own words.

Analysis—1: The response offers ineffective analysis of Bogard’s text and demonstrates little understanding of the analytical task. Although clearly comprehending the entirety of Bogard’s argument, the writer does not communicate how Bogard builds his argument with evidence, reasoning, or stylistic or persuasive elements, nor does the writer communicate what effect Bogard’s argumentation has on his audience. Instead of providing effective analysis, the writer only identifies argumentative elements in Bogard’s text, such as the appealing allusion Bogard offers regarding Van Gogh’s Starry Night or the scientific evidence Bogard uses to support his belief in the preservation of natural darkness. The writer instead consistently lapses into summary. Overall, the response demonstrates inadequate analysis.

Writing—3: This mostly cohesive response demonstrates effective use and control of language. The writer presents an effective introduction with a clear central claim that lays out the three points discussed in the response (In order to prove the need for natural darkness, Bogard divides his argument into three main topics, saying that natural darkness is beneficial to humans, essential to humans, and essential to the ecosystem). The response also includes a generally effective conclusion that summarizes rather than advances the essay (Paul Bogard supports the preservation of natural darkness. He uses an argument to support his position that has three primary points—benefit to humans, need for humans and need for nature) although the conclusion is not marked off by a paragraph break. The response is organized clearly around the three points identified in the introduction, and each body paragraph stays on topic. The writer also demonstrates a clear progression of ideas both within paragraphs and throughout the essay. Sentence structure tends to be repetitive and simple, however. For example, at or near the end of each body paragraph, the writer restates the point that introduces that paragraph (Bogard then gives a scientific case that shows why natural darkness is essential to humans. . . . Bogard uses scientific evidence to support his belief in the preservation of natural darkness). Although the writing in this response is proficient, it does not demonstrate the sentence variety, precise word choice, or highly effective progression of ideas that is expected at the advanced level.
In response to our world’s growing reliance on artificial light, writer Paul Bogard argues that natural darkness should be preserved in his article “Let There be dark.” He effectively builds his argument by using a personal anecdote, allusions to art and history, and rhetorical questions.

Bogard starts his article off by recounting a personal story – a summer spent on a Minnesota lake where there was “woods so dark that [his] hands disappeared before [his] eyes.” In telling this brief anecdote, Bogard challenges the audience to remember a time where they could fully amass themselves in natural darkness void of artificial light. By drawing in his readers with a personal encounter about night darkness, the author means to establish the potential for beauty, glamour, and awe-inspiring mystery that genuine darkness can possess. He builds his argument for the preservation of natural darkness by reminiscing for his readers a first-hand encounter that proves the “irreplaceable value of darkness.”

This anecdote provides a baseline of sorts for readers to find credence with the author’s claims. Bogard’s argument is also furthered by his use of allusion to art – Van Gogh’s “Starry Night” – and modern history – Paris’ reputation as “The City of Light.” By first referencing “Starry Night,” a painting generally considered to be undoubtedly beautiful, Bogard establishes that the natural magnificence of stars in a dark sky is definite. A world absent of excess artificial light could potentially hold the key to a grand, glorious night sky like Van Gogh’s according to the writer. This urges the readers to weigh the disadvantages of our world consumed by unnatural, vapid lighting. Furthermore, Bogard’s alludes to Paris as “the famed ‘city of light’.” He then goes on to state how Paris has taken steps to exercise more sustainable lighting practices. By doing this, Bogard creates a dichotomy between Paris’ traditionally alluded-to name and the reality of what Paris is becoming – no longer “the city of light,” but moreso “the city of light…before 2 AM.” This furthers his line of argumentation because it shows how steps can be and are being taken to preserve natural darkness. It shows that even a city that is literally famous for being constantly lit can practically address light pollution in a manner that preserves the beauty of both the city itself and the universe as a whole.

Finally, Bogard makes subtle yet efficient use of rhetorical questioning to persuade his audience that natural darkness preservation is essential. He asks the readers to consider “what the vision of the night sky might inspire in each of us, in our children or grandchildren?” in a way that brutally plays to each of our emotions. By asking this question, Bogard draws out heartfelt ponderance from his readers about the affecting power of an untainted night sky. This rhetorical question tugs at the readers’ heartstrings; while the reader may have seen an unobscured night skyline before, the possibility that their child or grandchild will never get the chance sways them to see as Bogard sees. This strategy is definitively an appeal to pathos, forcing the audience to directly face an emotionally-charged inquiry that will surely spur some kind of response. By doing this, Bogard develops his argument, adding gutthral power to the idea that the issue of maintaining natural darkness is relevant and multifaceted.

Writing as a reaction to his disappointment that artificial light has largely permeated the presence of natural darkness, Paul Bogard argues that we must preserve true, unaffected darkness. He builds this claim by making use of a personal anecdote, allusions, and rhetorical questioning.
This response scored a 4/4/4.

Reading—4: This response demonstrates thorough comprehension of the source text through skillful use of paraphrases and direct quotations. The writer briefly summarizes the central idea of Bogard’s piece (natural darkness should be preserved; we must preserve true, unaffected darkness), and presents many details from the text, such as referring to the personal anecdote that opens the passage and citing Bogard’s use of Paris’ reputation as “The City of Light.” There are few long direct quotations from the source text; instead, the response succinctly and accurately captures the entirety of Bogard’s argument in the writer’s own words, and the writer is able to articulate how details in the source text interrelate with Bogard’s central claim. The response is also free of errors of fact or interpretation. Overall, the response demonstrates advanced reading comprehension.

Analysis—4: This response offers an insightful analysis of the source text and demonstrates a sophisticated understanding of the analytical task. In analyzing Bogard’s use of personal anecdote, allusions to art and history, and rhetorical questions, the writer is able to explain carefully and thoroughly how Bogard builds his argument over the course of the passage. For example, the writer offers a possible reason for why Bogard chose to open his argument with a personal anecdote, and is also able to describe the overall effect of that choice on his audience (In telling this brief anecdote, Bogard challenges the audience to remember a time where they could fully amass themselves in natural darkness void of artificial light. By drawing in his readers with a personal encounter … the author means to establish the potential for beauty, glamour, and awe-inspiring mystery that genuine darkness can possess. . . . This anecdote provides a baseline of sorts for readers to find credence with the author’s claims). The cogent chain of reasoning indicates an understanding of the overall effect of Bogard’s personal narrative both in terms of its function in the passage and how it affects his audience. This type of insightful analysis is evident throughout the response and indicates advanced analytical skill.

Writing—4: The response is cohesive and demonstrates highly effective use and command of language. The response contains a precise central claim (He effectively builds his argument by using personal anecdote, allusions to art and history, and rhetorical questions), and the body paragraphs are tightly focused on those three elements of Bogard’s text. There is a clear, deliberate progression of ideas within paragraphs and throughout the response. The writer’s brief introduction and conclusion are skillfully written and encapsulate the main ideas of Bogard’s piece as well as the overall structure of the writer’s analysis. There is a consistent use of both precise word choice and well-chosen turns of phrase (the natural magnificence of stars in a dark sky is definite, our world consumed by unnatural, vapid lighting, the affecting power of an untainted night sky). Moreover, the response features a wide variety in sentence structure and many examples of sophisticated sentences (By doing this, Bogard creates a dichotomy between Paris’ traditionally alluded-to name and the reality of what Paris is becoming – no longer “the city of light”, but more so “the city of light…before 2AM”). The response demonstrates a strong command of the conventions of written English. Overall, the response exemplifies advanced writing proficiency.
## The SAT Essay Scoring Guide

<table>
<thead>
<tr>
<th>Score</th>
<th>Reading</th>
<th>Analysis</th>
<th>Writing</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>4</strong></td>
<td>Advanced: The response demonstrates thorough comprehension of the source text. The response shows an understanding of the text's central idea(s) and of most important details and how they interrelate, demonstrating a comprehensive understanding of the text. The response is free of errors of fact or interpretation with regard to the text. The response makes skillful use of textual evidence (quotations, paraphrases, or both), demonstrating a complete understanding of the source text.</td>
<td>Advanced: The response offers an insightful analysis of the source text and demonstrates a sophisticated understanding of the analytical task. The response offers a thorough, well-considered evaluation of the author's use of evidence, reasoning, and/or stylistic and persuasive elements, and/or feature(s) of the student's own choosing. The response contains relevant, sufficient, and strategically chosen support for claim(s) or point(s) made. The response focuses consistently on those features of the text that are most relevant to addressing the task.</td>
<td>Advanced: The response is cohesive and demonstrates a highly effective use and command of language. The response includes a precise central claim. The response includes a skillful introduction and conclusion. The response demonstrates a deliberate and highly effective progression of ideas both within paragraphs and throughout the essay. The response has a wide variety in sentence structures. The response demonstrates a consistent use of precise word choice. The response maintains a formal style and objective tone. The response shows a strong command of the conventions of standard written English and is free or virtually free of errors.</td>
</tr>
<tr>
<td><strong>3</strong></td>
<td>Proficient: The response demonstrates effective comprehension of the source text. The response shows an understanding of the text's central idea(s) and important details. The response is free of substantive errors of fact and interpretation with regard to the text. The response makes appropriate use of textual evidence (quotations, paraphrases, or both), demonstrating an understanding of the source text.</td>
<td>Proficient: The response offers an effective analysis of the source text and demonstrates an understanding of the analytical task. The response competently evaluates the author's use of evidence, reasoning, and/or stylistic and persuasive elements, and/or feature(s) of the student's own choosing. The response contains relevant and sufficient support for claim(s) or point(s) made. The response focuses primarily on those features of the text that are most relevant to addressing the task.</td>
<td>Proficient: The response is mostly cohesive and demonstrates effective use and control of language. The response includes a central claim or implicit controlling idea. The response includes an effective introduction and conclusion. The response demonstrates a clear progression of ideas both within paragraphs and throughout the essay. The response has variety in sentence structures. The response demonstrates some precise word choice. The response maintains a formal style and objective tone. The response shows a good control of the conventions of standard written English and is free of significant errors that detract from the quality of writing.</td>

<tr>
<td>2</td>
<td><strong>Partial:</strong> The response demonstrates some comprehension of the source text. The response shows an understanding of the text's central idea(s) but not of important details. The response may contain errors of fact and/or interpretation with regard to the text. The response makes limited and/or haphazard use of textual evidence (quotations, paraphrases, or both), demonstrating some understanding of the source text.</td>
<td><strong>Partial:</strong> The response offers limited analysis of the source text and demonstrates only partial understanding of the analytical task. The response identifies and attempts to describe the author's use of evidence, reasoning, and/or stylistic and persuasive elements, and/or feature(s) of the student's own choosing, but merely asserts rather than explains their importance. Or one or more aspects of the response's analysis are unwarranted based on the text. The response contains little or no support for claim(s) or point(s) made. The response may lack a clear focus on those features of the text that are most relevant to addressing the task.</td>
<td><strong>Partial:</strong> The response demonstrates little or no cohesion and limited skill in the use and control of language. The response may lack a clear central claim or controlling idea and may deviate from the claim or idea over the course of the response. The response may include an ineffective introduction and/or conclusion. The response may demonstrate some progression of ideas within paragraphs but not throughout the response. The response has limited variety in sentence structures; sentence structures may be repetitive. The response demonstrates general or vague word choice; word choice may be repetitive. The response may deviate noticeably from a formal style and objective tone. The response shows a limited control of the conventions of standard written English and contains errors that detract from the quality of writing and may impede understanding.</td>
</tr>
<tr>
<td>1</td>
<td><strong>Inadequate:</strong> The response demonstrates little or no comprehension of the source text. The response fails to show an understanding of the text's central idea(s), and may include only details without reference to central idea(s). The response may contain numerous errors of fact and/or interpretation with regard to the text. The response makes little or no use of textual evidence (quotations, paraphrases, or both), demonstrating little or no understanding of the source text.</td>
<td><strong>Inadequate:</strong> The response offers little or no analysis or ineffective analysis of the source text and demonstrates little or no understanding of the analytic task. The response identifies without explanation some aspects of the author's use of evidence, reasoning, and/or stylistic and persuasive elements, and/or feature(s) of the student's choosing. Or numerous aspects of the response's analysis are unwarranted based on the text. The response contains little or no support for claim(s) or point(s) made, or support is largely irrelevant. The response may not focus on features of the text that are relevant to addressing the task. Or the response offers no discernible analysis (e.g., is largely or exclusively summary).</td>
<td><strong>Inadequate:</strong> The response demonstrates little or no cohesion and inadequate skill in the use and control of language. The response may lack a clear central claim or controlling idea. The response lacks a recognizable introduction and conclusion. The response does not have a discernible progression of ideas. The response lacks variety in sentence structures; sentence structures may be repetitive. The response demonstrates general and vague word choice; word choice may be poor or inaccurate. The response may lack a formal style and objective tone. The response shows a weak control of the conventions of standard written English and may contain numerous errors that undermine the quality of writing.</td>

What You Need to Know About Taking the SAT

SAT Terms and Conditions

The testing policies and other information in this guide apply to every SAT test administration. From time to time, College Board might update these policies. We encourage you to review the latest policies at sat.org/test-security.

By registering for or taking the SAT, you’re certifying that you are the person whose personal information is being provided for this registration and that the information you are providing is accurate. Giving false or misleading information about yourself, such as name, address, date of birth, current grade level, expected graduation date, attending high school, or photo, can result in an investigation, cancellation of scores, and a testing ban for College Board assessments, and such other actions as College Board, in its sole discretion, deems appropriate. We reserve the right to cancel scores from College Board test administrations that occurred prior to the test administration at issue.

- If your school participates in an SAT School Day administration and/or a bulk registration process for the test, College Board may receive your personal information, including first name, last name, gender, date of birth, and mailing address, from your school. This information will be kept secure and added to your permanent College Board record to be used for score reporting purposes as well as the other purposes that are outlined in this section and registration materials. By taking the SAT test and signing the SAT answer sheet, you acknowledge that your school has provided this information to College Board and consent to College Board retaining this information.

- Creating fake or multiple College Board student accounts, intentionally or inadvertently, is strictly prohibited and can result in an investigation, the merging of relevant records, and penalties that may include score cancellation or being banned from taking College Board assessments, including AP®, SAT, and SAT Subject Tests.

- If you want to cancel your scores, your request must be received by the fourth business day after a test administration. Once you submit your request to cancel scores, your scores cannot be reinstated and are not reported to you or your designated institutions.

- Only score reports from completed and scored tests are sent to your colleges and scholarship programs. Scores from future tests you’ve registered for but haven’t yet completed are not included. You can send all your scores to an institution, or you can choose which scores to send an institution by test date for the SAT and by individual test taken for SAT Subject Tests. Score Choice is optional; if you decide not to use it when sending scores, College Board will send all of your scores to the recipient institutions.

- Each time you test, you can choose the colleges or scholarship programs you want to send your scores to. The first four score sends are included with your test registration fee. If you are undecided about where to send your scores, you can add or change your score recipients online. Corrections and additions to your score report recipients can be made online until nine days after the test. The four score-sending requests that are included with registration cannot be applied to past or future score-sending requests or registrations.

- Most, but not all, scores will be reported online and available by phone several weeks after the test date. Your score report will be delivered to the high school, colleges, universities, and scholarship programs you indicated when you registered, and additional score report requests will be delivered a few weeks after the request is received. A paper copy of your score report can be requested at the time of registration.

- SAT Program policies are subject to change at any time for test security or other reasons. The SAT Program will attempt to provide adequate prior notice, although circumstances may limit our ability to do so.

- College Board and the test center will not be responsible for personal property, including prohibited items, brought to the test center on test day that becomes lost, stolen, or damaged.
All personal property brought into the test center, such as purses, bags, backpacks, mobile phones, calculators and other electronic devices, may be subject to search at the discretion of College Board, ETS, and its testing staff. Searches may include the use of tools, such as metal detecting wands, cell phone detectors, or other methods, that detect prohibited devices and/or their use. College Board, ETS, and its testing staff may confiscate and retain for a reasonable period of time any personal property suspected of having been used, or capable of being used, in violation of our Test Security and Fairness policies, for further investigation.

In certain cases, including where there is unexpected volume in a particular area or for test security reasons, College Board reserves the right to move test takers to a different location or to a subsequent test administration.

In the event of a test security–related concern, public health threat, natural disaster, terrorist act, or other unexpected events or circumstances, College Board may cancel testing for all or a specific group of test takers. When this occurs, the SAT Program will notify test takers in advance if possible. We will communicate test cancellations and, when feasible, alternative test dates for affected test takers.

To ensure the integrity of the SAT Program, College Board reserves the right to bar any individual or group of individuals from registering for and/or taking any College Board test.

If College Board becomes aware that you or someone else may be in imminent danger, including a determination based on the content of your SAT essay, we reserve the right to contact the appropriate individuals or agencies, including your high school or law enforcement agencies. We might also provide the relevant essay or other content, along with any personal information, to those contacted.

Except as otherwise indicated in these terms and conditions, College Board and its agents and subcontractors shall not be liable for any damages, including consequential, direct, indirect, or punitive damages arising from or otherwise related to SAT test development and administration, score reporting, test security, or the failure of SAT testing staff, students, or school districts to comply with College Board’s policies and procedures, whether or not (A) the claim is contract based or (B) College Board has been advised of the possibility of such damages.

College Board or its designee may use methods to capture images, video, or audio at any or all test centers to ensure test security. The resulting images or recordings, which may permit College Board to identify specific individuals, may be collected, stored, reviewed, and used for the purposes of (1) identifying and/or investigating possible SAT test security incidents; (2) collecting evidence in connection with possible SAT test security incidents; and (3) enhancing SAT test security. These images and/or recordings are maintained following the test administration for as long as reasonably necessary for the purposes specified. Thereafter the images and recordings are securely destroyed. College Board will NOT use or disclose such information except as described above, as requested by law enforcement, and/or as reasonably necessary to protect the rights and property of College Board or third parties.

The test occasionally includes test questions for research purposes. These questions may appear in any of the test sections, and testing time will be extended by 20 minutes so students have time to answer them. They will not be included in computing students’ scores.

College Board takes steps to ensure that registration records are properly handled and processed, and that answer sheets are properly handled and scored. In the unlikely event of a problem with shipping or otherwise processing registration materials, answer sheets, or score reports, or with scoring the test, or score reporting, College Board will correct the error, if possible, schedule a makeup test for impacted test takers, or provide a refund of the test fee. These are the sole remedies for test takers in relation to such issues. College Board has sole discretion in determining whether to score lost answer sheets that are eventually recovered.

Additional Privacy Policies
College Board employs an array of measures, in compliance with applicable laws and the policies and guidelines set forth herein, to manage and safeguard personal information that you provide to College Board. Please see College Board’s online privacy policy at collegeboard.org/privacy-policy.

Some of the information is available to your high school, the ETS Office of Testing Integrity, and College Board. In the event of an investigation involving the validity of your test scores, your information may be made available to institutions you have sent your scores to. When legally compelled to do so, for example pursuant to a subpoena, College Board may provide your personal information to outside parties.
What You Need to Know About Taking the SAT  SAT Terms and Conditions

College Board does not use either your raw score or your reported scaled score by itself or in combination with any other information to predict your individual future academic performance at specific postsecondary institutions. However, College Board does provide assistance to individual colleges and universities to help them use and interpret SAT scores. Test scores are the property of College Board.

Your scores will be made available to your high school. In addition, individual scores and other information you provide during testing may be reported to your district or state and/or their agents and representatives for educational, diagnostic and/or reporting purposes. For more information about the guidelines on the uses of College Board test scores and related data, ask your counselor or download Guidelines on the Uses of College Board Test Scores and Related Data from collegeboard.org/research. Your name will never be sold to a commercial marketing firm or retailer of merchandise or services (such as test prep).

College Board will disclose scores to a student’s parent or guardian if the parent or guardian is able to supply to College Board the required authentication information, unless College Board determines in its sole discretion that its records on the student contain a court order, state statute, or legally binding document relating to matters such as divorce, separation, or custody that restricts the parent’s or guardian’s access to the student’s scores. College Board will not independently investigate whether a court order, state statute, or legally binding document exists other than in its records; rather, relevant documents and information must be submitted to College Board. College Board reserves the right to request additional documents and information in connection with determining whether or not to disclose scores to a parent or guardian.

Other than disputes involving an “Invalid Scores” review (see the “Invalid Scores” section later in this guide) or infringement of College Board’s intellectual property rights, all disputes against College Board and/or any of its contractors, that relate in any way to registering for or taking the SAT, including but not limited to requesting or receiving test accommodations, score reporting, and the use of test taker data, shall exclusively be resolved by a single arbitrator through binding, individual arbitration administered by the American Arbitration Association (“AAA”), under the AAA Consumer Arbitration Rules in effect at the time a request for arbitration is filed with the AAA. Copies of the AAA Rules can be located at www.adr.org. Unless the parties mutually agree otherwise, the seat and the place of the arbitration shall be New York, New York. The parties agree that the Federal Arbitration Act (“FAA”), 9 U.S.C. § 1 et seq. governs this provision, and it is the intent of the parties that the FAA shall pre-empt all State laws to the fullest extent permitted by law. No arbitration may be maintained as a class action, and the arbitrator shall not have the authority to combine or aggregate the disputes of more than one individual, conduct any class proceeding, make any class award, or make an award to any person or entity not a party to the arbitration, without the express written consent of College Board. By agreeing to arbitration in accordance with this section, you are waiving your right to have your dispute heard by a judge or jury. Each party will be responsible for its own fees and expenses incurred in connection with the arbitration, regardless of its outcome. For purposes of this provision, each College Board contractor is a third-party beneficiary of this section, is entitled to the rights and benefits hereunder, and may enforce the provisions hereof as if it were a party hereto.

Notice to EU Residents

College Board is providing this supplemental privacy notice to give individuals in the European Union (EU) this additional information required by the EU General Data Protection Regulation (GDPR). These provisions, together with the statements in College Board Privacy Notices, explain our practices with regard to processing EU residents’ personal data. For the most up to date information please visit collegeboard.org/privacy-policy/notice-to-eu-residents or contact Customer Service at eucustomerservice@collegeboard.org or (844) 849-3551.

College Board requires certain Personal Information from you in order to provide you with our products and services. Our registration forms indicate which data elements are required for our contracts. If you do not provide these data elements or you provide inaccurate information, this will invalidate your registration.

We collect and process your information based on the lawful basis described below:

- To fulfill a contract with you, such as to provide a College Board test or a test offered by another company on behalf of College Board.
- We may provide Personal Information to our subcontractors (processors) and other trusted businesses or persons to process it for us, based on our instructions and in compliance with our Privacy Policy and any other appropriate confidentiality and security measures. For example, we use service providers to help process and score our tests; to process a payment, to create an account on our website, and for website management.
With your consent, to send you marketing emails communications or to send your scores to your designated recipients.

We may also process your Personal Information for the purposes of our legitimate interests, provided that such processing shall not outweigh your rights and freedoms. In particular, we may process your Personal Information as needed to:

(i) Protect you, us, or others from threats (such as security threats or test fraud); (ii) Improve College Board tests and support College Board research initiatives; (iii) Comply with the laws that are applicable to us around the world; (iv) Enable or administer our business, such as for quality control, consolidated reporting, and customer service; (v) Manage corporate transactions, such as mergers or acquisitions; and (vi) Understand and improve our business, improve test integrity, and for research purposes.

Automated Decision Making and Profiling

College Board may use automated processes in connection with scoring tests and for similar purposes, as needed to provide the test services that you have requested. All such decisions are subject to human review. We will not make automated decisions about you that may significantly affect you, unless (a) the decision is necessary as part of a contract that we have with you, (b) we have your explicit consent, or (c) we are required by law to use the technology. You can learn more about test scoring by reading the information posted on our website about each of our tests and in the Research section of our website research.collegeboard.org.

Your Rights

You always have the right to object to our marketing communications. To opt out of emails, simply click the link labeled unsubscribe at the bottom of any email we send you.

EU residents also have the right to access, correct, and request erasure or restriction of their Personal Information as required by law. This means you have a right to know whether or not College Board maintains your Personal Information. If we do have your Personal Information, we will provide you with a copy (subject to the rights of others). If your information is incorrect or incomplete, you have the right to ask us to update it. You may also ask us to delete or restrict your Personal Information.

To exercise these rights, please contact us via email at eucustomerservice@collegeboard.org or write to us at the U.S. address on the inside front cover of this guide, and a member of our customer service team will assist you. Please understand that we may need to verify your identity before we can process your request. Additionally, our ability to delete Personal Information will be limited in those cases where we are required to retain records, such as in connection with score reports and test security processes.

If you believe that we have processed your Personal Information in violation of applicable law, you may file a complaint with College Board Office of General Counsel or with a supervisory authority.

Data Retention

We will retain your Personal Information for as long as the information is needed for the purposes set forth above and for any additional period that may be required or permitted by law. You may request that we delete your Personal Information by contacting us via email at eucustomerservice@collegeboard.org. Unless we are required by law or have a legitimate interest to retain your information, we will delete it within 30 days of your request.

College Board Alerts SMS Terms and Conditions

If you provide your mobile number to College Board, we will use it only for the purposes outlined in Protecting Your Privacy: Use of Student Information on page 10.

To discontinue receiving SMS messages from College Board Alerts, text STOP to 70801, or you can call Customer Service. Message and data rates may apply.

♦ For a request to unsubscribe, you will receive one (1) final message from College Board confirming that you have been unsubscribed in our system.

♦ Following such confirmation message, no additional text messages will be sent unless you reactivate your subscription, which you can do by texting STUDENTJOIN or PARENTJOIN to 70801.

♦ For additional help, text HELP to 70801 or contact socialmediasupport@collegeboard.org.

♦ Compatible Carriers are listed under Communications from College Board and Opt-In Choices at collegeboard.org/privacy-policy/privacy-statement.

Grounds for Score Cancellation

College Board and ETS (referred to together in these terms as “we” or “our”) reserve the right to dismiss test takers, decline to score any test, and/or cancel any test scores when, in our sole judgment, as applicable, a testing irregularity occurs; there is an apparent discrepancy in the test taker’s identification; a test
taker is improperly admitted to the test center; a test
taker has engaged in misconduct (see “Misconduct”
later in this section); based on a test taker’s testing
history, the validity of the score is suspect; or the
score is deemed invalid for another reason, including,
but not limited to, discrepant handwriting, unusual
answer patterns, or plagiarism. Pending investigations
are kept confidential, but results of completed
investigations may be communicated to intended
score recipients, including if such investigation
indicates attempts to gain an unfair advantage in any
way, including but not limited to impersonation, use
of prohibited items, or attempts to send/receive test
content. We strive to protect the privacy of test takers
whose scores are questioned. However, if the test
taker publicizes the investigation, we reserve the right
to make details of such investigation public.

When, for any of these reasons, we cancel a test score
that has already been reported, we’ll notify score
recipients that the score was canceled, but we won’t
disclose the reason for cancellation unless authorized
to do so by the test taker, unless there is suspected
impersonation, unless in certain cases that affect a
group of test takers, or unless where required by law.

Testing Irregularities Testing irregularities refer
to problems or irregular circumstances or events
associated with the administration of a test; they may
affect an individual or groups of test takers.

Such problems include, without limitation,
administrative errors (e.g., improper timing, improper
seating, accommodations not approved by College
Board, defective materials, and defective equipment),
evidence of possible preknowledge of secure test
content, and disruptions of test administrations such
as natural disasters and other emergencies.

When testing irregularities occur, we may cancel an
administration or individual registrations, decline to
score all or part of the test, or cancel the test score.
We may do so whether or not the affected students
caus ed the testing irregularities, benefited from them,
or engaged in misconduct. We are solely responsible
for determining whether testing irregularities
have occurred, and our decisions are final. When
appropriate, we give affected test takers the opportunity
to take the test again, without charge. This is the sole
remedy available to test takers as a result of testing
irregularities. Students and parents may not review
scores from the affected administration before choosing
the option of taking a makeup test. See Makeup Testing
later in this guide for more information.

Identification Discrepancies When there is
a discrepancy in a test taker’s identification or
photograph on the admission ticket, or the photo
does not meet our requirements, the test taker may
be denied admission to or dismissed from the test
center; in addition, we may decline to score the test, or
immediately cancel the test score. If the photo on your
admission ticket does not match your ID, you might
not be admitted to the test center.

Misconduct When we find misconduct in connection
with a test, the test taker may be dismissed from the
test center, or ETS may decline to score the test or
may cancel the test score. Infractions during the test
may result in dismissal from the test center, score
cancellation, or being banned from taking College
Board assessments, including AP, SAT, and SAT
Subject Tests. Test takers whose scores are canceled
due to misconduct will forfeit test and registration fees.

Misconduct includes, but is not limited to:

- Taking any test questions or essay topics from the
testing room, including through memorization,
giving them to anyone else, or discussing them
with anyone else through any means, including,
but not limited to, email, text messages, social
media, or the internet.

- Improperly accessing the test, a part of the test, or
information about the test, or the test center.

- Referring to, looking through, or working on any
test, or test section in the test book or answer
sheet, other than during the testing period for that
test or test section.

- Referring to, or looking through, any test or test
section while leaving the answer sheet blank.

- Attempting to give or receive assistance, including
by copying or through the use of an answer key.

- Discussing or sharing of test content during the
test administration, during breaks, or after the test.

- Communicating with other test takers in any form
while testing is in session in the testing room.

- Using or accessing any prohibited devices or
aids such as, but not limited to, cell phones,
smartphones, smartwatches, other oral or written
communication devices or wearable technology,
cameras, notes, and reference books, etc.,
during or in connection with the test, including
during breaks.

- Sharing or other misuse of equipment, including
using a calculator on a test or test section you’re
not allowed to use calculators for.

- Consuming food or drink in unauthorized areas.

- Leaving the test room without permission.

- Leaving the building at any time during the test
administration, including during breaks.
Attempting in any manner to remove from the test room any part of a test book or any notes relating to the test. Attempting to take the test for someone else or attempting to have someone else impersonate you to take the test. Disturbing others or refusing to follow instructions given by testing staff. Refusing to follow any of the test administration regulations in The SAT and SAT Subject Tests Student Registration Booklet, in other registration materials, or given by the test coordinator.

**Testing History** Based on a test taker’s testing history, their scores may be canceled without applying procedures normally used for students as explained in the “Invalid Scores” section. College Board reserves the right to report a test taker’s testing history to institutions that inquire as part of a test security investigation.

**Invalid Scores** We may also cancel scores if there is substantial evidence that they’re invalid for any other reason. Evidence of invalid scores may include, without limitation, plagiarism, discrepant handwriting, unusual answer patterns, text similar to that in other essays, paraphrasing of text from published sources, and essays that aren’t independent compositions.

Before canceling scores under this “Invalid Scores” section, we notify the test taker in writing (via email if possible) about our concerns, let the test taker submit information addressing them, and consider any information submitted. If substantial evidence still exists that the scores aren’t valid, we offer the test taker options that may include voluntary score cancellation, a free retest under closely monitored conditions, or arbitration in accordance with ETS’s standard Arbitration Agreement. When notifying the test taker, we send a copy of the booklet Why and How Educational Testing Service Questions Test Scores, which explains this process in greater detail. (Any test taker may request a copy of this booklet at any time.) Notification of the concern may be made via email if an email address is available. If no action is taken by the test taker, though, the scores will be canceled.

If at any time before, during, or after a review of questionable scores we find that test misconduct has occurred, we may treat the matter under our misconduct procedures; in that case, the options just described under this “Invalid Scores” section or the “Testing Irregularities” section, as applicable, will not be available, even if those options were previously offered. We have sole discretion in determining whether to treat potential testing violations under this section or the “Misconduct” section earlier in this guide.

The retest option is available only for tests administered in the United States and Canada. The arbitration option is available only for tests administered in the United States and U.S. territories.

**Suspected Impersonation** In cases where we believe that someone other than the registered test taker took the test for the registered test taker, and in other cases where required or permitted by law, we may refer the matter to law enforcement and inform the registered test taker’s parent(s), legal guardian(s), high school, colleges, and other institutions to which the registered test taker requested scores be sent. The registered test taker specifically acknowledges, and agrees to, such disclosure.

**Reporting Misconduct or Suspicious Behavior** All SAT tests are administered under strict supervision and security measures. To report any suspected violation of our Test Security and Fairness policies, or any suspicion concerning the security of an SAT test administration, please contact the Office of Testing Integrity by phone at 609-406-5430 between 7:30 a.m. and 5:30 p.m. Eastern Time, by fax at 609-406-9709, or by email at testsecurity@info.collegeboard.org as soon as possible. All information will be held strictly confidential unless required to disclose it by law.

**Reporting Violations**

If we find that you have gained or attempted to gain or share an unfair advantage on any College Board test, we reserve the right to share this information with your high school, any other score recipients, law enforcement, and any other government agencies in the U.S. or abroad.

**Makeup Testing**

During bad weather, natural disasters, power outages, or other unusual conditions, test centers may be closed. Check sat.org/test-center-closing for test center closings on Friday night and Saturday morning before you go to the test center. Information about makeup testing is posted as it’s available. If a makeup date has been confirmed, that information is included.

The following policies apply to makeup testing:

- The availability of makeup testing and the conditions that make test takers eligible to take a makeup test are at the sole discretion of College Board.
- You may only take tests that you registered to take on the original date. During check-in only, you may be able to change your SAT Essay option, if the test coordinator can accommodate this request.
Verifying Your Scores

Score verification services include the Student Answer Services for the SAT, explained at sat.org/verify-scores. You can request a more comprehensive multiple-choice hand-score verification or essay score verification or both, up to five months after the test date, by printing and completing a Request for SAT Score Verification form, available online at sat.org/verify-scores. Read the information on the form carefully before deciding to request this service. There is a fee for this service. If you used a fee waiver to pay SAT registration fees, the score verification fee will be reduced.

Score Reporting

Score reports will be automatically sent to your high school and to the institutions you choose when you register.

- The colleges that you choose to receive score reports will have access to a copy of your essay if you took the SAT with Essay.
- Each time you take the SAT or SAT with Essay, or an SAT Subject Test, the scores are added to your College Board record. All of your scores are reported to your high school.
- You can order additional score reports. They’ll be sent to your designated colleges a few weeks after the request is received.
- If you want to change where your scores are sent, you have until 9 days after the published test date to alter your 4 free score reports at no charge. After that, you’ll be charged the additional score report request fee for any added or changed report requests.
- Score Choice lets you choose which scores are sent.

Sending Scores to College and University Systems

The reports received by you, your high school, and colleges contain scores that have been converted to College Board’s 200–800-point scale. The SAT includes additional scores that offer insights into your skill levels. College Board doesn’t use either your raw score or your reported scaled score by itself or in combination with any other information to predict your individual future academic performance at specific postsecondary institutions. However, College Board does help individual colleges and universities use and interpret SAT and SAT Subject Test scores. Test scores are the property of College Board.

In certain college and university systems, once you submit your score to one school, other schools within that system will also have access to your score. Please note, however, that if you are applying to more than one school within a college or university system, it is still important for you to send your SAT scores to each individual school. If you are not sure whether the specific school you are applying to is part of such a system, contact the school’s admission office.

Additionally, if you have decided to participate in Student Search Service, colleges and universities may identify you to provide you with materials about college admission and financial aid. Student Search Service does not report your course grades, test scores, or phone numbers to these organizations, but organizations can request student information based on a variety of criteria, which may include score range or other variables such as geographical location or expressed interests.

Score Choice

College and scholarship program–specific SAT score-use practices referenced in Score Choice materials are based on information provided to us by each participating college or scholarship program. The description of a particular SAT score-use practice in the Score Choice materials might not include every aspect of how a college or scholarship program uses a student’s score for admission decisions; additionally, SAT score-use practices for a particular college or scholarship program may change periodically and may not be automatically updated in Score Choice. We recommend that you verify the SAT score-use practices of the colleges or scholarship programs you’re sending your scores to.

We’re not responsible for the accuracy of the information or the consequences of your decisions.

Your high school will continue to have access to all of your scores.

Scholarships

The SAT Program automatically reports scores and identifying information (including email address) for Presidential Scholar consideration for test takers in all states, the District of Columbia, U.S. territories, and Puerto Rico, and for U.S. citizens abroad so you don’t have to use one of your free score reports.
Releasing Your Scores to the New York State Scholarship Program (NYSSP) The NYSSP requires that New York State students who wish to be considered for the Robert C. Byrd Honors Scholarships and Regents Scholarships at Cornell University on the basis of their SAT scores take the SAT before Nov. 1, 2019. The latest published SAT administration date that meets this deadline is Oct. 5, 2019.

The New York State Standardized Testing Law requires that you specifically authorize the sending of all reports. Your SAT scores and other information from your record will be sent to the scholarship program if you authorize the release of your scores when you apply for a scholarship. To do that, answer “yes” and sign the score release statement in the scholarship application. There’s no fee when your report is sent to the NYSSP. Scholarship application forms are sent by the State Education Department to principals of all high schools in New York State in December or January.

College Board releases to the NYSSP the names, addresses, and other identifying information of seniors who registered to take the SAT prior to Nov. 1, 2019, who are New York State residents, and who applied for scholarship(s). This procedure facilitates the matching of student files so that scores for all students who authorized their release are sent to the NYSSP. If you don’t want your name and address released for this purpose, notify College Board SAT Program, NYS Scholarship Program, P.O. Box 025505, Miami, FL 33102.

Keeping Scores on File Your test scores, your responses to the SAT Questionnaire, and related personal information that you provide to College Board become part of your student record and are kept indefinitely, unless you tested before entering the ninth grade. For requests to have a permanent College Board student record removed, individuals must call College Board Customer Service or write to College Board, Attention Customer Service. See the front of this guide for the phone number and address.

Ordering Older Scores Scores can be ordered for test takers who tested before 2005. Older scores must be ordered using the paper form available at sat.org/scores or by contacting Customer Service. We will charge an additional fee to cover the cost of looking up your scores, whether or not scores can be located. The normal response time for score delivery may not apply. Some older scores may take longer to locate, and College Board cannot guarantee that older scores can always be retrieved.

Official score reports sent to colleges five or more years after a test date will include a message explaining that they may be less valid predictors of college academic performance than more recent scores would be. This message also notifies colleges that for SAT Subject Tests, the test taker’s knowledge of the subject may change given additional study in the area, and scores may become less valid predictors within a shorter time period.

Students Testing in California and New York State

The California Education Code requires that you be given certain information about the purposes of the tests, property rights of the test subject and test agency to the test scores, procedures for releasing score reports, and score interpretation.

Statistical information related to the use of test scores in predicting future grade point averages must be provided to test takers prior to the administration of the test or coinciding with the initial reporting of test scores.

The New York State Standardized Testing Law requires that certain information concerning the purposes of the test, property rights of the test taker and test agency to the test scores, test fairness and equity, procedures for releasing score reports and for reviewing challenges about test questions, and score interpretation be given to test takers along with the score report.

The information for both California and New York State test takers is furnished in the SAT and SAT Subject Tests Student Registration Booklet and in the materials included with score reports. Complete descriptions of the content of the tests, along with information on test preparation and sample questions, are provided in the SAT Student Guide and the SAT Subject Tests Student Guide, which are available free of charge from school offices for students who plan to register for these tests.

See how to request SAT Answer Verification Services: Question-and-Answer Service (QAS) and Student Answer Service (SAS) at sat.org/verify-scores. In addition, students who took the SAT in California in December 2019 can review the test questions under secure conditions at the ETS Western Field Office in Concord, Calif., by calling 925-808-2000.

Predicting College Grades The main purpose of the SAT is to determine how prepared students are to succeed, both in college and in career training programs. Because the SAT assesses the content that research shows matters most for college and career readiness, SAT scores provide meaningful information about a student’s likelihood of success in college. But the SAT should not be used as the sole source of information for high-stakes decisions.
A pilot predictive validity study was conducted in the fall semester of 2014 to give colleges and universities information about the relationship between the SAT and college grades. Under standardized conditions 2,050 first-time, first-year students across 15 four-year institutions were administered a pilot form of the redesigned SAT. First-year college performance data—courses taken and grades in those courses—for those students provided by the institutions in June 2015 inform the relationship of the predictive validity of redesigned SAT scores. Results of this research indicate that SAT scores, in combination with a student's high school GPA, predict freshman GPA more accurately than SAT scores or high school GPA alone. For the students in the study, the multiple correlation between both SAT scores and high school and freshman GPA is 0.58. The correlation between the Evidence-Based Reading and Writing section scores and freshman GPA is 0.51, and between the SAT Math section scores and freshman GPA is 0.49. For both sections (SAT Evidence-Based Reading and Writing and SAT Math) the correlation with freshman GPA is 0.53, while the correlation between high school GPA and freshman GPA is 0.48.

The combination of SAT scores and high school GPA raised the correlation 0.05 over SAT scores alone, and 0.10 over high school GPA alone. All correlations are adjusted for restriction of range to account for enrolled students' narrower band of scores as compared to the wider range of scores observed in an applicant pool.

College Board is committed to maintaining and improving the high level of technical quality of the SAT as well as its rigorous validity research agenda. The results of ongoing research into the redesigned SAT will be released as they become available. Find out more at sat.org.

Procedures to Ensure Fairness and Equity All SAT Program test questions and editions of the tests are reviewed by external, independent educators from throughout the United States. These reviews help ensure that wording and content are unambiguous and relevant and that the language used is not offensive to or inappropriate for any particular group of students based on race/ethnicity or gender. The test as a whole includes references to men and women, as well as to individuals from varied racial, ethnic, and cultural backgrounds. Questions that were statistically harder than expected for a particular group of students to answer correctly based on their performance on other items in the test are excluded from the tests.

Relationship of SAT Scores to Family Income

College Board no longer collects information regarding family income from test takers. Past data indicate that students from every income level obtain a full range of SAT scores.

The SAT Subject Tests

- Biology E/M, Chemistry, Physics
- Literature
- Mathematics Levels I and II
- United States (U.S.) History
- World History
-Languages: Reading Only
  - French, Spanish
  - German, Italian, and Modern Hebrew
  - Latin

Languages with Listening
You may take only one listening test on this date.
- Chinese, French, German, Japanese, Korean, and Spanish

Domestic Registration: sat.org/register
Domestic Fees: sat.org/us-fees
Fee Waivers: sat.org/fee-waivers

International Registration: sat.org/international
International Fees: sat.org/intl-fees

* Sunday tests are given the day after the Saturday test.
**If registering through a representative, you'll need to submit by the early registration deadline.
Be sure to review the test calendar carefully because not all subjects are offered on every test date. The SAT is offered internationally in October, December, March, and May. The SAT Subject Tests are offered internationally in October, November, December, May, and June.
Make time to take the practice test. It’s one of the best ways to get ready for the SAT.

After you have taken the practice test, score it right away at sat.org/scoring.
Official SAT Practice Test

About the Practice Test
Take the practice test, which starts on the next page, to reinforce your test-taking skills and to be more comfortable when you take the SAT. This practice test will give you a good idea of what to expect on the actual test.

In addition, once you take the test using the practice answer sheet in the back of this booklet, you can scan and upload your answers to satpractice.org/scores and get instruction and practice in the areas where you need them the most. The practice answer sheet is specially designed for this purpose, so it looks different from what you’ll see on test day.

You’ll need to set aside 3 hours and 15 minutes to take the test—and an additional 50 minutes if you plan to take the optional essay.

Approaches to the Practice Test
The practice test will help you the most if you take it under conditions as close as possible to those of the actual test.

- Plan to complete the entire test in one sitting.
  - The Reading Test takes 65 minutes, followed by a 10-minute break.
  - The Writing and Language Test is 35 minutes long, followed immediately (no break) by the Math Test – No Calculator, which takes 25 minutes.
  - Allow yourself a 5-minute break, and then take the Math Test – Calculator, which is 55 minutes long.
  - If you’re taking the optional essay, take a 2-minute stretch break, and then give yourself 50 minutes to write the essay.
- Pace yourself by using a watch (without an audible alarm).
- Sit at a desk or table cleared of any other papers or books. Don’t use any prohibited items such as a dictionary, notes, or scratch paper.
- Use an acceptable calculator that is familiar to you for the Math Test – Calculator.
- Read the test directions carefully.

Marking the Answer Sheet
Getting credit for the right answer depends on marking the answer sheet correctly. When filling out your answer sheet, whether for the practice test or on test day, follow these important instructions:

- Make sure you use a No. 2 pencil.
- Fill in the entire bubble on the answer sheet darkly and completely.
- If you change your response, erase it as completely as possible.

**NOTE:** For this practice test, enter “01” in the Test Number field on the practice answer sheet.

Calculating Your Scores
Your test will be scored by counting the questions you answered correctly and converting this “raw” score to a score on the College Board scale of 200 to 800. You’ll find more information about how to score your test at studentscores.collegeboard.org. Remember that you can have your practice test scored at sat.org/scoring. If you took the optional Essay included in this booklet, use the SAT Essay Scoring Guide in the SAT Student Guide to determine how your essay might be scored.

Evaluate Your Test Performance
Once your practice test is scored, review your performance and ask yourself these questions:

- **Did I run out of time before I finished a section?** Remember, all multiple-choice questions are scored the same way. Be prepared to keep moving on test day and don’t spend too much time on any one question.
- **Did I make careless mistakes?** You may have misread a question, neglected to notice a word such as “except” or “best,” or solved for the wrong value. Recognizing these small but critical errors will help you avoid them on test day.
- **Did I spend too much time reading directions?** Review any directions that gave you trouble so you don’t have to spend as much time reading them when you take the actual test.
- **Keep learning and practicing at satpractice.org.**
Questions 1-10 are based on the following passage.

This passage is from Lydia Minatoya, *The Strangeness of Beauty*. ©1999 by Lydia Minatoya. The setting is Japan in 1920. Chie and her daughter Naomi are members of the House of Fuji, a noble family.

Akira came directly, breaking all tradition. Was that it? Had he followed form—had he asked his mother to speak to his father to approach a go-between—would Chie have been more receptive?

He came on a winter’s eve. He pounded on the door while a cold rain beat on the shuttered veranda, so at first Chie thought him only the wind. The maid knew better. Chie heard her soft scuttling footsteps, the creak of the door. Then the maid brought a calling card to the drawing room, for Chie.

Chie was reluctant to go to her guest; perhaps she was feeling too cozy. She and Naomi were reading at a low table set atop a charcoal brazier. A thick quilt spread over the sides of the table so their legs were tucked inside with the heat.

“Who is it at this hour, in this weather?” Chie questioned as she picked the name card off the maid’s lacquer tray.

“I think you should go,” said Naomi.

Akira was waiting in the entry. He was in his early twenties, slim and serious, wearing the black military-style uniform of a student. As he bowed—his hands hanging straight down, a black cap in one, a yellow oil-paper umbrella in the other—Chie glanced beyond him. In the glistening surface of the courtyard’s rain-drenched paving stones, she saw his reflection like a dark double.

“Madame,” said Akira, “forgive my disruption, but I come with a matter of urgency.”

His voice was soft, refined. He straightened and stole a deferential peek at her face.

In the dim light his eyes shone with sincerity. Chie felt herself starting to like him.

“Come inside, get out of this nasty night. Surely your business can wait for a moment or two.”

“I don’t want to trouble you. Normally I would approach you more properly but I’ve received word of a position. I’ve an opportunity to go to America, as dentist for Seattle’s Japanese community.”

“Congratulations,” Chie said with amusement. “That is an opportunity, I’m sure. But how am I involved?”

Even noting Naomi’s breathless reaction to the name card, Chie had no idea. Akira’s message, delivered like a formal speech, filled her with maternal amusement. You know how children speak so earnestly, so hurriedly, so endearingly about things that have no importance in an adult’s mind? That’s how she viewed him, as a child.
It was how she viewed Naomi. Even though Naomi was eighteen and training endlessly in the arts needed to make a good marriage, Chie had made no effort to find her a husband.

Akira blushed.
“Depending on your response, I may stay in Japan. I’ve come to ask for Naomi’s hand.”

Suddenly Chie felt the dampness of the night.
“Does Naomi know anything of your . . . ambitions?”
“We have an understanding. Please don’t judge my candidacy by the unseemliness of this proposal. I ask directly because the use of a go-between takes much time. Either method comes down to the same thing: a matter of parental approval. If you give your consent, I become Naomi’s yoshi.” We’ll live in the House of Fuji. Without your consent, I must go to America, to secure a new home for my bride.”

Eager to make his point, he’d been looking her full in the face. Abruptly, his voice turned gentle. “I see I’ve startled you. My humble apologies. I’ll take no more of your evening. My address is on my card. If you don’t wish to contact me, I’ll reapproach you in two weeks’ time. Until then, good night.”

He bowed and left. Taking her ease, with effortless grace, like a cat making off with a fish.
“Mother?” Chie heard Naomi’s low voice and turned from the door. “He has asked you?”

The sight of Naomi’s clear eyes, her dark brows gave Chie strength. Maybe his hopes were preposterous.

“Where did you meet such a fellow? Imagine! He thinks he can marry the Fuji heir and take her to America all in the snap of his fingers!”

Chie waited for Naomi’s ripe laughter. Naomi was silent. She stood a full half minute looking straight into Chie’s eyes. Finally, she spoke.

“I met him at my literary meeting.”

Naomi turned to go back into the house, then stopped.
“Mother.”
“Yes?”
“I mean to have him.”

* a man who marries a woman of higher status and takes her family’s name
Which choice provides the best evidence for the answer to the previous question?
A) Line 33 (“His voice . . . refined”)
B) Lines 49-51 (“You . . . mind”)
C) Lines 63-64 (“Please . . . proposal”)
D) Lines 71-72 (“Eager . . . face”)

In the passage, Akira addresses Chie with
A) affection but not genuine love.
B) objectivity but not complete impartiality.
C) amusement but not mocking disparagement.
D) respect but not utter deference.

The main purpose of the first paragraph is to
A) describe a culture.
B) criticize a tradition.
C) question a suggestion.
D) analyze a reaction.

As used in line 2, “form” most nearly means
A) appearance.
B) custom.
C) structure.
D) nature.

Why does Akira say his meeting with Chie is “a matter of urgency” (line 32)?
A) He fears that his own parents will disapprove of Naomi.
B) He worries that Naomi will reject him and marry someone else.
C) He has been offered an attractive job in another country.
D) He knows that Chie is unaware of his feelings for Naomi.

Which choice provides the best evidence for the answer to the previous question?
A) Line 39 (“I don’t . . . you”)
B) Lines 39-42 (“Normally . . . community”)
C) Lines 58-59 (“Depending . . . Japan”)
D) Lines 72-73 (“I see . . . you”)
Questions 11-21 are based on the following passage and supplementary material.

This passage is adapted from Francis J. Flynn and Gabrielle S. Adams, "Money Can't Buy Love: Asymmetric Beliefs about Gift Price and Feelings of Appreciation." ©2008 by Elsevier Inc.

Every day, millions of shoppers hit the stores in full force—both online and on foot—searching frantically for the perfect gift. Last year, Americans spent over $30 billion at retail stores in the month of December alone. Aside from purchasing holiday gifts, most people regularly buy presents for other occasions throughout the year, including weddings, birthdays, anniversaries, graduations, and baby showers. This frequent experience of gift-giving can engender ambivalent feelings in gift-givers. Many relish the opportunity to buy presents because gift-giving offers a powerful means to build stronger bonds with one’s closest peers. At the same time, many dread the thought of buying gifts; they worry that their purchases will disappoint rather than delight the intended recipients.

Anthropologists describe gift-giving as a positive social process, serving various political, religious, and psychological functions. Economists, however, offer a less favorable view. According to Waldfogel (1993), gift-giving represents an objective waste of resources. People buy gifts that recipients would not choose to buy on their own, or at least not spend as much money to purchase (a phenomenon referred to as “the deadweight loss of Christmas”). To wit, givers are likely to spend $100 to purchase a gift that receivers would spend only $80 to buy themselves. This “deadweight loss” suggests that gift-givers are not very good at predicting what gifts others will appreciate. That in itself is not surprising to social psychologists. Research has found that people often struggle to take account of others’ perspectives— their insights are subject to egocentrism, social projection, and multiple attribution errors.

What is surprising is that gift-givers have considerable experience acting as both gift-givers and gift-recipients, but nevertheless tend to overspend each time they set out to purchase a meaningful gift. In the present research, we propose a unique psychological explanation for this overspending problem—i.e., that gift-givers equate how much they spend with how much recipients will appreciate the gift (the more expensive the gift, the stronger a gift-recipient’s feelings of appreciation). Although a link between gift price and feelings of appreciation might seem intuitive to gift-givers, such an assumption may be unfounded. Indeed, we propose that gift-recipients will be less inclined to base their feelings of appreciation on the magnitude of a gift than givers assume.

Why do gift-givers assume that gift price is closely linked to gift-recipients’ feelings of appreciation? Perhaps givers believe that bigger (i.e., more expensive) gifts convey stronger signals of thoughtfulness and consideration. According to Camerer (1988) and others, gift-giving represents a symbolic ritual, whereby gift-givers attempt to signal their positive attitudes toward the intended recipient and their willingness to invest resources in a future relationship. In this sense, gift-givers may be motivated to spend more money on a gift in order to send a “stronger signal” to their intended recipient. As for gift-recipients, they may not construe smaller and larger gifts as representing smaller and larger signals of thoughtfulness and consideration.

The notion of gift-givers and gift-recipients being unable to account for the other party’s perspective seems puzzling because people slip in and out of these roles every day, and, in some cases, multiple times in the course of the same day. Yet, despite the extensive experience that people have as both givers and receivers, they often struggle to transfer information gained from one role (e.g., as a giver) and apply it in another, complementary role (e.g., as a receiver). In theoretical terms, people fail to utilize information about their own preferences and experiences in order to produce more efficient outcomes in their exchange relations. In practical terms, people spend hundreds of dollars each year on gifts, but somehow never learn to calibrate their gift expenditures according to personal insight.
The authors indicate that people value gift-giving because they feel it
A) functions as a form of self-expression.
B) is an inexpensive way to show appreciation.
C) requires the gift-recipient to reciprocate.
D) can serve to strengthen a relationship.

Which choice provides the best evidence for the answer to the previous question?
A) Lines 10-13 (“Many...peers”)
B) Lines 22-23 (“People...own”)
C) Lines 31-32 (“Research...perspectives”)
D) Lines 44-47 (“Although...unfounded”)

The “social psychologists” mentioned in paragraph 2 (lines 17-34) would likely describe the “deadweight loss” phenomenon as
A) predictable.
B) questionable.
C) disturbing.
D) unprecedented.

The passage indicates that the assumption made by gift-givers in lines 41-44 may be
A) insincere.
B) unreasonable.
C) incorrect.
D) substantiated.
17. Which choice provides the best evidence for the answer to the previous question?
   A) Lines 53-55 ("Perhaps...consideration")
   B) Lines 55-60 ("According...relationship")
   C) Lines 63-65 ("As...consideration")
   D) Lines 75-78 ("In...relations")

18. As it is used in line 54, “convey” most nearly means
   A) transport.
   B) counteract.
   C) exchange.
   D) communicate.

19. The authors refer to work by Camerer and others (line 56) in order to
   A) offer an explanation.
   B) introduce an argument.
   C) question a motive.
   D) support a conclusion.

20. The graph following the passage offers evidence that gift-givers base their predictions of how much a gift will be appreciated on
   A) the appreciation level of the gift-recipients.
   B) the monetary value of the gift.
   C) their own desires for the gifts they purchase.
   D) their relationship with the gift-recipients.

21. The authors would likely attribute the differences in gift-giver and recipient mean appreciation as represented in the graph to
   A) an inability to shift perspective.
   B) an increasingly materialistic culture.
   C) a growing opposition to gift-giving.
   D) a misunderstanding of intentions.
Questions 22-31 are based on the following passage and supplementary material.

This passage is adapted from J. D. Watson and F. H. C. Crick, “Genetical Implications of the Structure of Deoxyribonucleic Acid.” ©1953 by Nature Publishing Group. Watson and Crick deduced the structure of DNA using evidence from Rosalind Franklin and R. G. Gosling's X-ray crystallography diagrams of DNA and from Erwin Chargaff's data on the base composition of DNA.

The chemical formula of deoxyribonucleic acid (DNA) is now well established. The molecule is a very long chain, the backbone of which consists of a regular alternation of sugar and phosphate groups.

To each sugar is attached a nitrogenous base, which can be of four different types. Two of the possible bases—adenine and guanine—are purines, and the other two—thymine and cytosine—are pyrimidines. So far as is known, the sequence of bases along the chain is irregular. The monomer unit, consisting of phosphate, sugar and base, is known as a nucleotide.

The first feature of our structure which is of biological interest is that it consists not of one chain, but of two. These two chains are both coiled around a common fiber axis. It has often been assumed that since there was only one chain in the chemical formula there would only be one in the structural unit. However, the density, taken with the X-ray evidence, suggests very strongly that there are two.

The other biologically important feature is the manner in which the two chains are held together. This is done by hydrogen bonds between the bases. The bases are joined together in pairs, a single base from one chain being hydrogen-bonded to a single base from the other. The important point is that only certain pairs of bases will fit into the structure. One member of a pair must be a purine and the other a pyrimidine in order to bridge between the two chains. If a pair consisted of two purines, for example, there would not be room for it.

We believe that the bases will be present almost entirely in their most probable forms. If this is true, the conditions for forming hydrogen bonds are more restrictive, and the only pairs of bases possible are: adenine with thymine, and guanine with cytosine. Adenine, for example, can occur on either chain; but when it does, its partner on the other chain must always be thymine.

The phosphate-sugar backbone of our model is completely regular, but any sequence of the pairs of bases can fit into the structure. It follows that in a long molecule many different permutations are possible, and it therefore seems likely that the precise sequence of bases is the code which carries the genetical information. If the actual order of the bases on one of the pair of chains were given, one could write down the exact order of the bases on the other one, because of the specific pairing. Thus one chain is, as it were, the complement of the other, and it is this feature which suggests how the deoxyribonucleic acid molecule might duplicate itself.

The table shows, for various organisms, the percentage of each of the four types of nitrogenous bases in that organism’s DNA.

<table>

22. The authors use the word “backbone” in lines 3 and 39 to indicate that
A) only very long chains of DNA can be taken from an organism with a spinal column.
B) the main structure of a chain in a DNA molecule is composed of repeating units.
C) a chain in a DNA molecule consists entirely of phosphate groups or of sugars.
D) nitrogenous bases form the main structural unit of DNA.

23. A student claims that nitrogenous bases pair randomly with one another. Which of the following statements in the passage contradicts the student’s claim?
A) Lines 5-6 (“To each . . . types”)
B) Lines 9-10 (“So far . . . irregular”)
C) Lines 23-25 (“The bases . . . other”)
D) Lines 27-29 (“One member . . . chains”)

24. In the second paragraph (lines 12-19), what do the authors claim to be a feature of biological interest?
A) The chemical formula of DNA
B) The common fiber axis
C) The X-ray evidence
D) DNA consisting of two chains

25. The authors’ main purpose of including the information about X-ray evidence and density is to
A) establish that DNA is the molecule that carries the genetic information.
B) present an alternate hypothesis about the composition of a nucleotide.
C) provide support for the authors’ claim about the number of chains in a molecule of DNA.
D) confirm the relationship between the density of DNA and the known chemical formula of DNA.

26. Based on the passage, the authors’ statement “If a pair consisted of two purines, for example, there would not be room for it” (lines 29-30) implies that a pair
A) of purines would be larger than the space between a sugar and a phosphate group.
B) of purines would be larger than a pair consisting of a purine and a pyrimidine.
C) of pyrimidines would be larger than a pair of purines.
D) consisting of a purine and a pyrimidine would be larger than a pair of pyrimidines.

27. The authors’ use of the words “exact,” “specific,” and “complement” in lines 47-49 in the final paragraph functions mainly to
A) confirm that the nucleotide sequences are known for most molecules of DNA.
B) counter the claim that the sequences of bases along a chain can occur in any order.
C) support the claim that the phosphate-sugar backbone of the authors’ model is completely regular.
D) emphasize how one chain of DNA may serve as a template to be copied during DNA replication.
Based on the table and passage, which choice gives the correct percentages of the purines in yeast DNA?

A) 17.1% and 18.7%
B) 17.1% and 32.9%
C) 18.7% and 31.3%
D) 31.3% and 32.9%

Do the data in the table support the authors’ proposed pairing of bases in DNA?

A) Yes, because for each given organism, the percentage of adenine is closest to the percentage of thymine, and the percentage of guanine is closest to the percentage of cytosine.
B) Yes, because for each given organism, the percentage of adenine is closest to the percentage of guanine, and the percentage of cytosine is closest to the percentage of thymine.
C) No, because for each given organism, the percentage of adenine is closest to the percentage of thymine, and the percentage of guanine is closest to the percentage of cytosine.
D) No, because for each given organism, the percentage of adenine is closest to the percentage of guanine, and the percentage of cytosine is closest to the percentage of thymine.

According to the table, which of the following pairs of base percentages in sea urchin DNA provides evidence in support of the answer to the previous question?

A) 17.3% and 17.7%
B) 17.3% and 32.1%
C) 17.3% and 32.8%
D) 17.7% and 32.8%

Based on the table, is the percentage of adenine in each organism’s DNA the same or does it vary, and which statement made by the authors is most consistent with that data?

A) The same; “Two of . . . pyrimidines” (lines 6-8)
B) The same; “The important . . . structure” (lines 25-26)
C) It varies; “Adenine . . . thymine” (lines 36-38)
D) It varies; “It follows . . . information” (lines 41-45)
Questions 32-41 are based on the following passage.

This passage is adapted from Virginia Woolf, Three Guineas. ©1938 by Harcourt, Inc. Here, Woolf considers the situation of women in English society.

Close at hand is a bridge over the River Thames, an admirable vantage ground for us to make a survey. The river flows beneath; barges pass, laden with timber, bursting with corn; there on one side are the domes and spires of the city; on the other, Westminster and the Houses of Parliament. It is a place to stand on by the hour, dreaming. But not now. Now we are pressed for time. Now we are here to consider facts; now we must fix our eyes upon the procession—the procession of the sons of educated men.

There they go, our brothers who have been educated at public schools and universities, mounting those steps, passing in and out of those doors, ascending those pulpits, preaching, teaching, administering justice, practising medicine, transacting business, making money. It is a solemn sight always—a procession, like a caravanserai crossing a desert. But now, for the past twenty years or so, it is no longer a sight merely, a photograph, or fresco scrawled upon the walls of time, at which we can look with merely an esthetic appreciation. For there, trampasing along at the tail end of the procession, we go ourselves. And that makes a difference. We who have looked so long at the pageant in books, or from a curtained window watched educated men leaving the house at about nine-thirty to go to an office, returning to the house at about six-thirty from an office, need look passively no longer. We too can leave the house, can mount those steps, pass in and out of those doors, . . . make money, administer justice. . . . Who now agitate these humble pens may in another century or two speak from a pulpit. Nobody will dare contradict us then; we shall be the mouthpieces of the divine spirit—a solemn thought, is it not? Who can say whether, as time goes on, we may not dress in military uniform, with gold lace on our breasts, swords at our sides, and something like the old family coal-scuttle on our heads, save that that venerable object was never decorated with plumes of white horsehair. You laugh—indeed the shadow of the private house still makes those dresses look a little queer. We have worn private clothes so long. . . . But we have not come here to laugh, or to talk of fashions—men’s and women’s. We are here, on the bridge, to ask ourselves certain questions. And they are very important questions; and we have very little time in which to answer them. The questions that we have to ask and to answer about that procession during this moment of transition are so important that they may well change the lives of all men and women for ever. For we have to ask ourselves, here and now, do we wish to join that procession, or don’t we? On what terms shall we join that procession? Above all, where is it leading us, the procession of educated men? The moment is short; it may last five years; ten years, or perhaps only a matter of a few months longer. . . . But, you will object, you have no time to think; you have your battles to fight, your rent to pay, your bazaars to organize. That excuse shall not serve you, Madam. As you know from your own experience, and there are facts that prove it, the daughters of educated men have always done their thinking from hand to mouth; not under green lamps at study tables in the cloisters of secluded colleges. They have thought while they stirred the pot, while they rocked the cradle. It was thus that they won us the right to our brand-new sixpence. It falls to us now to go on thinking; how are we to spend that sixpence? Think we must. Let us think in offices; in omnibuses; while we are standing in the crowd watching Coronations and Lord Mayor’s Shows; let us think . . . in the gallery of the House of Commons; in the Law Courts; let us think at baptisms and marriages and funerals. Let us never cease from thinking—what is this “civilization” in which we find ourselves? What are these ceremonies and why should we take part in them? What are these professions and why should we make money out of them? Where in short is it leading us, the procession of the sons of educated men?

32. The main purpose of the passage is to
A) emphasize the value of a tradition.
B) stress the urgency of an issue.
C) highlight the severity of social divisions.
D) question the feasibility of an undertaking.
The central claim of the passage is that
A) educated women face a decision about how to engage with existing institutions.
B) women can have positions of influence in English society only if they give up some of their traditional roles.
C) the male monopoly on power in English society has had grave and continuing effects.
D) the entry of educated women into positions of power traditionally held by men will transform those positions.

Woolf uses the word “we” throughout the passage mainly to
A) reflect the growing friendliness among a group of people.
B) advance the need for candor among a group of people.
C) establish a sense of solidarity among a group of people.
D) reinforce the need for respect among a group of people.

According to the passage, Woolf chooses the setting of the bridge because it
A) is conducive to a mood of fanciful reflection.
B) provides a good view of the procession of the sons of educated men.
C) is within sight of historic episodes to which she alludes.
D) is symbolic of the legacy of past and present sons of educated men.

Woolf indicates that the procession she describes in the passage
A) has come to have more practical influence in recent years.
B) has become a celebrated feature of English public life.
C) includes all of the richest and most powerful men in England.
D) has become less exclusionary in its membership in recent years.

Which choice provides the best evidence for the answer to the previous question?
A) Lines 12-17 (“There . . . money”)
B) Lines 17-19 (“It . . . desert”)
C) Lines 23-24 (“For . . . ourselves”)
D) Lines 30-34 (“We . . . pulpit”)
38. Woolf characterizes the questions in lines 53-57 ("For we...men") as both
   A) controversial and threatening.
   B) weighty and unanswerable.
   C) momentous and pressing.
   D) provocative and mysterious.

39. Which choice provides the best evidence for the answer to the previous question?
   A) Lines 46-47 ("We...questions")
   B) Lines 48-49 ("And...them")
   C) Line 57 ("The moment...short")
   D) Line 62 ("That...Madam")

40. Which choice most closely captures the meaning of the figurative “sixpence” referred to in lines 70 and 71?
   A) Tolerance
   B) Knowledge
   C) Opportunity
   D) Perspective

41. The range of places and occasions listed in lines 72-76 ("Let us...funerals") mainly serves to emphasize how
   A) novel the challenge faced by women is.
   B) pervasive the need for critical reflection is.
   C) complex the political and social issues of the day are.
   D) enjoyable the career possibilities for women are.
Passage 1

Follow the money and you will end up in space. That’s the message from a first-of-its-kind forum on mining beyond Earth. Convened in Sydney by the Australian Centre for Space Engineering Research, the event brought together mining companies, robotics experts, lunar scientists, and government agencies that are all working to make space mining a reality.

The forum comes hot on the heels of the 2012 unveiling of two private asteroid-mining firms. Planetary Resources of Washington says it will launch its first prospecting telescopes in two years, while Deep Space Industries of Virginia hopes to be harvesting metals from asteroids by 2020. Another commercial venture that sprung up in 2012, Golden Spike of Colorado, will be offering trips to the moon, including to potential lunar miners.

Within a few decades, these firms may be meeting earthly demands for precious metals, such as platinum and gold, and the rare earth elements vital for personal electronics, such as yttrium and lanthanum. But like the gold rush pioneers who transformed the western United States, the first space miners won’t just enrich themselves. They also hope to build an off-planet economy free of any bonds with Earth, in which the materials extracted and processed from the moon and asteroids are delivered for space-based projects.

In this scenario, water mined from other worlds could become the most desired commodity. “In the desert, what’s worth more: a kilogram of gold or a kilogram of water?” asks Kris Zacny of HoneyBee Robotics in New York. “Gold is useless. Water will let you live.”

Water ice from the moon’s poles could be sent to astronauts on the International Space Station for drinking or as a radiation shield. Splitting water into oxygen and hydrogen makes spacecraft fuel, so ice-rich asteroids could become interplanetary refuelling stations.

Companies are eyeing the iron, silicon, and aluminium in lunar soil and asteroids, which could be used in 3D printers to make spare parts or machinery. Others want to turn space dirt into concrete for landing pads, shelters, and roads.

Passage 2

The motivation for deep-space travel is shifting from discovery to economics. The past year has seen a flurry of proposals aimed at bringing celestial riches down to Earth. No doubt this will make a few billionaires even wealthier, but we all stand to gain: the mineral bounty and spin-off technologies could enrich us all.

But before the miners start firing up their rockets, we should pause for thought. At first glance, space mining seems to sidestep most environmental concerns: there is (probably!) no life on asteroids, and thus no habitats to trash. But its consequences—both here on Earth and in space—merit careful consideration.

Part of this is about principles. Some will argue that space’s “magnificent desolation” is not ours to despoil, just as they argue that our own planet’s poles should remain pristine. Others will suggest that gluttoning ourselves on space’s riches is not an acceptable alternative to developing more sustainable ways of earthly life.

History suggests that those will be hard lines to hold, and it may be difficult to persuade the public that such barren environments are worth preserving.

After all, they exist in vast abundance, and even fewer people will experience them than have walked through Antarctica’s icy landscapes.

There’s also the emerging off-world economy to consider. The resources that are valuable in orbit and beyond may be very different to those we prize on Earth. Questions of their stewardship have barely been broached—and the relevant legal and regulatory framework is fragmentary, to put it mildly.

Space miners, like their earthly counterparts, are often reluctant to engage with such questions. One speaker at last week’s space-mining forum in Sydney, Australia, concluded with a plea that regulation should be avoided. But miners have much to gain from a broad agreement on the for-profit exploitation of space. Without consensus, claims will be disputed, investments risky, and the gains made insecure. It is in all of our long-term interests to seek one out.
In lines 9-17, the author of Passage 1 mentions several companies primarily to
A) note the technological advances that make space mining possible.
B) provide evidence of the growing interest in space mining.
C) emphasize the large profits to be made from space mining.
D) highlight the diverse ways to carry out space mining operations.

The author of Passage 1 indicates that space mining could have which positive effect?
A) It could yield materials important to Earth’s economy.
B) It could raise the value of some precious metals on Earth.
C) It could create unanticipated technological innovations.
D) It could change scientists’ understanding of space resources.

Which choice provides the best evidence for the answer to the previous question?
A) Lines 18-22 (“Within ... lanthanum”)
B) Lines 24-28 (“They ... projects”)
C) Lines 29-30 (“In this ... commodity”)
D) Lines 41-44 (“Companies ... machinery”)

As used in line 19, “demands” most nearly means
A) offers.
B) claims.
C) inquiries.
D) desires.

What function does the discussion of water in lines 35-40 serve in Passage 1?
A) It continues an extended comparison that begins in the previous paragraph.
B) It provides an unexpected answer to a question raised in the previous paragraph.
C) It offers hypothetical examples supporting a claim made in the previous paragraph.
D) It examines possible outcomes of a proposal put forth in the previous paragraph.

The central claim of Passage 2 is that space mining has positive potential but
A) it will end up encouraging humanity’s reckless treatment of the environment.
B) its effects should be thoughtfully considered before it becomes a reality.
C) such potential may not include replenishing key resources that are disappearing on Earth.
D) experts disagree about the commercial viability of the discoveries it could yield.

As used in line 68, “hold” most nearly means
A) maintain.
B) grip.
C) restrain.
D) withstand.
Which statement best describes the relationship between the passages?

A) Passage 2 refutes the central claim advanced in Passage 1.
B) Passage 2 illustrates the phenomenon described in more general terms in Passage 1.
C) Passage 2 argues against the practicality of the proposals put forth in Passage 1.
D) Passage 2 expresses reservations about developments discussed in Passage 1.

The author of Passage 2 would most likely respond to the discussion of the future of space mining in lines 18-28, Passage 1, by claiming that such a future

A) is inconsistent with the sustainable use of space resources.
B) will be difficult to bring about in the absence of regulations.
C) cannot be attained without technologies that do not yet exist.
D) seems certain to affect Earth’s economy in a negative way.

Which choice provides the best evidence for the answer to the previous question?

A) Lines 60-63 (“Some . . . pristine”)
B) Lines 74-76 (“The resources . . . Earth”)
C) Lines 81-83 (“One . . . avoided”)
D) Lines 85-87 (“Without . . . insecure”)

Which point about the resources that will be highly valued in space is implicit in Passage 1 and explicit in Passage 2?

A) They may be different resources from those that are valuable on Earth.
B) They will be valuable only if they can be harvested cheaply.
C) They are likely to be primarily precious metals and rare earth elements.
D) They may increase in value as those same resources become rare on Earth.

Questions 1-11 are based on the following passage.

Whey to Go

Greek yogurt—a strained form of cultured yogurt—has grown enormously in popularity in the United States since it was first introduced in the country in the late 1980s.

From 2011 to 2012 alone, sales of Greek yogurt in the US increased by 50 percent. The resulting increase in Greek yogurt production has forced those involved in the business to address the detrimental effects that the yogurt-making process may be having on the environment. Fortunately, farmers and others in the
Greek yogurt business have found many methods of controlling and eliminating most environmental threats. Given these solutions as well as the many health benefits of the food, the advantages of Greek yogurt outdo the potential drawbacks of its production.

[1] The main environmental problem caused by the production of Greek yogurt is the creation of acid whey as a by-product. [2] Because it requires up to four times more milk to make than conventional yogurt does, Greek yogurt produces larger amounts of acid whey, which is difficult to dispose of. [3] To address the problem of disposal, farmers have found a number of uses for acid whey. [4] They can add it to livestock feed as a protein supplement, and people can make their own Greek-style yogurt at home by straining regular yogurt. [5] If it is improperly introduced into the environment, acid-whey runoff can pollute waterways, depleting the oxygen content of streams and rivers as it decomposes. [6] Yogurt manufacturers, food scientists, and government officials are also working together to develop additional solutions for reusing whey.

1

A) NO CHANGE
B) defeat
C) outperform
D) outweigh

2

Which choice provides the most relevant detail?
A) NO CHANGE
B) supplement and convert it into gas to use as fuel in electricity production.
C) supplement, while sweet whey is more desirable as a food additive for humans.
D) supplement, which provides an important element of their diet.

3

A) NO CHANGE
B) can pollute waterways,
C) could have polluted waterways,
D) has polluted waterways,

4

A) NO CHANGE
B) scientists: and
C) scientists, and
D) scientists, and,

5

To make this paragraph most logical, sentence 5 should be placed
A) where it is now.
B) after sentence 1.
C) after sentence 2.
D) after sentence 3.
Though these conservation methods can be costly and time-consuming, they are well worth the effort. Nutritionists consider Greek yogurt to be a healthy food: it is an excellent source of calcium and protein, serves to be a digestive aid, and it contains few calories in its unsweetened low- and non-fat forms. Greek yogurt is slightly lower in sugar and carbohydrates than conventional yogurt is. Also, because it is more concentrated, Greek yogurt contains slightly more protein per serving, thereby helping people stay...

The writer is considering deleting the underlined sentence. Should the writer do this?
A) Yes, because it does not provide a transition from the previous paragraph.
B) Yes, because it fails to support the main argument of the passage as introduced in the first paragraph.
C) No, because it continues the explanation of how acid whey can be disposed of safely.
D) No, because it sets up the argument in the paragraph for the benefits of Greek yogurt.

A) NO CHANGE
B) as
C) like
D) for

A) NO CHANGE
B) containing
C) contains
D) will contain

A) NO CHANGE
B) In other words,
C) Therefore,
D) For instance,
Though these conservation methods can be costly and time-consuming, they are well worth the effort. Nutritionists consider Greek yogurt to be a healthy food: it is an excellent source of calcium and protein, serves to be a digestive aid, and it contains few calories in its unsweetened low- and non-fat forms. Greek yogurt is slightly lower in sugar and carbohydrates than conventional yogurt is. Also, because it is more concentrated, Greek yogurt contains slightly more protein per serving, thereby helping people stay satiated for longer periods of time. These health benefits have prompted Greek yogurt’s recent surge in popularity. In fact, Greek yogurt can be found in an increasing number of products such as snack food and frozen desserts. Because consumers reap the nutritional benefits of Greek yogurt and support those who make and sell it, therefore farmers and businesses should continue finding safe and effective methods of producing the food.
Questions 12-22 are based on the following passage and supplementary material.

**Dark Snow**

Most of Greenland’s interior is covered by a thick layer of ice and compressed snow known as the Greenland Ice Sheet. The size of the ice sheet fluctuates seasonally: in summer, average daily high temperatures in Greenland can rise to slightly above 50 degrees Fahrenheit, partially melting the ice; in the winter, the sheet thickens as additional snow falls, and average daily low temperatures can drop to as low as 20 degrees.

---

12. Which choice most accurately and effectively represents the information in the graph?

A) NO CHANGE  
B) to 12 degrees Fahrenheit.  
C) to their lowest point on December 13.  
D) to 10 degrees Fahrenheit and stay there for months.  

---

Average Daily High and Low Temperatures Recorded at Nuuk Weather Station, Greenland (1961—1990)

![Graph showing average daily high and low temperatures](image)

Adapted from WMO. ©2014 by World Meteorological Organization.
Typically, the ice sheet begins to show evidence of thawing in late summer. This follows several weeks of higher temperatures. For example, in the summer of 2012, virtually the entire Greenland Ice Sheet underwent thawing at or near its surface by mid-July, the earliest date on record. Most scientists looking for the causes of the Great Melt of 2012 have focused exclusively on rising temperatures. The summer of 2012 was the warmest in 170 years, records show. But Jason Box, an associate professor of geology at Ohio State believes that another factor added to the early thaw; the “dark snow” problem.

13. Which choice most effectively combines the two sentences at the underlined portion?
A) summer, following
B) summer, and this thawing follows
C) summer, and such thawing follows
D) summer and this evidence follows

14. A) NO CHANGE
B) However,
C) As such,
D) Moreover,

15. A) NO CHANGE
B) Box an associate professor of geology at Ohio State,
C) Box, an associate professor of geology at Ohio State,
D) Box, an associate professor of geology, at Ohio State

16. A) NO CHANGE
B) thaw; and it was
C) thaw:
D) thaw: being
According to Box, a leading Greenland expert, tundra fires in 2012 from as far away as North America produced great amounts of soot, some of it drifted over Greenland in giant plumes of smoke and then fell as particles onto the ice sheet. Scientists have long known that soot particles facilitate melting by darkening snow and ice, limiting its ability to reflect the Sun’s rays. As Box explains, “Soot is an extremely powerful light absorber. It settles over the ice and captures the Sun’s heat.” The result is a self-reinforcing cycle. As the ice melts, the land and water under the ice become exposed, and since land and water are darker than snow, the surface absorbs even more heat, which is related to the rising temperatures.

17. A) NO CHANGE  
   B) soot  
   C) of which  
   D) DELETE the underlined portion.

18. A) NO CHANGE  
   B) falls  
   C) will fall  
   D) had fallen

19. A) NO CHANGE  
   B) its  
   C) there  
   D) their

20. Which choice best completes the description of a self-reinforcing cycle?  
   A) NO CHANGE  
   B) raises the surface temperature.  
   C) begins to cool at a certain point.  
   D) leads to additional melting.
Box’s research is important because the fires of 2012 may not be a one-time phenomenon. According to scientists, rising Arctic temperatures are making northern latitudes greener and thus more fire prone. The pattern Box observed in 2012 may repeat itself again, with harmful effects on the Arctic ecosystem. Box is currently organizing an expedition to gather this crucial information. The next step for Box and his team is to travel to Greenland to perform direct sampling of the ice in order to determine just how much the soot is contributing to the melting of the ice sheet. Members of the public will be able to track his team’s progress—and even help fund the expedition—through a website Box has created.
Questions 23-33 are based on the following passage.

Coworking: A Creative Solution

When I left my office job as a website developer at a small company for a position that allowed me to work full-time from home, I thought I had it made: I gleefully traded in my suits and dress shoes for sweatpants and slippers, my frantic early-morning bagged lunch packing for a leisurely midday trip to my refrigerator. The novelty of this comfortable work-from-home life, however, soon got worn off quickly. Within a month, I found myself feeling isolated despite having frequent email and instant messaging contact with my colleagues. Having become frustrated trying to solve difficult problems, no colleagues were nearby to share ideas. It was during this time that I read an article into coworking spaces.

23 A) NO CHANGE
   B) was promptly worn
   C) promptly wore
   D) wore

24 A) NO CHANGE
   B) colleagues were important for sharing ideas.
   C) ideas couldn’t be shared with colleagues.
   D) I missed having colleagues nearby to consult.

25 A) NO CHANGE
   B) about
   C) upon
   D) for
The article, published by *Forbes* magazine, explained that coworking spaces are designated locations that, for a fee, individuals can use to conduct their work. The spaces are usually stocked with standard office equipment, such as photocopiers, printers, and fax machines. In these locations, however, the spaces often include small meeting areas and larger rooms for hosting presentations.

The cost of launching a new coworking business in the United States is estimated to be approximately $58,000.

---

26. A) NO CHANGE  
   B) equipment, such as:  
   C) equipment such as:  
   D) equipment, such as,

27. A) NO CHANGE  
   B) In addition to equipment,  
   C) For these reasons,  
   D) Likewise,

28. The writer is considering deleting the underlined sentence. Should the sentence be kept or deleted?  
   A) Kept, because it provides a detail that supports the main topic of the paragraph.  
   B) Kept, because it sets up the main topic of the paragraph that follows.  
   C) Deleted, because it blurs the paragraph’s main focus with a loosely related detail.  
   D) Deleted, because it repeats information that has been provided in an earlier paragraph.
What most caught my interest, though, was a quotation from someone who described coworking spaces as “melting pots of creativity.” The article refers to a 2012 survey in which 64 percent of respondents noted that coworking spaces prevented them from completing tasks in a given time. The article goes on to suggest that the most valuable resources provided by coworking spaces are actually the people whom use them.

At this point, the writer wants to add specific information that supports the main topic of the paragraph.

Perceived Effect of Coworking on Business Skills

![Graph showing positive and negative impact of coworking on various business skills]

Adapted from “The 3rd Global Coworking Survey.” ©2013 by Deskmag.

Which choice most effectively completes the sentence with relevant and accurate information based on the graph above?

A) NO CHANGE
B) 71 percent of respondents indicated that using a coworking space increased their creativity.
C) respondents credited coworking spaces with giving them 74 percent of their ideas relating to business.
D) respondents revealed that their ability to focus on their work improved by 12 percent in a coworking space.

A) NO CHANGE
B) whom uses
C) who uses
D) who use
[1] Thus, even though I already had all the equipment I needed in my home office, I decided to try using a coworking space in my city. [2] Because I was specifically interested in coworking’s reported benefits related to creativity, I chose a facility that offered a bright, open work area where I wouldn’t be isolated. [3] Throughout the morning, more people appeared. [4] Periods of quiet, during which everyone worked independently, were broken up occasionally with lively conversation.  

I liked the experience so much that I now go to the coworking space a few times a week. Over time, I’ve gotten to know several of my coworking colleagues: another website developer, a graphic designer, a freelance writer, and several mobile app coders. Even those of us who work in disparate fields are able to share advice and help each other brainstorm. In fact, it’s the diversity of their talents and experiences that makes my coworking colleagues so valuable.

31 The writer wants to add the following sentence to the paragraph.

After filling out a simple registration form and taking a quick tour of the facility, I took a seat at a table and got right to work on my laptop.

The best placement for the sentence is immediately
A) before sentence 1.
B) after sentence 1.
C) after sentence 2.
D) after sentence 3.

32 A) NO CHANGE
B) colleagues;
C) colleagues,
D) colleagues

33 A) NO CHANGE
B) give some wisdom
C) proclaim our opinions
D) opine
Questions 34-44 are based on the following passage.

The Consolations of Philosophy

Long viewed by many as the stereotypical useless major, philosophy is now being seen by many students and prospective employers as in fact a very useful and practical major, offering students a host of transferable skills with relevance to the modern workplace. 34 In broad terms, philosophy is the study of meaning and the values underlying thought and behavior. But 35 more pragmatically, the discipline encourages students to analyze complex material, question conventional beliefs, and express thoughts in a concise manner.

Because philosophy 36 teaching students not what to think but how to think, the age-old discipline offers consistently useful tools for academic and professional achievement. 37 A 1994 survey concluded that only 18 percent of American colleges required at least one philosophy course. 38 Therefore, between 1992 and 1996, more than 400 independent philosophy departments were eliminated from institutions.

34
A) NO CHANGE
B) For example,
C) In contrast,
D) Nevertheless,

35
A) NO CHANGE
B) speaking in a more pragmatic way,
C) speaking in a way more pragmatically,
D) in a more pragmatic-speaking way,

36
A) NO CHANGE
B) teaches
C) to teach
D) and teaching

37
Which choice most effectively sets up the information that follows?
A) Consequently, philosophy students have been receiving an increasing number of job offers.
B) Therefore, because of the evidence, colleges increased their offerings in philosophy.
C) Notwithstanding the attractiveness of this course of study, students have resisted majoring in philosophy.
D) However, despite its many utilitarian benefits, colleges have not always supported the study of philosophy.

38
A) NO CHANGE
B) Thus,
C) Moreover,
D) However,
More recently, colleges have recognized the practicality and increasing popularity of studying philosophy and have markedly increased the number of philosophy programs offered. By 2008 there were 817 programs, up from 765 a decade before. In addition, the number of four-year graduates in philosophy has grown 46 percent in a decade. Also, studies have found that those students who major in philosophy often do better than students from other majors in both verbal reasoning and analytical writing. These results can be measured by standardized test scores. On the Graduate Record Examination (GRE), for example, students intending to study philosophy in graduate school has scored higher than students in all but four other majors.

These days, many student’s majoring in philosophy have no intention of becoming philosophers; instead they plan to apply those skills to other disciplines. Law and business specifically benefit from the complicated theoretical issues raised in the study of philosophy, but philosophy can be just as useful in engineering or any field requiring complex analytic skills. That these skills are transferable across professions.

Which choice most effectively combines the sentences at the underlined portion?
A) writing as
B) writing, and these results can be
C) writing, which can also be
D) writing when the results are

A) NO CHANGE
B) have scored
C) scores
D) scoring

A) NO CHANGE
B) students majoring
C) students major
D) student’s majors

At this point, the writer is considering adding the following sentence.

The ancient Greek philosopher Plato, for example, wrote many of his works in the form of dialogues. Should the writer make this addition here?
A) Yes, because it reinforces the passage’s main point about the employability of philosophy majors.
B) Yes, because it acknowledges a common counterargument to the passage’s central claim.
C) No, because it blurs the paragraph’s focus by introducing a new idea that goes unexplained.
D) No, because it undermines the passage’s claim about the employability of philosophy majors.
which makes them especially beneficial to twenty-first-century students. Because today’s students can expect to hold multiple jobs—some of which may not even exist yet—during our lifetime, studying philosophy allows them to be flexible and adaptable. High demand, advanced exam scores, and varied professional skills all argue for maintaining and enhancing philosophy courses and majors within academic institutions.

DIRECTIONS

For questions 1-15, solve each problem, choose the best answer from the choices provided, and fill in the corresponding circle on your answer sheet. For questions 16-20, solve the problem and enter your answer in the grid on the answer sheet. Please refer to the directions before question 16 on how to enter your answers in the grid. You may use any available space in your test booklet for scratch work.

NOTES

1. The use of a calculator is not permitted.
2. All variables and expressions used represent real numbers unless otherwise indicated.
3. Figures provided in this test are drawn to scale unless otherwise indicated.
4. All figures lie in a plane unless otherwise indicated.
5. Unless otherwise indicated, the domain of a given function \( f \) is the set of all real numbers \( x \) for which \( f(x) \) is a real number.

REFERENCE

\[
\begin{align*}
A &= \pi r^2 \\
C &= 2\pi r \\
A &= \ell w \\
\frac{1}{2}bh &= c^2 = a^2 + b^2 \\
2x &= 60^\circ \\
30^\circ \\
\sqrt{3} &= x \sqrt{3} \\
45^\circ \\
45^\circ \\
\end{align*}
\]

Special Right Triangles

\[
\begin{align*}
V &= \ell wh \\
V &= \pi r^2h \\
V &= \frac{4}{3}\pi r^3 \\
V &= \frac{1}{3}\pi r^2h \\
V &= \frac{1}{3}\ell wh \\
\end{align*}
\]

The number of degrees of arc in a circle is 360.
The number of radians of arc in a circle is \( 2\pi \).
The sum of the measures in degrees of the angles of a triangle is 180.
1. If \( \frac{x - 1}{3} = k \) and \( k = 3 \), what is the value of \( x \)?
   A) 2  
   B) 4  
   C) 9  
   D) 10

2. For \( i = \sqrt{-1} \), what is the sum \((7 + 3i) + (-8 + 9i)\)?
   A) \(-1 + 12i\)
   B) \(-1 - 6i\)
   C) \(15 + 12i\)
   D) \(15 - 6i\)

3. On Saturday afternoon, Armand sent \( m \) text messages each hour for 5 hours, and Tyrone sent \( p \) text messages each hour for 4 hours. Which of the following represents the total number of messages sent by Armand and Tyrone on Saturday afternoon?
   A) \(9mp\)
   B) \(20mp\)
   C) \(5m + 4p\)
   D) \(4m + 5p\)

4. Kathy is a repair technician for a phone company. Each week, she receives a batch of phones that need repairs. The number of phones that she has left to fix at the end of each day can be estimated with the equation \( P = 108 - 23d \), where \( P \) is the number of phones left and \( d \) is the number of days she has worked that week. What is the meaning of the value 108 in this equation?
   A) Kathy will complete the repairs within 108 days.
   B) Kathy starts each week with 108 phones to fix.
   C) Kathy repairs phones at a rate of 108 per hour.
   D) Kathy repairs phones at a rate of 108 per day.
5

\( (x^2y - 3y^2 + 5xy^2) - (-x^2y + 3xy^2 - 3y^2) \)

Which of the following is equivalent to the expression above?

A) \( 4x^2y^2 \)

B) \( 8xy^2 - 6y^2 \)

C) \( 2x^2y + 2xy^2 \)

D) \( 2x^2y + 8xy^2 - 6y^2 \)

6

\[ h = 3a + 28.6 \]

A pediatrician uses the model above to estimate the height \( h \) of a boy, in inches, in terms of the boy’s age \( a \), in years, between the ages of 2 and 5. Based on the model, what is the estimated increase, in inches, of a boy’s height each year?

A) \( 3 \)

B) \( 5.7 \)

C) \( 9.5 \)

D) \( 14.3 \)

7

\[ m = \frac{r}{1,200} \left( \frac{1 + \frac{r}{1,200}}{1 + \frac{r}{1,200}} \right)^N - 1 \]

The formula above gives the monthly payment \( m \) needed to pay off a loan of \( P \) dollars at \( r \) percent annual interest over \( N \) months. Which of the following gives \( P \) in terms of \( m, r, \) and \( N \)?

A) \( P = \frac{r}{1,200} \left( \frac{1 + \frac{r}{1,200}}{1 + \frac{r}{1,200}} \right)^N - 1 \)

B) \( P = \frac{r}{1,200} \left( \frac{1 + \frac{r}{1,200}}{1 + \frac{r}{1,200}} \right)^N m \)

C) \( P = \frac{r}{1,200} m \)

D) \( P = \frac{1,200}{r} m \)
8. If \( \frac{a}{b} = 2 \), what is the value of \( \frac{4b}{a} \)?

A) 0  
B) 1  
C) 2  
D) 4

9. \[3x + 4y = -23\]
\[2y - x = -19\]

What is the solution \((x, y)\) to the system of equations above?

A) \((-5, -2)\)  
B) \((3, -8)\)  
C) \((4, -6)\)  
D) \((9, -6)\)

10. \[g(x) = ax^2 + 24\]

For the function \(g\) defined above, \(a\) is a constant and \(g(4) = 8\). What is the value of \(g(-4)\)?

A) 8  
B) 0  
C) -1  
D) -8

11. \(b = 2.35 + 0.25x\)
\(c = 1.75 + 0.40x\)

In the equations above, \(b\) and \(c\) represent the price per pound, in dollars, of beef and chicken, respectively, \(x\) weeks after July 1 during last summer. What was the price per pound of beef when it was equal to the price per pound of chicken?

A) $2.60  
B) $2.85  
C) $2.95  
D) $3.35

12. A line in the \(xy\)-plane passes through the origin and has a slope of \(\frac{1}{7}\). Which of the following points lies on the line?

A) \((0, 7)\)  
B) \((1, 7)\)  
C) \((7, 7)\)  
D) \((14, 2)\)
13

If \( x > 3 \), which of the following is equivalent to \( \frac{1}{x + 2} + \frac{1}{x + 3} \)?

A) \( \frac{2x + 5}{x^2 + 5x + 6} \)
B) \( \frac{x^2 + 5x + 6}{2x + 5} \)
C) \( 2x + 5 \)
D) \( x^2 + 5x + 6 \)

14

If \( 3x - y = 12 \), what is the value of \( \frac{8^x}{2^y} \)?

A) \( 2^{12} \)
B) \( 4^4 \)
C) \( 8^2 \)
D) The value cannot be determined from the information given.

15

If \( (ax + 2)(bx + 7) = 15x^2 + cx + 14 \) for all values of \( x \), and \( a + b = 8 \), what are the two possible values for \( c \)?

A) 3 and 5
B) 6 and 35
C) 10 and 21
D) 31 and 41
DIRECTIONS
For questions 16–20, solve the problem and enter your answer in the grid, as described below, on the answer sheet.

1. Although not required, it is suggested that you write your answer in the boxes at the top of the columns to help you fill in the circles accurately. You will receive credit only if the circles are filled in correctly.
2. Mark no more than one circle in any column.
3. No question has a negative answer.
4. Some problems may have more than one correct answer. In such cases, grid only one answer.
5. Mixed numbers such as \(3 \frac{1}{2}\) must be gridded as 3.5 or 7/2. (If \(\frac{31}{2}\) is entered into the grid, it will be interpreted as \(\frac{31}{2}\), not \(3 \frac{1}{2}\).)
6. Decimal answers: If you obtain a decimal answer with more digits than the grid can accommodate, it may be either rounded or truncated, but it must fill the entire grid.

Answer: \(\frac{7}{12}\)

Answer: 2.5

Acceptable ways to grid \(\frac{2}{3}\) are:

Answer: 201 – either position is correct

NOTE: You may start your answers in any column, space permitting. Columns you don’t need to use should be left blank.
16 If \( t > 0 \) and \( t^2 - 4 = 0 \), what is the value of \( t \)?

17 A summer camp counselor wants to find a length, \( x \), in feet, across a lake as represented in the sketch above. The lengths represented by \( AB, EB, BD, \) and \( CD \) on the sketch were determined to be 1800 feet, 1400 feet, 700 feet, and 800 feet, respectively. Segments \( AC \) and \( DE \) intersect at \( B \), and \( \angle AEB \) and \( \angle CDB \) have the same measure. What is the value of \( x \)?

18

\[
\begin{align*}
  x + y &= -9 \\
  x + 2y &= -25
\end{align*}
\]

According to the system of equations above, what is the value of \( x \)?

19 In a right triangle, one angle measures \( x^\circ \), where \( \sin x^\circ = \frac{4}{5} \). What is \( \cos(90^\circ - x^\circ) \)?

20

If \( a = 5\sqrt{2} \) and \( 2a = \sqrt{2x} \), what is the value of \( x \)?

Math Test – Calculator

55 MINUTES, 38 QUESTIONS

Turn to Section 4 of your answer sheet to answer the questions in this section.

**Directions**

For questions 1-30, solve each problem, choose the best answer from the choices provided, and fill in the corresponding circle on your answer sheet. For questions 31-38, solve the problem and enter your answer in the grid on the answer sheet. Please refer to the directions before question 31 on how to enter your answers in the grid. You may use any available space in your test booklet for scratch work.

**Notes**

1. The use of a calculator is permitted.
2. All variables and expressions used represent real numbers unless otherwise indicated.
3. Figures provided in this test are drawn to scale unless otherwise indicated.
4. All figures lie in a plane unless otherwise indicated.
5. Unless otherwise indicated, the domain of a given function $f$ is the set of all real numbers $x$ for which $f(x)$ is a real number.

**Reference**

- $A = \pi r^2$
- $C = 2\pi r$
- $A = lw$
- $A = \frac{1}{2}bh$
- $c^2 = a^2 + b^2$
- $V = \ell wh$
- $V = \pi r^2h$
- $V = \frac{4}{3}\pi r^3$
- $V = \frac{1}{3}\pi r^2h$
- $V = \frac{1}{3}\ell wh$

The number of degrees of arc in a circle is 360.
The number of radians of arc in a circle is $2\pi$.
The sum of the measures in degrees of the angles of a triangle is 180.
1. John runs at different speeds as part of his training program. The graph shows his target heart rate at different times during his workout. On which interval is the target heart rate strictly increasing then strictly decreasing?

A) Between 0 and 30 minutes
B) Between 40 and 60 minutes
C) Between 50 and 65 minutes
D) Between 70 and 90 minutes

2. If \( y = kx \), where \( k \) is a constant, and \( y = 24 \) when \( x = 6 \), what is the value of \( y \) when \( x = 5 \) ?

A) 6
B) 15
C) 20
D) 23

3. In the figure above, lines \( \ell \) and \( m \) are parallel and lines \( s \) and \( t \) are parallel. If the measure of \( \angle 1 \) is 35°, what is the measure of \( \angle 2 \) ?

A) 35°
B) 55°
C) 70°
D) 145°

4. If \( 16 + 4x \) is 10 more than 14, what is the value of \( 8x \) ?

A) 2
B) 6
C) 16
D) 80
5. Which of the following graphs best shows a strong negative association between \( d \) and \( t \)?

A) \( d \) vs. \( t \)

B) \( t \) vs. \( d \)

C) \( t \) vs. \( d \)

D) \( t \) vs. \( d \)

6. A hospital stores one type of medicine in 2-decagram containers. Based on the information given in the box above, how many 1-milligram doses are there in one 2-decagram container?

A) 0.002
B) 200
C) 2,000
D) 20,000

1 decagram = 10 grams
1,000 milligrams = 1 gram
The number of rooftops with solar panel installations in 5 cities is shown in the graph above. If the total number of installations is 27,500, what is an appropriate label for the vertical axis of the graph?

A) Number of installations (in tens)
B) Number of installations (in hundreds)
C) Number of installations (in thousands)
D) Number of installations (in tens of thousands)

For what value of $n$ is $|n - 1| + 1$ equal to 0?
A) 0
B) 1
C) 2
D) There is no such value of $n$. 
Questions 9 and 10 refer to the following information.

\[ a = 1,052 + 1.08t \]

The speed of a sound wave in air depends on the air temperature. The formula above shows the relationship between \( a \), the speed of a sound wave, in feet per second, and \( t \), the air temperature, in degrees Fahrenheit (°F).

9. Which of the following expresses the air temperature in terms of the speed of a sound wave?

A) \( t = \frac{a - 1,052}{1.08} \)
B) \( t = \frac{a + 1,052}{1.08} \)
C) \( t = \frac{1,052 - a}{1.08} \)
D) \( t = \frac{1.08}{a + 1,052} \)

10. At which of the following air temperatures will the speed of a sound wave be closest to 1,000 feet per second?

A) −46°F
B) −48°F
C) −49°F
D) −50°F

11. Which of the following numbers is NOT a solution of the inequality \( 3x - 5 \geq 4x - 3 \)?

A) −1
B) −2
C) −3
D) −5

12. Based on the histogram above, which is closest to the average (arithmetic mean) number of seeds per apple?

A) 4
B) 5
C) 6
D) 7
A group of tenth-grade students responded to a survey that asked which math course they were currently enrolled in. The survey data were broken down as shown in the table above. Which of the following categories accounts for approximately 19 percent of all the survey respondents?

A) Females taking Geometry  
B) Females taking Algebra II  
C) Males taking Geometry  
D) Males taking Algebra I

The table above lists the lengths, to the nearest inch, of a random sample of 21 brown bullhead fish. The outlier measurement of 24 inches is an error. Of the mean, median, and range of the values listed, which will change the most if the 24-inch measurement is removed from the data?

A) Mean  
B) Median  
C) Range  
D) They will all change by the same amount.
The complete graph of the function $f$ is shown in the $xy$-plane above. For what value of $x$ is the value of $f(x)$ at its minimum?

A) $-5$

B) $-3$

C) $-2$

D) $3$
18. \( y < -x + a \)  
\( y > x + b \)

In the \( xy \)-plane, if \((0, 0)\) is a solution to the system of inequalities above, which of the following relationships between \( a \) and \( b \) must be true?

A) \( a > b \)
B) \( b > a \)
C) \( |a| > |b| \)
D) \( a = -b \)

19. A food truck sells salads for $6.50 each and drinks for $2.00 each. The food truck’s revenue from selling a total of 209 salads and drinks in one day was $836.50. How many salads were sold that day?

A) 77  
B) 93  
C) 99  
D) 105
Alma bought a laptop computer at a store that gave a 20 percent discount off its original price. The total amount she paid to the cashier was $p$ dollars, including an 8 percent sales tax on the discounted price. Which of the following represents the original price of the computer in terms of $p$?

A) $0.88p$

B) $\frac{p}{0.88}$

C) $(0.8)(1.08)p$

D) $\frac{p}{(0.8)(1.08)}$

The data in the table above were produced by a sleep researcher studying the number of dreams people recall when asked to record their dreams for one week. Group X consisted of 100 people who observed early bedtimes, and Group Y consisted of 100 people who observed later bedtimes. If a person is chosen at random from those who recalled at least 1 dream, what is the probability that the person belonged to Group Y?

A) $\frac{68}{100}$

B) $\frac{79}{100}$

C) $\frac{79}{164}$

D) $\frac{164}{200}$
Questions 22 and 23 refer to the following information.

Annual Budgets for Different Programs in Kansas, 2007 to 2010

<table>
<thead>
<tr>
<th>Program</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2007</td>
</tr>
<tr>
<td>Agriculture/natural resources</td>
<td>373,904</td>
</tr>
<tr>
<td>Education</td>
<td>2,164,607</td>
</tr>
<tr>
<td>General government</td>
<td>14,347,325</td>
</tr>
<tr>
<td>Highways and transportation</td>
<td>1,468,482</td>
</tr>
<tr>
<td>Human resources</td>
<td>4,051,050</td>
</tr>
<tr>
<td>Public safety</td>
<td>263,463</td>
</tr>
</tbody>
</table>

The table above lists the annual budget, in thousands of dollars, for each of six different state programs in Kansas from 2007 to 2010.

22 Which of the following best approximates the average rate of change in the annual budget for agriculture/natural resources in Kansas from 2008 to 2010?

A) $50,000,000 per year
B) $65,000,000 per year
C) $75,000,000 per year
D) $130,000,000 per year

23 Of the following, which program's ratio of its 2007 budget to its 2010 budget is closest to the human resources program's ratio of its 2007 budget to its 2010 budget?

A) Agriculture/natural resources
B) Education
C) Highways and transportation
D) Public safety
24. Which of the following is an equation of a circle in the $xy$-plane with center $(0, 4)$ and a radius with endpoint $\left(\frac{4}{3}, 5\right)$?

A) $x^2 + (y - 4)^2 = \frac{25}{9}$

B) $x^2 + (y + 4)^2 = \frac{25}{9}$

C) $x^2 + (y - 4)^2 = \frac{5}{3}$

D) $x^2 + (y + 4)^2 = \frac{3}{5}$

25. $h = -4.9t^2 + 25t$

The equation above expresses the approximate height $h$, in meters, of a ball $t$ seconds after it is launched vertically upward from the ground with an initial velocity of 25 meters per second. After approximately how many seconds will the ball hit the ground?

A) 3.5

B) 4.0

C) 4.5

D) 5.0

26. Katarina is a botanist studying the production of pears by two types of pear trees. She noticed that Type A trees produced 20 percent more pears than Type B trees did. Based on Katarina’s observation, if the Type A trees produced 144 pears, how many pears did the Type B trees produce?

A) 115

B) 120

C) 124

D) 173

27. A square field measures 10 meters by 10 meters. Ten students each mark off a randomly selected region of the field; each region is square and has side lengths of 1 meter, and no two regions overlap. The students count the earthworms contained in the soil to a depth of 5 centimeters beneath the ground’s surface in each region. The results are shown in the table below.

<table>
<thead>
<tr>
<th>Region</th>
<th>Number of earthworms</th>
<th>Region</th>
<th>Number of earthworms</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>107</td>
<td>F</td>
<td>141</td>
</tr>
<tr>
<td>B</td>
<td>147</td>
<td>G</td>
<td>150</td>
</tr>
<tr>
<td>C</td>
<td>146</td>
<td>H</td>
<td>154</td>
</tr>
<tr>
<td>D</td>
<td>135</td>
<td>I</td>
<td>176</td>
</tr>
<tr>
<td>E</td>
<td>149</td>
<td>J</td>
<td>166</td>
</tr>
</tbody>
</table>

Which of the following is a reasonable approximation of the number of earthworms to a depth of 5 centimeters beneath the ground’s surface in the entire field?

A) 150

B) 1,500

C) 15,000

D) 150,000
28. If the system of inequalities $y \geq 2x + 1$ and $y > \frac{1}{2}x - 1$ is graphed in the $xy$-plane above, which quadrant contains no solutions to the system?

A) Quadrant II  
B) Quadrant III  
C) Quadrant IV  
D) There are solutions in all four quadrants.

29. For a polynomial $p(x)$, the value of $p(3)$ is $-2$. Which of the following must be true about $p(x)$?

A) $x - 5$ is a factor of $p(x)$.  
B) $x - 2$ is a factor of $p(x)$.  
C) $x + 2$ is a factor of $p(x)$.  
D) The remainder when $p(x)$ is divided by $x - 3$ is $-2$.

30. Which of the following is an equivalent form of the equation of the graph shown in the $xy$-plane above, from which the coordinates of vertex $A$ can be identified as constants in the equation?

A) $y = (x + 3)(x - 5)$  
B) $y = (x - 3)(x + 5)$  
C) $y = x(x - 2) - 15$  
D) $y = (x - 1)^2 - 16$
**DIRECTIONS**

For questions 31–38, solve the problem and enter your answer in the grid, as described below, on the answer sheet.

1. Although not required, it is suggested that you write your answer in the boxes at the top of the columns to help you fill in the circles accurately. You will receive credit only if the circles are filled in correctly.
2. Mark no more than one circle in any column.
3. No question has a negative answer.
4. Some problems may have more than one correct answer. In such cases, grid only one answer.
5. **Mixed numbers** such as $3 \frac{1}{2}$ must be gridded as 3.5 or 7/2. (If $\frac{3}{12}$ is entered into the grid, it will be interpreted as $\frac{31}{2}$, not $3 \frac{1}{2}$.)
6. **Decimal answers:** If you obtain a decimal answer with more digits than the grid can accommodate, it may be either rounded or truncated, but it must fill the entire grid.

---

**Grid Example:**

- **Answer:** $\frac{7}{12}$

- **Fraction line:**
  - Numerator: 7
  - Denominator: 12

- **Grid in result:**
  - Place 7 in the 7th position from the left and 1 in the 12th position from the left.

- **Acceptable ways to grid $\frac{2}{3}$ are:**
  - Numerator: 2
  - Denominator: 3

- **Answer:** 201 – either position is correct

---

**NOTE:** You may start your answers in any column, space permitting. Columns you don’t need to use should be left blank.
31. Wyatt can husk at least 12 dozen ears of corn per hour and at most 18 dozen ears of corn per hour. Based on this information, what is a possible amount of time, in hours, that it could take Wyatt to husk 72 dozen ears of corn?

32. The posted weight limit for a covered wooden bridge in Pennsylvania is 6000 pounds. A delivery truck that is carrying $x$ identical boxes each weighing 14 pounds will pass over the bridge. If the combined weight of the empty delivery truck and its driver is 4500 pounds, what is the maximum possible value for $x$ that will keep the combined weight of the truck, driver, and boxes below the bridge’s posted weight limit?

33. According to the line graph above, the number of portable media players sold in 2008 is what fraction of the number sold in 2011?

34. A local television station sells time slots for programs in 30-minute intervals. If the station operates 24 hours per day, every day of the week, what is the total number of 30-minute time slots the station can sell for Tuesday and Wednesday?
A dairy farmer uses a storage silo that is in the shape of the right circular cylinder above. If the volume of the silo is $72\pi$ cubic yards, what is the diameter of the base of the cylinder, in yards?

$$h(x) = \frac{1}{(x - 5)^2 + 4(x - 5) + 4}$$

For what value of $x$ is the function $h$ above undefined?

Questions 37 and 38 refer to the following information.

Jessica opened a bank account that earns 2 percent interest compounded annually. Her initial deposit was $100, and she uses the expression $100(x)^t$ to find the value of the account after $t$ years.

37. What is the value of $x$ in the expression?

38. Jessica’s friend Tyshaun found an account that earns 2.5 percent interest compounded annually. Tyshaun made an initial deposit of $100 into this account at the same time Jessica made a deposit of $100 into her account. After 10 years, how much more money will Tyshaun’s initial deposit have earned than Jessica’s initial deposit? (Round your answer to the nearest cent and ignore the dollar sign when gridding your response.)

Practice Essay #1

Make Time to Take the Practice Essay

The essay gives you an opportunity to show how effectively you can read and comprehend a passage and write an essay analyzing the passage. In your essay, you should demonstrate that you have read the passage carefully, present a clear and logical analysis, and use language precisely.

You have **50 minutes** to read the passage and write an essay in response to the prompt provided inside this booklet.

For information on scoring your essay, view the SAT Essay scoring rubric at [sat.org/essay](http://sat.org/essay).
The Arctic National Wildlife Refuge stands alone as America’s last truly great wilderness. This magnificent area is as vast as it is wild, from the windswept coastal plain where polar bears and caribou give birth, to the towering Brooks Range where Dall sheep cling to cliffs and wolves howl in the midnight sun.

More than a decade ago, [my wife] Rosalynn and I had the fortunate opportunity to camp and hike in these regions of the Arctic Refuge. During bright July days, we walked along ancient caribou trails and studied the brilliant mosaic of wildflowers, mosses, and lichens that hugged the tundra. There was a timeless quality about this great land. As the never-setting sun circled above the horizon, we watched muskox, those shaggy survivors of the Ice Age, lumber along braided rivers that meander toward the Beaufort Sea.

One of the most unforgettable and humbling experiences of our lives occurred on the coastal plain. We had hoped to see caribou during our trip, but to our amazement, we witnessed the migration of tens of thousands of caribou with their newborn calves. In a matter of a few minutes, the sweep of tundra before us became flooded with life, with the sounds of grunting animals and clicking hooves filling the air. The dramatic procession of the Porcupine caribou herd was a once-in-a-lifetime wildlife spectacle. We understand firsthand why some have described this special birthplace as “America’s Serengeti.”

Standing on the coastal plain, I was saddened to think of the tragedy that might occur if this great wilderness was consumed by a web of roads and pipelines, drilling rigs and industrial facilities. Such proposed developments would forever destroy the wilderness character of America’s only Arctic Refuge and disturb countless numbers of animals that depend on this northernmost terrestrial ecosystem.
The extraordinary wilderness and wildlife values of the Arctic Refuge have long been recognized by both Republican and Democratic presidents. In 1960, President Dwight D. Eisenhower established the original 8.9 million-acre Arctic National Wildlife Range to preserve its unique wildlife, wilderness, and recreational values. Twenty years later, I signed the Alaska National Interest Lands Conservation Act, monumental legislation that safeguarded more than 100 million acres of national parks, refuges, and forests in Alaska. This law specifically created the Arctic National Wildlife Refuge, doubled the size of the former range, and restricted development in areas that are clearly incompatible with oil exploration.

Since I left office, there have been repeated proposals to open the Arctic Refuge coastal plain to oil drilling. Those attempts have failed because of tremendous opposition by the American people, including the Gwich’in Athabascan Indians of Alaska and Canada, indigenous people whose culture has depended on the Porcupine caribou herd for thousands of years. Having visited many aboriginal peoples around the world, I can empathize with the Gwich’in’s struggle to safeguard one of their precious human rights.

We must look beyond the alleged benefits of a short-term economic gain and focus on what is really at stake. At best, the Arctic Refuge might provide 1 to 2 percent of the oil our country consumes each day. We can easily conserve more than that amount by driving more fuel-efficient vehicles. Instead of tearing open the heart of our greatest refuge, we should use our resources more wisely.

There are few places on earth as wild and free as the Arctic Refuge. It is a symbol of our national heritage, a remnant of frontier America that our first settlers once called wilderness. Little of that precious wilderness remains.

It will be a grand triumph for America if we can preserve the Arctic Refuge in its pure, untrammeled state. To leave this extraordinary land alone would be the greatest gift we could pass on to future generations.

Write an essay in which you explain how Jimmy Carter builds an argument to persuade his audience that the Arctic National Wildlife Refuge should not be developed for industry. In your essay, analyze how Carter uses one or more of the features listed in the box above (or features of your own choice) to strengthen the logic and persuasiveness of his argument. Be sure that your analysis focuses on the most relevant features of the passage.

Your essay should not explain whether you agree with Carter’s claims, but rather explain how Carter builds an argument to persuade his audience.
